## POLLARD LOPEZ

*Advanced Trauma Life Support* Gulf Professional Publishing

One of the most interesting and challenging fields of surgery is trauma and emergency surgery. The formation of a trauma surgical subspecialty has led to a more organized system of dealing with trauma as well as saving lives. Emergency surgery has been the evolution of this, as an effort to incorporate the knowledge and skills of trauma surgery, intensive care, and emergency general surgery, all in one specialty. This is a collection of chapters describing the nature of damage control surgery, which is one of the key concepts and strategies for managing the most challenging trauma and emergency surgery patients. The authors of this book represent a team of true global experts on the topic. In addition to the knowledge shared, the authors provide their personal clinical experience in a variety of different aspects of damage control surgery.

Buku ini merupakan karya ilmiah orisinal berbahasa Indonesia yang distingnif, di tengah-tengah berbagai buku terkait yang masih terjemahan dari bahasa asing. Di dalamnya dibahas tentang inseminasi buatan, bayi tabung, bank sperma, rahim titipan, bank ASI, alat bantu hidup dan penentuan kematian, serta transplansi organ. Disajikan secara sistematis dari sisi kedokteran dan fikih secara mendalam, terkait halal haramnya dan apa saja dhawabih (aturan) dan hudud (batasan) dari masing-masing topik kedokteran tersebut. Buku ini layak dibaca sebagai referensi bagi para dokter, mahasiswa kedokteran, para ilmuwan fikih dan ushul fikih, serta masyarakat pemerhati masalah kedokteran, kesehatan, bioetika, dan hukum Islam. - Pustaka Al-Kautsar Publisher - [Indian and Pakistan Year Book and Who's who](#) PT. This proceeding contains selected papers from the National Seminar on "The Role and Strategy of Higher Education through the Results of Research and Community Service Entering the Industrial Age 4.0" which conducted on November 23rd, 2019 in Banjarmasin, Indonesia. This National Seminar was organized by Sari Mulia University, Banjarmasin, Indonesia. This conference accommodates research topics and community service from various aspects such as health, humanities, science and technology. We would like to express our appreciation and gratitude to the invited experts who have provided insights to the participants of this national seminar, as well as the research committee and paper reviewers who have worked hard until there are 95 papers worthy of publication in the NS-UNISM 2019 proceedings. Papers in this proceedings are expected to provide academic benefits, especially in broadening our horizons of understanding in our area of expertise as academics and practitioners. We realize that what we present for this publication is far from perfect. Constructive criticism is welcome for improvement. Finally, I represent the national seminar committee and also on behalf of the Sari Mulia University, Banjarmasin, Indonesia expressing my gratitude for participating and congratulating the publication of the paper in the NS-UNISM 2019. We from the Civitas Academica Sari Mulia University, together with the Committee also want to say thank you so much to all persons who have supported and actively participated in the success of this event. Hopefully this proceeding can be used as a reference in developing academic studies, technology and improving learning activities in the fields of health, humanities, and science and technology. **Tsunami - Analysis of a Hazard** Elsevier Health Sciences

