NEAL STEPHENS

Java Pearson Education

Summary: "Written for programmers with a background in high level language programming, the book applies the Deitel signature live code approach to teaching programming and explores the Java language in depth ... "

Java How to Program, Late Objects, Global Edition Prentice Hall

The professional programmer's Deitel® guide to Python® with introductory artificial intelligence case studies Written for programmers with a background in another high-level language, Python for Programmers uses hands-on instruction to teach today's most compelling, leading-edge computing technologies and

programming in Python—one of the world's most popular and fastest-growing languages. Please read the Table of Contents diagram inside the front cover and the Preface for more details. In the context of 500+, real-world examples ranging from individual snippets to 40 large scripts and full implementation case studies, you'll use the interactive IPython interpreter with code in Jupyter Notebooks to quickly master the latest Python coding idioms. After covering Python Chapters 1-5 and a few key parts of Chapters 6-7, you'll be able to handle significant portions of the hands-on introductory AI case studies in Chapters 11-16, which are loaded with cool, powerful, contemporary examples. These include natural language processing, data mining Twitter® for sentiment analysis, cognitive computing with IBM® Watson™, supervised machine learning with classification and regression,

unsupervised machine learning with clustering, computer vision through deep learning and convolutional neural networks, deep learning with recurrent neural networks, big data with Hadoop®, Spark™ and NoSQL databases, the Internet of Things and more. You'll also work directly or indirectly with cloud-based services, including Twitter, Google Translate™, IBM Watson, Microsoft® Azure®, OpenMapQuest, PubNub and more. Features 500+ hands-on, real-world, live-code examples from snippets to case studies IPython + code in Jupyter® Notebooks Library-focused: Uses Python Standard Library and data science libraries to accomplish significant tasks with minimal code Rich Python coverage: Control statements, functions, strings, files, JSON serialization, CSV, exceptions Procedural, functional-style and object-oriented programming Collections: Lists,

tuples, dictionaries, sets, NumPy arrays, pandas Series & DataFrames Static, dynamic and interactive visualizations Data experiences with real-world datasets and data sources Intro to Data Science sections: AI, basic stats, simulation, animation, random variables, data wrangling, regression AI, big data and cloud data science case studies: NLP, data mining Twitter®, IBM® Watson™, machine learning, deep learning, computer vision, Hadoop®, Spark™, NoSQL, IoT Open-source libraries: NumPy, pandas, Matplotlib, Seaborn, Folium, SciPy, NLTK, TextBlob, spaCy, Textatistic, Tweepy, scikit-learn®, Keras and more Accompanying code examples are available here:

Java How to Program Pearson Education India

This special edition of Java How to Program is up-to-date with the Java 2 Platform Standard Edition 1.5. It covers fundamental programming topics and provides several extra chapters so readers can include or omit material as needed. Includes Recursion and Searching and Sorting chapters. Provides extensive complete programming exercises plus "What does this program do?", "What's wrong with this program?", "Complete the program" and "Modify the program" exercises. Covers text-file processing. Features coverage of special topics, such as pre- and postconditions, invariants, testing and debugging, ethics and software engineering. Includes a CD-ROM with every copy of the book that contains: (subject to change) Java™ 2 Platform, Standard Edition 1.5; Netbeans; JCreator LE; jEdit; jGRASP; Bluej; Source code for all the book's examples; Hyperlinks to valuable Java™ demos and Internet resources. A useful brief reference for programmers or anyone who wants to learn more about the Java programming language.

Small Java Pearson Higher Ed

The professional programmer's Deitel® guide to Java® 9 and the powerful Java platform Written for programmers with a background in another high-level language, this book applies the Deitel signature live-code approach to teaching programming and explores the Java® 9 language and APIs in depth. The book presents concepts in fully tested programs, complete with code

