Mathematics students to abstract Algebra, covering Group Theory and Ring Theory. Objectives: By the end of the module students should be able to understand: the abstract definition of a group, and be familiar with the basic types of examples, including numbers, symmetry groups and groups of permutations and matrices.MA136 Introduction to Abstract AlgebraLinear Algebra is a systematic theory regarding the solutions of systems of linear equations. Example 1.2.1. Let us take the following system of two linear equations in the two un-knowns x_1 and x_2 :
 $2x_1 + x_2 = 0$
 $x_1 + x_2 = 1$): This system has a unique solution for $x_1; x_2 \in \mathbb{R}$, namely $x_1 = \frac{1}{3}$ and $x_2 = \frac{2}{3}$. The

solution can be found in several different ways. Linear Algebra As an Introduction to Abstract Mathematics ABSTRACT ALGEBRA: AN INTRODUCTION is intended for a first undergraduate course in modern abstract algebra. Its flexible design makes it suitable for courses of various lengths and different levels of mathematical sophistication, ranging from a traditional abstract algebra course to one with a more applied flavor.
