We are delighted to introduce the proceedings of the first edition of the 2019 International Conference on Advances in Education, Humanities, and Language (ICEL). The aim of ICEL (International Conference on Advances in Humanities, Education and Language) is to provide a platform for researchers, professionals, academicians as well as industrial professionals from all over the world to present their research results and development activities in Education, Humanities, and Language. The theme of ICEL 2019 was "Mainstreaming the Influences on Higher Order of Thinking Skills in Humanities, Education, and Language in Industrial Revolution 4.0". The technical program of ICEL 2019 consisted of 77 full papers, including invited papers in oral presentation sessions at the main conference tracks. Aside from the high quality technical paper presentations, the technical program also featured six keynote speeches, Hamamah, Ph.D (Univeritas Brawijaya, Indonesia), Prof. Dr. Nuraihan binti Mat Daud (UiTM, Malaysia), Dr. Edith Dunn (Conservator/Cultural Specialist, USA), Prof. Yoshihiko -Sugimura (university of Mizaki, Japan), Prof. Park Yoonho (Suncheon National University, Korea) and Prof. Su Keh Bow (Soochow University, Taiwan). We strongly believe that ICEL conference provides a good forum for all researchers, developers and practitioners to discuss various advances that are relevant to education, humanities, and language. We also expect that the future ICEL conference will be as successful and stimulating, as indicated by the contributions presented in this volume

 As teachers we often talk about 'covering' grammar points. Scott Thornbury explains why it is more useful to think about how we 'uncover' grammar, to reveal the workings of the system to our students and encourage them to notice what is going on. The book uses extracts from exchanges in real classrooms, authentic texts and language teaching tasks. It provides lots of practical activities so that you can immediately and easily put the ideas to work in your classroom.

Teaching Unplugged is the first book to deal comprehensively with the approach in English Language Teaching known as Dogme ELT. It challenges not only the way we view teaching, but also the way we view being a teacher. Dogme ELT advocates teaching 'unplugged': a materials-light, conversation-driven philosophy of teaching that, above all, focuses on the learner and on emergent

language. Teaching Unplugged was awarded the British Council ELTons UK Award for Innovation in 2010.

**Fortbildung für Kursleitende Deutsch als Zweitsprache** European Alliance for Innovation  
 This book provides teachers with practical ideas to bring teaching materials to life and get lessons off the page. It covers all four language skills and the language systems. The book also supports teachers to develop awareness of the aims of activities, and contains reflective tasks which consider how the activities enhance learning.

**The Handbook of Technology and Second Language Teaching and Learning** Peter Lang  
 The Handbook of Technology and Second Language Teaching and Learning presents a comprehensive exploration of the impact of technology on the field of second language learning. The rapidly evolving language-technology interface has propelled dramatic changes in, and increased opportunities for, second language teaching and learning. Its influence has been felt no less keenly in the approaches and methods of assessing learners' language and researching language teaching and learning. Contributions from a team of international scholars make up the Handbook consisting of four parts: language teaching and learning through technology; the technology-pedagogy interface; technology for L2 assessment; and research and development of technology for language learning. It considers how technology assists in all areas of language development, the emergence of pedagogy at the intersection of language and technology, technology in language assessment, and major research issues in research and development of technologies for language learning. It covers all aspects of language including grammar, vocabulary, reading, writing, listening, speaking, pragmatics, and intercultural learning, as well as new pedagogical and assessment approaches, and new ways of conceiving and conducting research and development. The Handbook of Technology and Second Language Teaching and Learning demonstrates the extensive, multifaceted implications of technology for language teachers, learners, materials-developers, and researchers.

