**Islamic Business Ethics** International Institute of Islamic Thought (IIIT)

What kind of economic policy package do Islamic teachings imply? This book seeks to answer this and other related questions.

*ICMLG2015-The 3rd International Conference on Management, Leadership and Governance* Springer

The conference committee encourages contributions on this wide range of topics through the use of a variety of rigorous approaches, including theoretical and empirical papers employing qualitative, quantitative and critical methods. Action-based research, case studies and work-in-progress/posters are enthusiastically welcomed. PhD research, proposals for roundtable discussions, practitioner contributions and product demonstrations based on the conference themes are also invited.

**Theory and Practice** IGI Global

What kind of duty do we have to try to stop other people doing

wrong? The question is intelligible in just about any culture, but few of them seek to answer it in a rigorous fashion. The most striking exception is found in the Islamic tradition, where 'commanding right' and 'forbidding wrong' is a central moral tenet already mentioned in the Koran. As an historian of Islam whose research has ranged widely over space and time, Michael Cook is well placed to interpret this complex subject. His book represents the first sustained attempt to map the history of Islamic reflection on this obligation. It covers the origins of Muslim thinking about 'forbidding wrong', the relevant doctrinal developments over the centuries, and its significance in Sunni and Shi'ite thought today. In this way the book contributes to the understanding of Islamic thought, its relevance to contemporary Islamic politics and ideology, and raises fundamental questions for the comparative study of ethics.

A Survey of Contemporary Literature ICMLG2015-The

3rd International Conference on Management, Leadership and Governance ICMLG2015

This timely new collection presents the most significant English language contributions to the literature on Islamic accounting. Including more than thirty articles by some of the most important

authors in the area, the book covers six major themes: the conceptual framework, accounting ethics and social responsibility, corporate reporting, accounting practice and zakat, auditing and the Islamic history of accounting.

**Concept and Application of Shariah for the Construction Industry** Edward Elgar Pub

Islamic economics and finance have increased in importance over the last few decades, with new Islamic financial institutions opening up and a number of important books published on the topic. This glossary, fully updated and revised for the new edition, uses easy to understand language to introduce terms used by Muslim scholars, historians and legal experts. The book covers terms from Arabic, Urdu, Turkish, Malaysian and English sources whilst covering the Islamic side of such terms as taxation, banking, insurance, accounting, and auditing. The book's unassuming yet comprehensive nature will appeal to economists, bankers and accountants as well as students and researchers with an interest in economics and finance.

**Ethnicity, Democracy, and Development** Seven Stories Press

Since the financial crisis of 2007/2008, a renewed discussion on the ethics and finance is being examined from different dimensions – finance for good society, responsible finance, ethical finance, financial crimes, and financial repression. The principal objective of this Handbook on Ethics of Islamic Economics and Finance is to provide a deeper understanding of the ethical underpinning of Islamic economics and finance. The reader will notice that the Handbook reflects a diversity of views on the subject of economic and business ethics in Islam across the intellectual spectrum of Muslim thought over the globe. Handbook attempts to find answers to some questions concerning the definition and characteristics of the ethical system in Islam. What is its goal and how do its rules and practices ensure welfare for individuals and society? Are the moral principles universal and invariable or do they change and adapt with the social changes of communities and progress in science and technology? Is the present generation accountable for the welfare of future generations? Where is the boundary between law and ethics and who guarantees their adoption and implementation?

**Comparative International Context** International Institute of Islamic Thought (IIIT)

In this pioneering work Siraj Sait and Hilary Lim address Islamic property and land rights, drawing on a range of socio-historical, classical and contemporary resources. They address the significance of Islamic theories of property and Islamic land tenure regimes on the 'webs of tenure' prevalent in the Muslim societies. They consider the possibility of using Islamic legal and human rights systems for the development of inclusive, pro-poor approaches to land rights. They also focus on Muslim women's rights to property and inheritance systems. Engaging with institutions such as the Islamic endowment (waqf) and principles of Islamic microfinance, they test the workability of 'authentic' Islamic proposals. Located in human rights as well as Islamic debates, this study offers a well researched and constructive appraisal of property and land rights in the Muslim world.