Pagi, 22 Maret 2016, terminal Bandara Brussel di Zaventem, Belgia, seperti biasa padat. Sejumlah calon penumpang bergegas menuju tempat check-in. Tiba-tiba sekitar jam 08.00 waktu setempat dua bom bunuh diri meledak hampir bersamaan di dekat departure gates. Ratusan orang terlempar. Sekitar satu jam kemudian bom lain mengguncang stasiun kereta Maelbeek, Brussel. Belgia pun genting. Negara tersebut meningkatkan kewaspadaannya hingga level tertinggi dengan kategori "serious and imminent attack". Bencana tersebut mengakibatkan lebih dari 30 orang meninggal dan korban luka lebih dari 270 orang. Pemerintah Belgia sendiri segera memerintahkan rumah sakit di sana untuk mengaktifkan Emergency Plan, yakni program siaga darurat bagi rumah sakit bersangkutan untuk menghadapi lonjakan jumlah pasien yang berasal dari korban bencana, termasuk akibat bencana serangan teroris seperti bom bunuh diri itu. Dalam peristiwa tersebut diberitakan sebanyak 15 rumah sakit langsung mengaktifkan program emergency plan. Dokter dan perawat yang hari itu tidak bertugas dipanggil masuk kerja untuk menjamin penanganan pasien memadai dan tidak mengganggu pasien yang sudah ada. Penanganan korban di 15 rumah sakit itu sangat memadai dan berlangsung cepat. Palang Merah Belgia mengiriskan 30 ambulans ke dua lokasi tempat serangan bom dan menyediakan 30 ambulans lainnya dalam posisi siap siaga. Sekitar 100 profesional gawat darurat dipekerjakan khusus oleh Palang Merah Belgia untuk menangani korban serangan tersebut. Sebagian korban tidak langsung dibawa ke rumah sakit, tetapi mendapat perawatan di tempat kejadian oleh tenaga medik terlatih untuk mempercepat penanganan, seperti untuk menghentikan pendarahan. Selain di trotoar, lobi Hotel Thon yang dekat lokasi ledakan di Stasiun Maelbeek dijadikan ruang perawatan korban sementara sekaligus sebagai triage centre. Bahkan staf hotel yang sudah terlatih mampu mulai melakukan triage dan memberikan first aid dengan sarana yang ada di hotel. Korban yang lukanya bisa ditangani di sana lebih dulu dirawat oleh tenaga medis dari emergency services di tempat tersebut sedangkan yang gawat dilarikan dengan ambulans ke rumah sakit terdekat. Sebelumnya, pada 13 November 2015 Perancis mendapatkan serangan teroris melalui aksi bom bunuh diri yang menewaskan 129 orang dengan 352 orang luka. Selain bom bunuh diri, ada juga serangan tembakan terhadap warga Paris. Penembakan pertama terjadi di restoran Petit Cambodge yang menewaskan 15 orang dan melukai 10 orang. Disusul penembakan di bar A La Bonne Biere yang menewaskan lima orang dan melukai delapan orang. Yang paling banyak memakan korban adalah penembakan di gedung konser Bataclan yang sedang mementaskan grup band metal. Penembakan di sini menewaskan 89 orang dan menyebabkan beberapa terluka. Dari rentetan peristiwa itu, korban tewas mencapai 129 orang dan yang luka 352 orang (ada juga yang menyebutkan 368 orang luka). Melalui koordinasi yang baik

