Heartsaver Pediatric First Aid CPR AED Student Workbook Pearson Higher Ed  
 The student workbook for the credentialed Heartsaver Pediatric First Aid course. Provides  
 information on how to manage illness and injuries in a child during the first few minutes of an  
 emergency until professional help arrives. Includes four core modules: First Aid Basics, Injuries and  
 Illnesses, Life-Threatening Emergencies and the Chain of Survival, and CPR and AED. Also includes

optional modules, such as Use of a Nebulizer, to meet regulations for day-care centers in certain states. Workbook comes shrink-wrapped with the Heartsaver Pediatric First Aid Quick Reference Guide (#80-1002), the Adult CPR And AED Reminder Card, the Child And Infant CPR And AED Reminder Card, and a CD containing supplemental information and video clips on CPR and AED skills. An ideal resource for first responders, child-care workers, teachers, foster-care workers, camp counselors, youth organizations, coaches/Little League organizations, as well as parents, grandparents, and baby sitters.

Rev. ed. of: First aid/CPR/AED for schools and the community. 3rd ed. c2006.

[BLS Reference Card](#) Staywell Company

Introduction to Basic Cardiac Dysrhythmias, Fifth Edition, uses clear, accessible language to explain how the heart functions and how to interpret ECGs. Designed for use by the spectrum of EMS, nursing, and other healthcare professionals, the Fifth Edition provides users with the critical knowledge needed to interpret dysrhythmias and determine the appropriate treatment. The Fifth Edition includes: • Coverage of the 2015 ECC and CPR guidelines • New content on basic 12-lead ECG interpretation • Real-life ECG strips to demonstrate each concept • A variety of review tools, including 200 additional practice rhythm strips, 22 case studies, and perforated review flashcards •

Numerous review quizzes with a variety of question formats, as well as dysrhythmia practice strips and crossword puzzles • A new, modern design with the same familiar, easy-to-follow feel

Basic Life Support (BLS) Provider Manual - The content in this handbook is in compliance with the 2020 guidelines for CPR and ECC (Emergency Cardiac Care), recently released by the American

Heart Association - therefore, all the protocols illustrated in this book are based on up-to-date evidence. These guidelines are updated every 5 years. The BLS Provider Manual is a complete guide and reference tool that covers all the information students need to know in order to successfully complete the BLS course. For easier learning, multiple-choice questions can be found at the end of each chapter. The answers to these exercises are found at the very end of the book. Basic Life Support (BLS) refers to a set of procedures that can be learned to prolong survival in life-threatening situations until more professional help is available. Any individual can become certified in basic life support protocols. These protocols are frequently updated, based on the latest evidence available, and every individual who undergoes BLS certification may need to refresh their knowledge every two years. Medical professionals usually have a sound understanding of basic life support protocols. Even then, it is essential for them to frequently undergo certifications to update their knowledge regarding the latest evidence-based protocols. This handbook is designed for both medical professionals and non-healthcare individuals. It aims to establish a sound understanding of the mechanisms underlying basic life support. The intended audience is healthcare students and personnel who need to learn how to perform CPR and other basic cardiovascular life support skills in a wide variety of both clinical and prehospital settings.