**The Institution of the Hisba** International Institute of Islamic Thought (IIIT)

The contemporary economic systems have failed to solve the economic problems of mankind. The failure of socialism is too obvious to need any documentation. The track record of capitalism is far from being promising. Although a small minority has achieved unprecedentedly high material standards of living, a vast majority lives under conditions of abject poverty. The problems of unemployment, inflation, poverty amidst affluence, unequal distribution of wealth, frequent bouts of business

recession, environmental pollution and ecological imbalance still bedevil man's present life and threaten his future. The present book contends that the Islamic economic order has the potential of ushering in an age of human bliss; and the resources to build a free, just and responsible world for everyone on the earth.

**Islamic Accounting** Rand Corporation

On hisbah, an Islamic doctrine which means accountability according to Sharia.

**Al-Shura: The Qur'anic Principle of Consultation** Walter de Gruyter GmbH & Co KG

As an ever-growing international business, Islamic banking has changed the face of economics in recent years. As more and more industries embrace Islamic principles, the industry will unquestionably influence modern economic practices and techniques across the globe. Growth and Emerging Prospects of International Islamic Banking is a collection of innovative research on the methods and applications of Islamic banking interests on a global economic scale. While highlighting topics including asset diversification, profit sharing, and financial reporting, this book is ideally designed for bankers, banking analysts, international business managers, financiers, industry professionals, economists, government officials, academicians, students, and researchers seeking current research on Islamic banking perspectives and approaches to finances.

**Rolling Back the Islamic State** Cambridge University Press

The aim of this book is to explore and analyze the Islamic axioms, foundation principles and values underpinning the field of governance in an attempt to construct the architectonics of a new systemic and dynamic theory and formulate the articulation of 'Islamic governance'. This discursive and abstract, rather than being an empirical exercise, assumes to produce a 'good governance' framework within its own formulation through a value-shaped dynamic model according to maqasid al-Shari'ah (higher objective of Shari'ah) by going beyond the narrow remit of classical and contemporary discussions produced on the topic, which propose a certain institutional model of governance based on the classical juristic (fiqh) method. Through an exclusive analytical discursive approach in this book, readers will find that Islam as one of the major religions in the contemporary world with the claim of promising the underpinning principles and philosophical foundations of worldly affairs and institutions through a micro method of producing homolamicus could contribute towards development of societies by establishing a unique model of governance from its explicit ontological worldview through a directed descriptive epistemology.

**Islamic Economics and Finance** Emerald Group Publishing

The Handbook of Business Ethics: Philosophical Foundations is a standard interdisciplinary reference handbook in the field of business ethics. Articles by notable philosophers and economists examine fundamental concepts, theories and questions of business ethics: Are morality and self-interest compatible? What is meant by a just price? What did the Scholastic philosophers think about business? The handbook will cover the entire philosophical basis of business ethics. Articles range from historical positions such as Aristotelianism, Kantianism and Marxism to systematic issues like justice, religious issues, rights and globalisation or gender. The book is intended as a reference work for academics, students (esp. graduate), and professionals. **Growth and Emerging Prospects of International Islamic Banking** International Monetary Fund

This is a survey of Muslim economic thinking in the last two decades of the 20th century in Arabic, Urdu and English.

**The Tawhidic Approach in Management and Public Administration** Cambridge University Press

This book is a study of religious principles of good governance in

our contemporary societies. Historically, religion has provided guidance for organizing societies. In modern times, however, religious ideas have been marginalized in social science literature. Contributors to this work explore what values and practices the Qur'an can contribute to governing our economic, political, and social life today.

Understanding Modern Nigeria Springer

The paper analyzes the bearing of Islamic teachings on the conduct of fiscal policy. It is shown that Islamic teachings do not prescribe any rigid system of public finance. The major emphasis is on the state's responsibility to assure at least a basic minimum standard of living for all citizens. The paper deals with issues related to evolution of fiscal policies best suited to achieve this and other Islamic socio-economic objectives in the specific framework of Islamic teachings. The implications of such a system for growth, monetary stability, resource allocation, and pattern of income distribution are also examined.