pada akhirnya korban bisa ditangani rumah sakit di Paris. Contoh lain yang bisa menjadi pelajaran adalah kejadian di Boston. Pada 15 April 2013 diselenggarakan lomba maraton di Boston, Amerika Serikat. Pada sekitar jam 15.00 waktu setempat, atau dua jam setelah pemenang melewati garis finish, dua ledakan bom meledak hampir bersamaan di dekat garis finish. Pada saat itu masih ada sekitar 5.700 pelari amatir yang belum masuk garis finish. Akibat ledakan bom itu tiga orang meninggal dan 264 orang lainnya terluka. Luka kebanyakan terjadi di kaki yang menandakan bom diletakkan di bawah. Akibat dari kejadian itu banyak korban yang kehilangan kakinya baik di tempat kejadian maupun karena harus diamputasi di rumah sakit. Menurut laporan dari Massachusetts Emergency Management Agency, meskipun banyak pasien yang mengalami luka serius, pasien yang dibawa ke rumah sakit selamat. Ini bisa terjadi karena cepatnya triage, pengangkutan korban, dan penanganan korban baik di tempat kejadian maupun rumah sakit. Selain itu tenaga medis yang datang ke lokasi kejadian bisa segera bertindak. Walter Dunbar, paramedis dari Boston Emergency Medical Service, menyebutkan bagaimana latihan bertahun-tahun berperan besar dalam kesuksesan menangani korban. "Setiap orang tahu dengan tepat apa yang harus dilakukannya tanpa harus dibertahu," katanya seperti dikutip dari laman EMS1 Report praises Boston EMS response to marathon bombing. Tiga contoh diatas merupakan fenomena yang dibahas dalam buku ini. Pembahasan buku tidak hanya melingkupi sisi teori, namun juga bentuk nyata berupa kajian teknis yang penting bagi pembaca dari semua elemen. Karena pada dasarnya memberikan bantuan dalam suasana gawat darurat adalah menjadi tugas bersama, bukan hanya petugas kesehatan. Itulah pentingnya masyarakat awam mengetahui cara-cara penanggulangan kegawatdaruratan. Indonesia memiliki potensi munculnya kegawatdaruratan jauh lebih besar. Disamping faktor manusia, faktor alam berupa bencana alam frekuensinya terbilang tinggi. Berdasarkan data dari Badan Nasional Penanggulangan Bencana (BNPB), setiap hari rata-rata terjadi lima kali bencana di Indonesia. Dalam 10 bulan di tahun 2016 saja kejadian bencana mencapai 1.853 kali bencana (enam kali setiap hari) yang memakan korban jiwa sebanyak 351 orang. Hampir 90% merupakan bencana hidrometeorologi yaitu bencana yang dipengaruhi cuaca seperti banjir, longsor, puting beliung, gelombang pasang, dan sebagainya. Upaya untuk mengurangi frekuensi (seringnya) dan besarnya bencana masih sangat sulit dilakukan. Oleh karena itu, hal yang paling memungkinkan adalah upaya menurunkan risiko bencana sehingga jumlah korban jiwa, kerusakan lingkungan, dan kerugian harta benda yang ditimbulkan bisa dikurangi. Dalam sambutannya di buku ini, Wakil Presiden Jusuf Kalla menyebutkan pentingnya memasukkan elemen pemberdayaan masyarakat lokal, pemanfaatan pengetahuan dan kearifan lokal, serta pelibatan berbagai kelompok masyarakat dalam penyusunan kebijakan pengurangan risiko bencana. "Saya melihat buku seperti ini menjadi alat penyebaran informasi yang penting untuk meningkatkan ketahanan masyarakat dalam menghadapi bencana. Terlebih-lebih menyangkut masalah yang krusial dalam menangani korban bencana yakni penanggulangan medik dan kesehatan," katanya. Banyak kejadian, bencana yang terjadi di suatu daerah memutus akses jalan ke lokasi bencana yang membuat daerah bencana terisolasi. Karena penduduk tak memiliki pengetahuan medik dasar yang memadai, korban yang seharusnya bisa tertolong dengan tindakan penyelamatan dasar (Bantuan Hidup Dasar, seperti diuraikan di buku ini), pada akhirnya tidak tertolong. Bencana pada dasarnya tidak hanya terjadi akibat faktor alam. Perbuatan manusia pun bisa menimbulkan bencana. Kebakaran hutan timbul karena ulah manusia. Juga kejadian lain seperti kebakaran bangunan atau fasilitas lain, ledakan gas, pencemaran lingkungan, aksi terorisme, dan sebagainya. Sementara hal-hal yang terjadi setiap hari seperti kecelakaan lalu-lintas, banyak yang menganggapnya bukan bencana karena terjadi begitu biasa. Padahal