Binets erster Roman «HHH» gewann 2010 den Prix Goncourt du Premier Roman, und sein neuer Roman «Die siebte Sprachfunktion» gewann 2015 den Prix Interallié und den Prix du Roman Fnac. Es ist ein Krimi mit Poststrukturalisten. Paris, Frühjahr 1980: Roland Barthes wird von einem bulgarischen Wäschelieferanten überfahren. Barthes kommt von einem Essen mit dem Kandidaten für das Amt des Ministerpräsidenten, François Mitterrand, und trägt ein Manuskript unter dem Arm. Ein Passant, Michel Foucault, wird Zeuge des Unfalls und behauptet, es war Mord. Der Tod des Autors ist für Kommissar Bayard ein Rätsel. Er mischt sich unter die Poststrukturalisten, besucht Vorlesungen von Foucault und hört Vorträge von Julia Kristeva, Philippe Sollers, Jacques Derrida und anderen. Da er nichts versteht, macht er den jungen Sprachwissenschaftler Simon Herzog zu seinem Assistenten. Der Roman ist auch ein Gesellschaftsportrait des Frankreichs der achtziger Jahre. Bayard ermittelt unter den Nach-Achtundsechzigern, die er nicht ausstehen kann, diesen linken Nichtsnutzen, die mit Joints und langen Haaren vor der Uni herumlungern und mit lusternen Professoren, die von sexueller Freiheit labern und sich unzüchtig benehmen, Frankreichs Kultur gefährden. Das Manuskript, das Barthes bei sich hatte, bleibt spurlos verschwunden. Auch der bulgarische Geheimdienst interessiert sich dafür. Ein bulgarischer Mörder greift Simon Herzog mit einer vergifteten Regenschirmspitze an. Aber im letzten Moment wird Herzog von zwei Japanern gerettet. Sie sind ebenfalls hinter dem Manuskript her. Eine heiße Spur führt zu dem italienischen Semiotiker Umberto Eco. Also bewegt sich der Tross - Kommissar und Assistent, Bulgaren und Japaner, nach Italien. Die Reise geht noch lange weiter, sie führt sogar auf einen amerikanischen Campus, wo Foucault über die Sexualität der Elefanten philosophiert. Das Manuskript, das alle

haben wollen, beschreibt die siebte Sprachfunktion (in Anlehnung an Roman Jakobsons Standardwerk der Linguistik über die sechs Sprachfunktionen). Die siebte Funktion, die Binet Roland Barthes erfinden lässt, gibt Politikern die rhetorischen Mittel an die Hand, öffentliche Rededuelle und damit auch die Wahlen zu gewinnen. Könnte Mitterrand damit an die Macht gelangen?

*Taboos and Controversial Issues in Foreign Language Education* Pearson Education India

This edited volume provides innovative insights into how critical language pedagogy and taboo topics can inform and transform the teaching and learning of foreign languages. The book investigates the potential as well as the challenges involved in dealing with taboo topics in the foreign language classroom. Traditionally subsumed under the acronym PARSNIP (politics, alcohol, religion, narcotics, isms, and pork). By examining how additional controversial topics such as disability, racism, conspiracy theories and taboo language can be integrated into conceptual teaching frameworks and teaching practice, this edited volume draws on examples from literary texts and pop culture such as young adult novels, music videos, or rap songs and investigates their potential for developing critical literacies. The book considers foreign language teaching outside of English teaching contexts and sets the groundwork for addressing the integration of taboo topics in foreign language education theory, research, and practice. Filling an important gap in educational research, the book will be of great interest to researchers, academics, and students of foreign language education, critical pedagogy, and applied linguistics. It will also be useful reading for teacher trainers and educators of foreign language education. Scott Thornbury's very accessible 30 Teaching Methods, groups methods according to what they have in common, even if separated in time. At the same time, it rehabilitates some lost or forgotten methods, with a view to challenging current orthodoxies, especially with regard to such topics as translation, rote learning, authenticity, and communication. In doing this it aims to unpack, not just the history of methods, but the beliefs that underpin them and the benefits that still might possibly accrue from experimenting with them. Through its inclusion of interesting characters, intriguing anecdotes, and often bizarre techniques, the material is absorbing and engaging.
