AWS D1. 1/D1. 1M-2010, Structural  
Welding Code -- Steel [RUSSIAN  
EDITION] Amer Welding Society  
Provides an introduction to all of the  
important topics in welding engineering.  
It covers a broad range of subjects and  
presents each topic in a relatively  
simple, easy to understand manner, with  
emphasis on the fundamental  
engineering principles. • Comprehensive  
coverage of all welding engineering  
topics • Presented in a simple, easy to  
understand format • Emphasises  
concepts and fundamental principles  
**Structural Welding Code** Amer Inst of  
Steel Construction

This specification provides the general  
welding requirements for welding  
aircraft and space hardware. It includes  
but is not limited to the fusion welding of  
aluminum-based, nickel-based, iron-  
based, cobalt-based, magnesium-based,  
and titanium-based alloys using electric  
arc and high energy beam processes.  
There are requirements for welding  
design, personnel and procedure  
qualification, inspection, and acceptance  
criteria for aerospace, support, and non-  
flight hardware. Additional requirements  
cover repair welding of existing  
hardware. A commentary for the  
specification is included.

An Introduction John Wiley & Sons  
"This code covers the welding  
requirements for any type of welded  
structure made from the commonly used  
carbon and low-alloy constructional  
steels. Clauses 1 through 8 constitute a  
body of rules for the regulation of  
welding in steel construction. There are  
eight normative and twelve informative  
annexes in this code. A Commentary of  
the code is included with the document"-

Welding Code-- Steel  
"This code covers the requirements  
associated with welding sheet steel  
having a minimum specified yield point  
no greater than 80 ksi [550 MPa]. The  
code requirements cover any welded

joint made from the commonly used structural quality low-carbon hot rolled and cold rolled sheet and strip steel with or without zinc coating (galvanized). Clause 1 includes general provisions, Clause 4 design, Clause 5 prequalification, Clause 6 qualification, Clause 7 fabrication, and Clause 8 inspection."--Title page.

#### Aws D3. 6m

This standard defines the qualification requirements to qualify welding inspectors. The qualification requirements for visual welding inspectors include experience, satisfactory completion of an examination which includes demonstrated capabilities, and proof of visual acuity. The examination tests the inspector's knowledge of welding processes, welding procedures, nondestructive examinations, destructive tests, terms, definitions, symbols, reports, welding metallurgy, related mathematics, safety, quality assurance and responsibilities. *including metal inserts and connections in reinforced concrete construction* Welding and Joining of Aerospace Materials, Second Edition, is an essential reference for engineers and designers in the aerospace, materials, welding and joining industries, as well as companies and other organizations operating in these sectors. This updated edition brings together an international team of experts with updated and new chapters on electron beam welding, friction stir welding, weld-bead cracking, and recent developments in arc welding. Highlights new trends and techniques for

aerospace materials and manufacture and repair of their components Covers many joining techniques, including riveting, composite-to-metal bonding, and diffusion bonding Contains updated coverage on recently developed welding techniques for aerospace materials  
**AWS D1. 1/D1. 1M-2008, Structural Welding Code -- Steel [in Chinese (Mandarin)]**

This code covers the requirements for welding steel reinforcing bars in most reinforced concrete applications. It contains a body of rules for regulations of welding steel reinforcing bars and provides suitable acceptance criteria for such welds.