secara kumulatif kecelakaan lalu-lintas menimbulkan jumlah korban yang begitu banyak. Selama tahun 2015, misalnya, sebanyak 27.000 orang meninggal akibat kecelakaan jalan raya atau rata-rata 73 orang meninggal di jalan raya setiap harinya. Oleh karena itu kecelakaan lalu-lintas juga termasuk bencana yang tidak bisa dianggap enteng risikonya. Pada umumnya, ketika bencana terjadi, pihak yang paling diharapkan bantuannya adalah polisi dan masyarakat sekitar yang tidak terdampak bencana. Upaya Polri dalam menanggulangi bencana, menurut Kapolri Jenderal Polisi M. Tito Karnavian dalam sambutannya di buku ini, dilakukan melalui tiga tahapan penting, yakni Pra-Bencana dengan menitikberatkan pada upaya membangun kesiapsiagaan, Tanggap Bencana dengan mengedepankan upaya proaktif melalui respons cepat kepolisian, dan Pasca-Bencana dengan fokus utama pada pemeliharaan dan pemulihan kamtibmas. "Meskipun sudah ada sistem kepelatihan dalam penanganan bencana, referensi-referensi yang akan meningkatkan kualitas layanan Polri dalam memberikan pertolongan pada saat bencana menjadi penting," kata Kapolri. "Terlebih lagi dalam bidang layanan darurat medis dan kesehatan, di mana anggota polisi sering kali harus melakukannya sendiri ketika tenaga medis tidak/belum tersedia," katanya lebih lanjut. Menurut Kepala BNPB Willem Rampangilei dalam sambutannya di buku ini, di setiap kejadian bencana, peran kesehatan menjadi utama, terlebih pada dimensi tanggap darurat. "Permasalahan kesehatan yang sering kali muncul akibat bencana adalah adanya korban meninggal, korban luka, serta terjadinya pengungsian yang sangat memerlukan ketersediaan pelayanan kegawatdaruratan medik dan pelayanan kesehatan," katanya. Karena itu layanan kesehatan merupakan salah satu faktor utama keberhasilan dalam menekan jumlah korban dan manusia yang terdampak dalam bencana. Masalahnya, meskipun sudah ada sistemnya, kerap kali pihak yang paling awal menolong adalah orang yang berada di sekitar kejadian. Bantuan layanan medik kadang terlambat karena jauh, daerah bencana mendadak terisolasi, dan hambatan lainnya. Bahkan di perkotaan pun cepatnya layanan darurat medis tak secepat yang diharapkan karena terhambat kemacetan dan faktor lainnya. Sering kali ambulans baru datang satu atau dua jam setelah dihubungi, padahal korban membutuhkan bantuan hidup dasar dalam hitungan detik. Oleh karena itu betapa pentingnya kemampuan memberikan Bantuan Hidup Dasar pada korban dimiliki oleh masyarakat. Buku ini menjabarkan secara detail bagaimana solusi dan petunjuk teknis penanggulangan medik dan kesehatan dalam situasi kegawatdaruratan dan bencana. Hal yang dibahas mulai dari apa itu bencana, faktor penyebab bencana dan prinsip-prinsip penanganannya serta risiko-risiko medisnya, bagaimana melakukan penanganan di tempat kejadian sebelum tenaga medis tiba, penanganan di dalam ambulans, penanganan di rumah sakit, sistem manajemen Unit Gawat Darurat, evakuasi, penanganan korban pasca bencana, menangani pengungsi, pendidikan penanganan kegawatdaruratan dan bencana, dan lain-lain. Bahkan dibahas juga bagaimana sistem di rumah sakit harus dibangun sehingga ketika bencana terjadi dan banyak korban masuk ke rumah sakit, rumah sakit bersangkutan tidak kelebihan beban sehingga pasien-pasien sebelumnya tetap mendapat layanan dengan semestinya sementara korban bencana bisa ditangani dengan baik. Karena rinci, buku ini jadi cukup tebal (610 halaman), dan itu menjadikan buku ini sangat bernilai bagi yang memilikinya. Buku ini ditulis oleh dua orang ahli yang berpengalaman di bidang penanganan bencana yaitu Prof. DR. Dr. Aryono D. Pusponogoro, Sp.B.-KBD/Trauma dan Dr. Achmad Sujudi, Sp.B., MHA. Buku ini layak dibaca oleh tenaga medis, dunia kampus (dosen dan mahasiswa), pimpinan dan anggota TNI dan Polri, pimpinan dan anggota Pemadam Kebakaran, Kepala Daerah mulai dari kepala desa hingga gubernur, aktivis, PNS, pengelola bisnis, organisasi masyarakat, dan masyarakat umum. Karena, bencana tak memandang status juga tak melihat kapan. Siapa pun bisa mengalami dan kapan pun bisa terjadi.

