An Introduction to Orchestration Oxford University Press, USA  
Classical music permeates contemporary life.

Encountered in waiting rooms, movies, and hotel lobbies as much as in the concert hall, perennial orchestral favorites mingle with commercial jingles, video-game soundtracks, and the booming bass from a passing car to form the musical soundscape of our daily lives. In this provocative and groundbreaking study, Melanie Lowe explores why the public instrumental music of late-eighteenth-century Europe has remained accessible, entertaining, and distinctly pleasurable to a wide variety of listeners for over 200 years. By placing listeners at the center of interpretive activity, *Pleasure and Meaning in the Classical Symphony* offers an alternative to more traditional composer- and score-oriented approaches to meaning in the symphonies of Haydn and Mozart. Drawing from the aesthetics of the Enlightenment, the politics of entertainment, and postmodern notions of pleasure, Lowe posits

that the listener's pleasure stems from control over musical meaning. She then explores the widely varying meanings eighteenth-century listeners of different social classes may have constructed during their first and likely only hearing of a work. The methodologies she employs are as varied as her sources -- from musical analysis to the imaginings of three hypothetical listeners. Lowe also explores similarities between the position of the classical symphony in its own time and its position in contemporary American consumer culture. By considering the meanings the mainstream and largely middle-class American public may construct alongside those heard by today's more elite listeners, she reveals the great polysemic potential of this music within our current cultural marketplace. She suggests that we embrace "crosstalk" between performances of this music and its myriad uses in film, television, and other mediated contexts to recover the pleasure of listening to this repertory. In so doing, we surprisingly regain

something of the classical symphony's historical ways of meaning.

**Musical Knowledge from Plato to John Cage** Routledge

This volume explores twentieth-century organ music through in-depth studies of the principal centers of composition, the most significant composers and their works, and the evolving role of the instrument and its music. The twentieth-century was a time of unprecedented change for organ music, not only in its composition and performance but also in the standards of instrument design and building. Organ music was anything but immune to the complex musical, intellectual, and socio-political climate of the time. *Twentieth-Century Organ Music* examines the organ's repertory from the entire period, contextualizing it against the background of important social and cultural trends. In a collection of twelve essays, experienced scholars survey the dominant geographic centers of organ music (France, the Netherlands, Scandinavia, the United States, and German-speaking countries) and investigate the composers

who made important contributions to the repertory (Reger in Germany, Messiaen in France, Ligeti in Eastern and Central Europe, Howells in Great Britain). Twentieth-Century Organ Music provides a fresh vantage point from which to view one of the twentieth century's most diverse and engaging musical spheres.

*Listening to Stanley Kubrick* PediaPress  
In *Listening to Stanley Kubrick*, Christine Gengaro provides an in-depth exploration of the music that was composed for Stanley Kubrick's films and places the preexistent music he utilized into historical context. This book offers a thoroughly researched examination into the musical elements of one of cinema's most brilliant artists."

Conducting and Rehearsing the Instrumental Music

Ensemble is the most comprehensive guide on the rehearsal process for conducting instrumental music ensembles. Ideal for the advanced instrumental music conductor seeking to look beyond basic conducting technique, this work breaks the multidimensional activity of working with an ensemble, orchestra, or band into its constituent components. Advanced students of conducting will find within the full range of conducting activities: • Chapters on the infrastructure of the rehearsal, the rehearsal environment, 10 rehearsal essentials, score study, music imagery, inner singing, and rehearsal procedures (with an emphasis on an integrated approach to rehearsing) • The technical priorities of intonation and tuning, rhythm patterns, ensemble sonority (tone, balance, blend, color and texture), and articulation • The musical priorities of tempo and ensemble precision, phrasing and the musical line, style and interpretation, dynamics and musical expression • Emphasizing the expectations of 21st-century conductors, the challenges of conducting

and rehearsing contemporary music, preparing conductor profiles and self-evaluations, and moving from the rehearsal process to concert performance *Conducting and Rehearsing the Instrumental Music Ensemble* is a great resource for teachers and students of conducting, as well as current conductors wishing to further hone their skills.