walkthroughs, syntax shading, code highlighting and program outputs. It features hundreds of complete Java 9 programs with thousands of lines of proven code, and hundreds of software-development tips that will help you build robust applications. Start with an introduction to Java using an early classes and objects approach, then rapidly move on to more advanced topics, including JavaFX GUI, graphics, animation and video, exception handling, lambdas, streams, functional interfaces, object serialization, concurrency, generics, generic collections, database with JDBC™ and JPA, and compelling new Java 9 features, such as the Java Platform Module System, interactive Java with JShell (for discovery, experimentation and rapid prototyping) and more. You'll enjoy the Deitels' classic treatment of object-oriented programming and the object-oriented design ATM case study, including a complete Java implementation. When you're finished, you'll have everything you need to build industrial-strength, object-oriented Java 9 applications. New Java® 9 Features Java® 9's Platform Module System Interactive Java via JShell—Java 9's REPL Collection Factory Methods, Matcher Methods, Stream Methods, JavaFX Updates, Using Modules in JShell, Completable Future Updates, Security Enhancements, Private Interface Methods and many other language and API updates. Core Java Features Classes, Objects, Encapsulation, Inheritance, Polymorphism, Interfaces Composition vs. Inheritance, "Programming to an Interface not an Implementation" Lambdas, Sequential and Parallel Streams, Functional Interfaces with Default and Static Methods, Immutability JavaFX GUI, 2D and 3D Graphics, Animation, Video, CSS, Scene Builder Files, I/O Streams, XML Serialization Concurrency for Optimal Multi-Core Performance, JavaFX Concurrency APIs Generics and Generic Collections Recursion, Database (JDBC™ and JPA) Keep in Touch Contact the authors at: deitel@deitel.com Join the Deitel social media communities LinkedIn® at bit.ly/DeitelLinkedIn Facebook® at facebook.com/DeitelFan Twitter® at twitter.com/deitel YouTube™ at youtube.com/DeitelTV Subscribe to the Deitel® Buzz e-mail newsletter at www.deitel.com/newsletter/subscribe.html For source code and updates, visit: www.deitel.com/books/Java9FP *Java: The Complete Reference, Twelfth Edition* Pearson Higher Ed Develop the next killer Android App using Java programming! Android is everywhere! It runs more than half the smartphones in

the U.S.—and Java makes it go. If you want to cash in on its popularity by learning to build Android apps with Java, all the easy-to-follow guidance you need to get started is at your fingertips. Inside, you'll learn the basics of Java and grasp how it works with Android; then, you'll go on to create your first real, working application. How cool is that? The demand for Android apps isn't showing any signs of slowing, but if you're a mobile developer who wants to get in on the action, it's vital that you get the necessary Java background to be a success. With the help of Java Programming for Android Developers For Dummies, you'll quickly and painlessly discover the ins and outs of using Java to create groundbreaking Android apps—no prior knowledge or experience required! Get the know-how to create an Android program from the ground up Make sense of basic Java development concepts and techniques Develop the skills to handle programming challenges Find out how to debug your app Don't sit back and watch other developers release apps that bring in the bucks! Everything you need to create that next killer Android app is just a page away!

Students, if interested in purchasing the physical print text with MyProgrammingLab, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. If you would like to purchase both the physical text and MyProgrammingLab, search for: ISBN-10: 0133813436 / ISBN-13: 9780133813432 Java How to Program, Early Objects Plus MyProgrammingLab with Pearson eText -- Access Card Package, 10/e. This package consists of: ISBN-10: 0133807800 / ISBN-13: 9780133807806 Java How to Program, Early Objects, 10/e ISBN-10: 0133811905 / ISBN-13: 9780133811902 MyProgrammingLab with Pearson eText -- Access Card -- for Java How to Program, Early Objects Java How to Program (Early Objects), Tenth Edition is intended for use in the Java programming course. It also serves as a useful reference and self-study tutorial to Java programming. The Deitels' groundbreaking How to Program series offers unparalleled breadth and depth of object-oriented programming concepts and intermediate-level topics for further study. Java How to Program (Early Objects), Tenth Edition, teaches

programming by presenting the concepts in the context of full working programs and takes an early-objects approach Also Available with MyProgrammingLab MyProgrammingLab for Java How to Program (Early Objects) is a total learning package. MyProgrammingLab is an online homework, tutorial, and assessment program that truly engages students in learning. It helps students better prepare for class, quizzes, and exams—resulting in better performance in the course—and provides educators a dynamic set of tools for gauging individual and class progress.