Elsevier Health Sciences

The much-acclaimed BookTok sensation, Olivie Blake's *The Atlas Six*--now newly revised and edited with additional content. • The tag #theatlassix has millions of views on TikTok • A dark academic

debut fantasy with an established cult following that reads like *THE SECRET HISTORY* meets *THE UMBRELLA ACADEMY* • The first in an explosive trilogy *The Alexandrian Society*, caretakers of lost knowledge from the greatest civilizations of antiquity, are the foremost secret society of magical academicians in the world. Those who earn a place among the Alexandrians will secure a life of wealth, power, and prestige beyond their wildest dreams, and each decade, only the six most uniquely talented magicians are selected to be considered for initiation. Enter the latest round of six: Libby Rhodes and Nico de Varona, unwilling halves of an unfathomable whole, who exert uncanny control over every element of physicality. Reina Mori, a naturalist, who can intuit the language of life itself. Parisa Kamali, a telepath who can traverse the depths of the subconscious, navigating worlds inside the human mind. Callum Nova, an empath easily mistaken for a manipulative illusionist, who can influence the intimate workings of a person's inner self. Finally, there is Tristan Caine, who can see through illusions to a new structure of reality—an ability so rare that neither he nor his peers can fully grasp its implications. When the candidates are recruited by the mysterious Atlas Blakely, they are told they will have one year to qualify for initiation, during which time they will be permitted preliminary access to the Society's archives and judged based on their contributions to various subjects of impossibility: time and space, luck and thought, life and death. Five, they are told, will be initiated. One will be eliminated. The six potential initiates will fight to survive the next year of their lives, and if they can prove themselves to be the best among their rivals, most of them will. Most of them. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Clinically focused, consistently and clearly illustrated, and logically organized, *Gray's Atlas of Anatomy*, the companion resource to the popular *Gray's Anatomy for Students*, presents a vivid, visual depiction of anatomical structures. Stunning illustrations demonstrate the correlation of structures with clinical images and surface anatomy - essential for proper identification in the dissection lab and successful preparation for course exams. Build on your existing anatomy knowledge with structures presented from a superficial to deep orientation, representing a logical progression through the body. Identify the various anatomical structures of the body and better understand their relationships to each other with the visual guidance of nearly 1,000 exquisitely illustrated anatomical figures. Visualize the clinical correlation between anatomical structures and surface landmarks with surface anatomy photographs overlaid with anatomical drawings. Recognize anatomical structures as they present in practice through more than 270 clinical images - including laparoscopic, radiologic, surgical, ophthalmoscopic, otoscopic, and other clinical views - placed adjacent to anatomic artwork for side-by-side comparison. Gain a more complete understanding of the inguinal region in women through a brand-new, large-format illustration, as well as new imaging figures that reflect anatomy as viewed in the modern clinical setting. Evolve Instructor site with an image and video collection is available to instructors through their Elsevier sales rep or via request at <https://evolve.elsevier.com>.

Trauma is a leading cause of death and disability around the world, and the leading cause of death in those aged under forty-five years. Conditions such as airway obstruction, hemorrhage, pneumothorax, tamponade, bowel rupture, vascular injury, and pelvic fracture can cause death if not appropriately diagnosed and managed. This essential book provides emergency physicians with an easy-to-use reference and source for traumatic injury evaluation and management in the Emergency Department. It covers approaches to common, life-threatening, and traumatic diseases in the Emergency Department, for use on shift and as a reference for further learning. Each chapter includes a succinct overview of common traumatic injuries, with evaluation and management pearls and pitfalls. Highly illustrated with images from one of the busiest trauma centers in the US, and featuring expert contributions from a diverse set of attending physicians, this is an essential text for all emergency medicine practitioners.