Wayne State University Press  
*Endangering Science Fiction* Film explores the ways in which science fiction film is a dangerous and endangering genre. The collection argues that science fiction's cinematic power rests in its ability to imagine 'Other' worlds that challenge and disturb the lived conditions of the 'real' world, as it is presently known to us. From classic films such as *2001: A Space Odyssey* and *Solaris* to modern blockbusters including *World War Z* and *Gravity*, and directors from David Cronenberg to Alfonso Cuarón, contributors comment on the way science fiction film engages with dangerous encounters, liminal experiences, sublime

aesthetics, and untethers space and time to question the very nature of human existence. With the analysis of a diverse range of films from Europe, Asia, North and South America, *Endangering Science Fiction Film* offers a uniquely interdisciplinary view of the evolving and dangerous sentiments and sensibility of this genre.

McFarland

(Schott). Flute, oboe, clarinet, bass clarinet, horn, tenor trombone, harpsichord, piano, celesta, 2 violins, viola, violoncello, double bass.

**A Musicology for Landscape** Routledge  
Modernism and Coherence is an attempt to develop a negative aesthetics conceived as determinate resistance of artworks against the meaning assigned to them by criticism. From the accumulation of arguments on great texts of modernism, the book describes gestures of refusal that generate figures of negativity: Adorno's *Aesthetic Theory* becomes a whirlpool revolving around a center refusing predication; Wallace Stevens' poetry exhibits a phonetic escape valve against the

pressure of reality; Robert Frost writes a poem that is ahead of you in both senses of the expression; and James Joyce's *Ulysses* reads its readers in waves of self-folding. This book is an effort to salvage literature as something in itself in a world that increasingly can only see what is for the other.

**Four Chapters of a Negative Aesthetics**

Scarecrow Press

Demonstrating not only how to write for orchestra but also how to understand and enjoy a score, *The Cambridge Guide to Orchestration* is a theoretical and practical guide to instrumentation and orchestration for scholars, professionals and enthusiasts. With detailed information on all the instruments of the orchestra, both past and present, it combines discussion of both traditional and modern playing techniques to give the most complete overview of the subject. It contains fifty reduced scores to be re-orchestrated and a wide range of exercises, which clarify complex subjects such as multiple stops on stringed instruments, harmonics and trombone glissandi. Systematic analysis reveals the orchestration techniques

used in original scores, including seven twentieth-century compositions. This Guide also includes tables and lists for quick reference, providing the ranges of commonly used instruments and the musical names and terminology used in English, German, Italian and French.

*Endangering Science Fiction Film* Rowman & Littlefield

How do musical analysis and performance relate? In a unique collaborative approach to this question, theorist-pianist Daphne Leong partners with internationally renowned performers to interpret twentieth-century repertoire. Imaginative explorations of music by Ravel, Schoenberg, Bartók, Schnittke, Milhaud, Messiaen, Babbitt, Carter, and Morris illuminate focal issues such as the role of embodiment, the affordances of a score, the cultural understanding of notation, the use of metaphor, and--to round out the viewpoints of theorist and performers with those of composer and listeners--the role of structure in audience reception. Each exploration engages deeply with musical structure, redefined to

encompass the creative activity of composers, performers, analysts, and listeners. Performances, demonstrations, and interviews online complement the book's written text; practical application and pedagogical guidance round out theoretical and analytical content. The collaborations themselves demonstrate different dimensions of knowledge at the intersection of analysis and performance, and illustrate Leong's theory of the things and people that facilitate cross-disciplinary collaboration in music. They also exemplify the antagonisms and synergies that emerge when theorists and performers meet. Both flexibly and rigorously conceived, *Performing Knowledge* is a brave crossing of disciplinary divides between scholarship and practice, a work of analysis shaped by the voices of performers.

Peter Lang  
*Twenty Israeli Composers*, the first published collection of interviews with Israeli composers, explores this developing and distinctive music culture.

