 The history of the post office involves many of the most significant themes in the social, economic and political history of Britain. Daunton traces the development of the post office as an institution and as a business in the 19th and 20th centuries and places the debates surrounding its history, performances and failings in a longer historical perspective and in the broader context of British national history.

Jointly, the World Bank and the Government of Albania undertook an assessment of poverty, conducted in a qualitative manner, to gain information that could guide policy development and resource allocation. The research was conducted through a series of focus groups, interviews, and surveys that permitted community members in ten areas within Albania, to define poverty in their own terms. During the ten years of reform, Albania has been buffeted by set backs which led fully 40% of respondents to indicate that socioeconomic conditions have worsened during that period. While informal coping mechanisms have been developed in many communities, these are under stress and threaten to give way. The study suggests that a poverty reduction strategy must, at the very least, include improvements in government management, employment opportunities, provision of social services, infrastructure development, and public security.

Boards and business leaders expect their key advisors to deliver fresh insights, and increasingly expect them to demonstrate foresight. To achieve what is expected, it is crucial to understand the dynamics of conversations in the boardroom and around the audit committee table. This book provides those unique perspectives. The journey from the 'mailroom to the boardroom' follows the story of a young banker who moved into the internal auditing profession as part of the 'new breed', then rose through the ranks into senior leadership and chief audit executive roles, before assuming audit committee and board roles that had an immense influence on governance, risk, compliance, and audit professionals. Success does not always follow a smooth and uneventful trajectory, and this story reflects insights from both the ups and the downs of the journey. Each chapter shares insights, better practices, case studies, practical examples, and real-life challenges and draws them together into 101 building blocks, each one providing crucial career-long learnings. The storytelling provides insights to people at all levels on the importance of positioning oneself to step into leadership roles, helps them understand how to evaluate and pursue potential career growth opportunities, provides tips on how to holistically manage and advance their career, and inspires higher-level thinking that enhances governance, risk, compliance and audit practices.

The series Public Administration in Asia provides a periodically updatable resource that examines the public administrations of Asian countries looking at all the factors involved in the formulation of public policies. The Hong Kong civil service has experienced considerable change since the retrocession to China in 1997. The new political order has attempted to exert more control over the public sector, to introduce new approaches to formulating and implementing policy, and to re-define the relationships between the government and the public. In this book, the author describes the system of public administration in this changed political context, compares the way in which it now operates with that of its colonial predecessor, and analyzes the difficulties which the new regime and the public sector has faced in meeting the challenges posed by economic recession, epidemics and the fierce debates generated by its constitutional policies.