#1 NEW YORK TIMES BESTSELLER • In her latest book, Brené Brown writes, "If we want to find the way back to ourselves and one another, we need language and the grounded confidence to both tell our stories and be stewards of the stories that we hear. This is the framework for meaningful connection." In *Atlas of the Heart*, Brown takes us on a journey through eighty-seven of the emotions and experiences that define what it means to be human. As she maps the necessary skills and an actionable framework for meaningful connection, she gives us the language and tools to access a universe of new choices and second chances—a universe where we can share and steward the stories of our bravest and most heartbreaking moments with one another in a way that builds connection. Over the past two decades, Brown's extensive research into the experiences that make us who we are has shaped the cultural conversation and helped define what it means to be courageous with our lives. *Atlas of the Heart* draws on this research, as well as on Brown's singular skills as a storyteller, to show us how accurately naming an experience doesn't give the experience more power—it gives us the power of understanding, meaning, and choice. Brown shares, "I want this book to be an atlas for all of us, because I believe that, with an adventurous heart and the right maps, we can travel anywhere and never fear losing ourselves."

**The Mouse Brain in Stereotaxic Coordinates** Nam H Nguyen

This book, the third in the InTech Tsunami series, has been published in order to deepen efforts towards the understanding of tsunami dynamics that seems to be never enough. As the previous books in this series, "The Tsunami Threat - Research and Technology" (January 2011) and "Tsunami - A Growing Disaster" (December 2011), this multi-disciplinary volume compiles a collection of scientific papers showing the state-of-the-art of tsunami research at different levels. The various contributions cover an array of themes that span from geological evidence to post-trauma human care, encompassing pre-tsunami analyses and modeling to post-tsunami management and preparedness techniques. As its counterparts, "Tsunami - Analysis of a Hazard: from physical interpretation to human impact" continues to present evidence and case studies from different regions of the World: from the isolated Hawaiian Islands and Northern Indian Ocean, to the edges of the Atlantic and Eastern Mediterranean.

**Monthly Statistics of the Foreign Trade of India** Pustaka Al-Kautsar

**Andean Structural Styles: A Seismic Atlas** is a comprehensive reference illustrating the variability in structural styles and hydrocarbon traps that exist in the Andean chain. The Andean chain, stretching over more than 5,000 km (3,000 mi) from Venezuela to Argentina, contains a large number of sedimentary basins which have developed in a wide range of tectonic settings. Some of these basins are highly mature, with hydrocarbon production from Paleozoic, Mesozoic, and Cenozoic sedimentary sequences, while others are still underexplored. **Andean Structural Styles: A Seismic Atlas** covers topics including fold types, thrust faults, triangle zones, inversion structures, synorogenic deposits, and growth stratal geometries. These topics are illustrated by thirty-two seismic examples interpreted and uninterpreted, covering most of the Andean basins, and five chapters reviewing the structural styles of the Andes, the complexity of processing seismic in these settings, how analogue models help in the interpretation, and several outcrop analogues. This reference is invaluable to both hydrocarbon exploration of the Andes and researchers and students in the fields of exploration geology and structural geology. Also, those teaching structural geology and seismic interpretation will find a valuable resource with lots of uninterpreted seismic examples that can be used in their lectures. Includes a vast collection of high-quality, color images Features case studies covering the entirety of the Andes Mountain chain Presents high-quality seismic data that was previously only available to oil companies