[The Musical Times](#) Oxford University Press, USA

Over three decades, Paul Griffiths's survey has remained the definitive study of music since the Second World War; this fully revised and updated edition re-establishes *Modern Music and After* as the preeminent introduction to the music of our time. The disruptions of the war, and the struggles of the ensuing peace, were reflected in the music of the time: in Pierre Boulez's radical reformation of compositional technique and in John Cage's development of zen music; in Milton Babbitt's settling of the serial system and in Dmitry Shostakovich's unsettling symphonies; in Karlheinz Stockhausen's development of electronic music and in Luigi Nono's pursuit of the universally human, in Iannis Xenakis's view of music as sounding mathematics and in Luciano Berio's consideration of it as language. The initiatives of these composers and their contemporaries opened prospects that haven't yet stopped unfolding. This constant expansion of musical thinking since 1945 has left us with no singular history of music; Griffiths's study

accordingly follows several different paths, showing how and why they converge and diverge. This new edition of *Modern Music and After* discusses not only the music of the fifteen years that have passed since the previous edition, but also the recent explosion of scholarly interest in the latter half of the twentieth century. In particular, the book has been expanded to incorporate the variety of responses to the modernist impasse experienced by composers of the 1980s and 1990s. Griffiths then moves the book into the twenty-first century as he examines such highly influential composers as Helmut Lachenmann and Salvatore Sciarrino. For its breadth, wealth of detail, and characteristic wit and clarity, the third edition of *Modern Music and After* is required reading for the student and the enquiring listener.

We'll Meet Again Oxford University Press

Ton de Leeuw was a truly groundbreaking composer. As evidenced by his pioneering study of compositional methods that melded Eastern

traditional music with Western musical theory, he had a profound understanding of the complex and often divisive history of twentieth-century music. Now his renowned chronicle *Music of the Twentieth Century* is offered here in a newly revised English-language edition. *Music of the Twentieth Century* goes beyond a historical survey with its lucid and impassioned discussion of the elements, structures, compositional principles, and terminologies of twentieth-century music. De Leeuw draws on his experience as a composer, teacher, and music scholar of non-European music traditions, including Indian, Indonesian, and Japanese music, to examine how musical innovations that developed during the twentieth century transformed musical theory, composition, and scholarly thought around the globe.

Performing Knowledge

Alfred Music

An overview of women's work in classical and popular music since 1900 as performers, composers, educators and music technologists.

The New York Avant-

Garde and Its Limits

Taylor & Francis

Unique and often startling encounters between music and the moving image in the films of Stanley Kubrick are trademarks of his style; witness the powerful effects of Strauss's "Also Sprach Zarathustra" in 2001: A Space Odyssey and of Beethoven's 9th Symphony in *A Clockwork Orange*, each excerpt vetted by Kubrick himself. *We'll Meet Again* argues that, for Kubrick, music is neither post-production afterthought nor background nor incidental, but instead is core to films' effects and meanings. The book first identifies the building blocks in Kubrick's sonic world and illuminates the ways in which Kubrick uses them to support his characters and to define character relationships. It then delves into the effects of Kubrick's signature musical techniques, including the use of texture, form, and inscription to render and reinforce psychological ideas and spectator responses. Finally it presents case studies that show how the history of the music plays a vital and dynamic role for the films. As a whole, the book locates Kubrick as a

force in music reception history by examining the relationship between his musical choices and popular culture, and reveals the foundational role of music in his filmmaking.

**Music of the Twentieth Century** Rowman &

Littlefield

Hollywood film scores underwent a supersonic transformation from the 1950s through the 1970s.

This genre-by-genre overview of film and television soundtrack music covers a period of tremendous artistic and commercial development in the medium. Film and television composers bypassed the classical tradition favored by earlier screen composers to experiment with jazz, rock, funk and avant-garde styles. This bold approach brought a rich

variety to film and television productions that often took on a life of its own through records and CDs. From Bernard Herrmann to Ennio Morricone, the composers of the "Silver Age" changed the way movie music was made, used, and heard. The book contains more than 100 promotional film stills and soundtrack cover art images.