The book presents the concepts in the context of fully tested programs, complete with syntax shading, code highlighting, line-by-line code descriptions and program outputs. The book features 220 Java applications with over 18,000 lines of proven Java code, and hundreds of tips that will help you build robust applications. Start with an introduction to Java using an early classes and objects approach, then rapidly move on to more advanced topics, including GUI, graphics, exception handling, generics, collections, JDBC™, web-application development with

JavaServer™ Faces, web services and more. You'll enjoy the Deitels' classic treatment of object-oriented programming and the OOD/UML® ATM case study, including a complete Java implementation. When you're finished, you'll have everything you need to build object-oriented Java applications. The DEITEL® Developer Series is designed for practicing programmers. The series presents focused treatments of emerging technologies, including Java™, C++, .NET, web services, Internet and web development and more. PRE-PUBLICATION REVIEWER TESTIMONIALS "Presenting software engineering side by side with core Java concepts is highly refreshing; gives readers insight into how professional software is developed."—Clark Richey (Java Champion), RABA Technologies, LLC. "The quality of the design and code examples is second to none!"—Terrell Hull, Enterprise Architect "The JDBC chapter is very hands on. I like the fact that Java DB/Apache Derby is used in the examples, which makes it really simple to learn and understand JDBC."—Sandeep Konchady, Sun Microsystems "Equips you with the latest web application technologies. Examples are impressive and real! Want to develop a simple address locator with Ajax and JSF? Jump to Chapter 22."—Vadiraj Deshpande, Sun Microsystems "Covers web services with Java SE 6 and Java EE 5 in a real-life, example-based, friendly approach. The Deitel Web Services Resource Center is really good, even for advanced developers."—Sanjay Dhamankar, Sun Microsystems "Mandatory book for any serious Java EE developer looking for improved productivity: JSF development, visual web development and web services development have never been easier."—Ludovic Chapenois, Sun Microsystems "I teach Java programming and object-oriented analysis and design. The OOD/UML 2 case study is the best presentation of the ATM example I have seen."—Craig W. Slinkman, University of Texas-Arlington "Introduces OOP and UML 2 early. The conceptual level is perfect. No other book comes close to its quality of organization and presentation. The live-code approach to presenting exemplary code makes a big difference in the learning outcome."—Walt Bunch, Chapman University/

An Introduction to Programming and Computing Pearson Education Accompanying CD-ROM contains Java 2 SDK standard edition, 1.3.1, Java Media Framework API 2.1.1, Forte for Java, release 2.0, Community ed., Java Plug-in HTML converter 1.3.

with Big Data and Artificial Intelligence Case Studies Prentice Hall JAVA Programming introduces the subject in a simple and lucid style. This book explains programming concepts and software development practices for solving problems in a clear and precise manner. Every chapter of the book is supported with a wide variety of solved examples and end-of-chapter exercises to help students master this subject. **Simply Java Programming** Prentice Hall Combining the Deitel™ signature Live-Code™ Approach with a new Application-Driven™ methodology, this book uses a step-by-step tutorial approach to begin teaching the basics of programming, builds upon previously learned concepts, and introduces new programming features in each successive tutorial. KEY TOPICS This comprehensive introduction to Java covers GUI design, swing components, methods, classes, data types, control statements, arrays, object-oriented programming, strings and characters, sequential files and more. It also includes higher-end topics such as database programming, multimedia and graphics, and Web applications development. For individuals beginning their mastery of Java Programming. **How to Program** John Wiley & Sons Introducing Java at an beginning programming level, this book covers good programming practices, syntax, and object-oriented techniques. It explains how to use Java to access members and classes, initialize class objects, understand data abstraction, and more. The text teaches concepts through "Live Code" example. **Java How to Program** Pearson UK \$2K worth of live expert Java training for just \$99.99! **JAVA Programming** Prentice Hall REVEL for Deitel "Java How to Program, " Tenth Edition delivers a digital immersive learning experience that seamlessly integrates author content and pedagogy with dynamic and interactive coding activities and assignable/gradable homework. Animated code listings and detailed video tutorials bring course concepts to life for your students. Fully digital and highly engaging, REVEL for Deitel "Java How to Program " offers an immersive learning experience designed for the way today's students read, think, and learn. Enlivening course content with video and assessments, REVEL empowers educators to increase engagement with the course, and to better connect with students. NOTE REVEL is a fully digital delivery of Pearson content. This ISBN is for the standalone REVEL access card. In

addition to this access card, you will need a course invite link, provided by your instructor, to register for and use REVEL. "Java JavaHow to ProgramIntroducing Java at an beginning programming level, this book covers good programming practices, syntax, and object-oriented techniques. It explains how to use Java to access members and classes, initialize class objects, understand data abstraction, and more. The text teaches concepts through "Live Code" example.JavaHow to ProgramThe Deitels' groundbreaking How to Program series offers unparalleled breadth and depth of object-oriented programming concepts and intermediate-level topics for further study. This survey of Java programming contains an extensive OOD/UML 2 case study on developing an automated teller machine. The Seventh Edition has been extensively fine-tuned and is completely up-to-date with Sun Microsystems, Inc.'s latest Java release--Java Standard Edition (Java SE) 6.JavaHow to Program H.M. Deitel's name appears on the earlier editions.