Buku ini berisi pemikiran Prof. Dr. David S Perdanakusuma, dr., SpBP-RE(K) sebagai sivitas akademika yang mempunyai harapan akan berjayanya Fakultas Kedokteran Universitas Airlangga untuk waktu kedepan ini. Prof. Dr. David S Perdanakusuma, dr., SpBP-RE(K) yakin bahwa harapan tersebut adalah harapan kita bersama. Harapan tersebut akan terwujud dengan adanya kebersamaan yang dibarengi dengan semangat yang tinggi, akan mampu mengubah harapan menjadi kenyataan. Diperlukan integritas, antusiasme, totalitas, solid, cepat, cerdas, mimpi, fokus, dan aksi untuk menjadi terbaik, bintang, dan pemenang. Saat ini adalah momentum yang sangat tepat untuk meraih kejayaan Fakultas Kedokteran Universitas Airlangga, kita berada dalam rentang 100 tahun pendidikan dokter dan 100 tahun kemerdekaan Indonesia. Didalam rentang waktu inilah generasi emas di Fakultas Kedokteran Universitas Airlangga akan dididik dan dilahirkan untuk menjadi generasi hebat kebanggaan almamater kita. Pemikiran dalam buku ini adalah gambaran perencanaan saya untuk mengelola Fakultas Kedokteran Universitas Airlangga tahun 2015-2020. Diharapkan secara bersama dengan seluruh komponen sivitas akademika Fakultas Kedokteran Universitas Airlangga dapat membangun dan mengembangkan institusi yang kita cintai menjadi yang terbaik.

The Fifth Edition of Gass' *Atlas of Macular Diseases*, by Dr. Anita Agarwal, provides expert diagnostic guidance on macular disorders and quickly brings you up to date on this evolving specialty. Using a case-based approach, it richly depicts a full range of retina and macular diseases, including new

infectious, degenerative, and dystrophic conditions. Take advantage of the latest imaging technologies to identify common and rare disorders, and confirm difficult diagnoses with the aid of more than 5,500 high-quality images. Rely on the same unique, richly illustrated case-descriptive format-encompassing history, clinical examination, and follow-up-that popularized the original book by the late Dr. Donald Gass, the famed ophthalmologist whose clinical expertise set new standards in macular diagnosis. Get expert diagnostic guidance under the new authorship of Dr. Anita Agarwal, a protégé of Dr. Gass who has compiled the ultimate collection of images and hard-to-find case studies from around the world. Visualize the conditions you're likely to see in practice and confirm your diagnoses by comparing your clinical findings to more than 5,500 images and illustrations (over 3,500 in full color). Obtain thorough advice on imaging and recognition of a full range of common and rare macular diseases using the latest approaches including fluorescein angiography, optical coherence tomography (OCT), indocyanine green (ICG), and fundus autofluorescence.

The *Mouse Brain in Stereotaxic Coordinates*, Second Edition has been the acknowledged reference in this field since the publication of the first edition, and is now available in a Compact Edition. This will provide a more affordable option for students, as well as researchers needing an additional lab atlas. This version includes the coronal diagrams delineating the entire brain as well as the introductory text from the Deluxe edition. It is an essential reference for anyone studying the mouse brain or related species. \* Includes 100 detailed diagrams of the coronal set delineating the entire mouse brain \* Compact edition of the most comprehensive and accurate mouse brain atlas available \* Contains minor updates and revisions from the full edition

**Andean Structural Styles** Elex Media Komputindo

Though a large number of Indians have excelled academically the world over they constitute a miniscule fraction of Indians who have the potential to do equally well or better. This book introspects on the educational system in India. The author discusses the challenges faced by schools, teachers and Principals. The responsibilities of the management and the parents are addressed. The challenges of overcrowded class rooms, lack of infrastructure and absence of sensitive attention to students and dismissal of genuine complaints of students are discussed. People engaged in imparting school education are persuaded by the author to accord top priority to students' welfare in a sustained manner. The author narrates many anecdotes drawn from experience to illustrate the ailments afflicting our schools. The book is not merely a compilation of the challenges faced by our students, teachers and Principals. Some possible solutions are also suggested. Children deserve the best education whatever be their social background. The focus of the book is on children and entirely on children. The book is dedicated to the student community, the future of our country.