How to Program Pearson Education
For courses in computer programming C How to Program is a comprehensive introduction to programming in C. Like other texts of the Deitels' How to Program series, the book serves as a detailed beginner source of information for college students looking to embark on a career in coding, or instructors and software-development professionals seeking to learn how to program with C. The Eighth Edition continues the tradition of the signature Deitel "Live Code" approach--presenting concepts in the context of full-working programs rather than incomplete snips of code. This gives readers a chance to run each program as they study it and see how their learning applies to real world programming scenarios.

[Java for Programmers](#) Pearson P T R
JavaHow to Program

Java How To Program (Early Objects)
Pearson Education
For a wide variety of Web Programming, HTML, and JavaScript courses found in Computer Science, CIS, MIS, IT, Business, Engineering, and Continuing Education departments. Also appropriate for an introductory programming course (replacing traditional programming languages like C, C++ and Java) for schools wanting to integrate the Internet

and World Wide Web into their curricula. The revision of this groundbreaking book in the Deitels'How to Program series offers a thorough treatment of programming concepts, with programs that yield visible or audible results in Web pages and Web-based applications. The book discusses effective Web-page design, server- and client-side scripting, ActiveX(R) controls and the essentials of electronic commerce. Internet & World Wide Web How to Program also offers an alternative to traditional introductory programming courses. The fundamentals of programming no longer have to be taught in languages like C, C++ and Java. With Internet/Web markup languages (such as HTML, Dynamic HTML and XML) and scripting languages (such as JavaScript(R), VBScript(R) and Perl/CGI), you can teach the fundamentals of programming wrapped in the Web-page metaphor. Prentice Hall

This book looks at the exciting world of advanced programming concepts with the three major Java platforms - Java 2 Enterprise Edition (J2EE), Java 2 Standard Edition (J2SE) and Java 2 Micro Edition (J2ME).

[Java for Programmers](#) Prentice Hall
This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. The Deitels' groundbreaking How to Program series offers unparalleled breadth and depth of object-oriented programming concepts and intermediate-level topics for further study. This survey of Java programming contains an optional extensive OOD/UML 2 case study on developing and implementing the software for an automated teller machine. The Eighth Edition of this acclaimed text is now current with the Java SE 6 updates that have occurred since the book was last published. The Late Objects Version delays coverage of class development until Chapter 8, presenting the control structures, methods and arrays material in a non-object-oriented, procedural programming context.

[Java](#) MIT Press

For courses in Java programming Unparalleled breadth and depth of object-oriented programming concepts. The Deitels' groundbreaking How to Program series offers unparalleled breadth and

depth of programming fundamentals, object-oriented programming concepts and intermediate-level topics for further study. Java How to Program, Early Objects, 11th Edition, presents leading-edge computing technologies using the Deitel signature live-code approach, which demonstrates concepts in hundreds of complete working programs. The 11th Edition presents updated coverage of Java SE 8 and new Java SE 9 capabilities, including JShell, the Java Module System, and other key Java 9 topics. [Java How to Program, Late Objects, 11th Edition also is available.] Also Available with MyLab Programming. MyLab Programming is an online learning system designed to engage students and improve results. MyLab Programming consists of a set of programming exercises correlated to the programming concepts in this book. Through hundreds of practice problems, the system automatically detects errors in the logic and syntax of their code submissions and offers targeted hints that enable students to figure out what went wrong - and why. MyLab Programming improves the programming competence of beginning students who often struggle with the basic concepts and paradigms of popular high-level programming languages. For instructors, a comprehensive gradebook tracks correct and incorrect answers and stores the code inputted by students for review. Note: You are purchasing a standalone product; MyLab & Mastering does not come packaged with this content. Students, if interested in purchasing this title with MyLab & Mastering, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. If you would like to purchase both the physical text and MyLab & Mastering, search for: 0134800273 / 9780134800271 Java How to Program, Early Objects Plus MyLab Programming with Pearson eText -- Access Card Package, 11/e Package consists of: 0134743350 / 9780134743356 Java How to Program, Early Objects 0134752120 / 9780134752129 MyLab Programming with Pearson eText -- Access Code Card -- for Java How to Program, Early Objects Students can use the URL and phone number below to help answer their questions:
