## BETHANY HOOD

**Crisis Management in Anesthesiology E-Book** Oxford University Press

The first medical specialty selection guide written by residents for students! Provides an inside look at the issues surrounding medical specialty selection, blending first-hand knowledge with useful facts and statistics, such as salary information, employment data, and match statistics. Focuses on all the major specialties and features firsthand portrayals of each by current residents. Also includes a guide to personality characteristics that are predominate with practitioners of each specialty. "A terrific mixture of objective information as well as factual data make this book an easy, informative, and interesting read." --Review from a 4th year Medical Student

**Anesthesia** Oxford University Press

A unique review reference featuring nearly 1,000 multiple choice questions. Each question focuses on a key concept or anesthesia

problem encountered in daily practice. Answers, explanations, case analyses and references follow, making the information relevant to patient care and standard procedures.

*Quick Hits in Obstetric Anesthesia* McGraw Hill Professional  
Focusing on the most commonly tested topics, the book provides those studying for the oral board exam with model answers.

*Cumulated Index Medicus* Elsevier Health Sciences  
Based on a program of study developed at the Children's Hospital Boston, Department of Anesthesiology, Perioperative and Pain Medicine, *Pediatric Anesthesiology Review: Clinical Cases for Self-Assessment* provides essential medical information for the subspecialty of pediatric anesthesiology. Illustrating the broad spectrum of the pediatric anesthesiologist's practice, this book utilizes an interactive question and answer dialogue which imitates the simplicity of conversation and affords the reader high-yield benefits. The case-based approach encourages readers to collaborate with colleagues, improve their oral presentation skills, and prepare for challenging situations by explaining various anesthesia care plans and why specific data are required

before and during the care of the pediatric patient. Written by a panel of specialists recognized internationally for their efforts in their respective areas within pediatric anesthesia and examiners for various medical specialty boards including the American Board of Anesthesiology, this self-assessment programmed text for residents, fellows, and clinicians in the field of pediatric anesthesiology offers extremely valuable advice. The ability to explain why, in addition to how, is central to the Children's Hospital Boston program's philosophy, and Pediatric Anesthesiology Review: Clinical Cases for Self-Assessment maintains this ideal in the crafting of this book. An interactive question and answer program is featured on extras.springer.com.

**How Medicine Changed the End of Life** Springer Nature  
 Authored by current and former physicians at the Mayo Clinic, Faust's Anesthesiology Review, 5th Edition, combines comprehensive coverage of essential anesthesiology knowledge with an easy-to-use format, reflecting the latest advances in the field. This outstanding review tool offers concise content on everything needed for certification, recertification, or as a refresher for anesthesiology practice, covering a broad range of important and timely topics. Save valuable time with this trusted resource as you master the latest advances, procedures, guidelines, and protocols in anesthesiology. Provides in-depth, yet succinct clinical synopses of all topic areas found on the ABA/ASA exam, with the perfect amount of information to ensure exam success. Contains 28 new chapters, including Blood Product Conservation, Tranexamic Acid Use in Orthopedic Surgery, Extracorporeal Membrane Oxygenation, Cardiovascular Opioids, Anesthesia for Patients with Rheumatoid Arthritis, Neurointerventional Anesthesiology, and the Perioperative Surgical Home. Features a new chapter on Sugammadex, the neuromuscular reversal drug that is changing anesthesia practice; a new chapter on Enhanced Recovery After Surgery (ERAS) protocols; and up-to-date information on opioid dependence.

*Comprehensive Healthcare Simulation: Anesthesiology* Elsevier Health Sciences

Developed by UK and US anesthesiologists with extensive experience in theater, this book describes the latest anesthesia techniques, practices, and equipment used in current combat and humanitarian operations. Includes chapters on topics such as injuries and physiology, team members, protocols, vascular access, airway management, burns, imaging, pain management and medications, regional anesthesia, ventilation, and postoperative management.

*Essential Anesthesia* Elsevier Health Sciences

Focused on rotations in regional anesthesia and chronic pain, this book provides a structured review of the concepts covered in the American Board of Anesthesiology in-training exam. The first section of the book covers regional anesthesia with dedicated chapters on basic science, acute postoperative pain, and nerve blocks for neuraxial, lower and upper extremity blocks, and head and neck. The second section on chronic pain includes chapters on basic science and common pain conditions - including craniofacial pain, CRPS, neuropathic pain, and cancer pain. This section closes on multimodal analgesia and other treatment approaches. Each chapter presents a common clinical topic and is organized by indications, preparation, technique, complication, prevention, clinical pearls, and related ABA key points. Highlights must-know information in bold throughout the text. Concise, practical, and easy-to-read, this book will aid anesthesiology residents, certified nurse anesthetists, and medical students in their study regarding patient care practices on regional anesthesia and chronic pain. The book will also be useful to residents going into regional anesthesia and pain medicine

subspecialties during the year of their anesthesiology training. .

*Anesthesia Outside of the Operating Room* is a comprehensive, up-to-date textbook that covers all aspects of anesthesia care in OOR settings, from financial considerations to anesthetic techniques to quality assurance. With increasing numbers of procedures such as cardiac catheterization and imaging taking place outside of the main OR, anesthesia providers as well as non-anesthesia members of the patient care team will find this book critical to their understanding of the principles of anesthesia care in unique settings which may have limited physical resources. The book includes chapters on patient monitoring techniques, pre-procedure evaluation and post-procedure care, and procedural sedation performed by non-anesthesia providers. Its authors address problems of anesthesia that have unique answers in OOR settings, such as patient transport and cardiac arrest, and discuss technological progress and considerations for the future. The text also covers surgical procedures and anesthetic considerations by procedure location, such as radiology, infertility clinics, field and military environments, and pediatric settings, among many others. Select guidelines from the American Society of Anesthesiologists (ASA) are provided as well. Edited by the senior faculty from Harvard Medical School and with contributions from other academic institutions, *Anesthesia Outside of the Operating Room* provides a unique and convenient compendium of expertise and experience.

[Anesthesiologists in time of disaster, An Issue of Anesthesiology Clinics, E-Book](#) Cambridge University Press

*Essential Anesthesia* is a concise, accessible introduction to anesthetic practice. Now in its second edition, it provides a thorough overview of the science and practice of anesthesia. Part I describes the evaluation of the patient, the different approaches to anesthesia, and the post-operative care of the patient in pain. Part II introduces the essentials of physiology and pharmacology and their role in understanding the principles of anesthesia. The final part presents a step-by-step description of 14 clinical cases. These clinical vignettes give a very real introduction to the practicalities of anesthesia and will give the non-anesthetist physician an idea of how to prepare a patient for a surgical procedure. All chapters have been expanded and updated and an entirely new chapter on safety in healthcare has been added. This is the perfect introductory text for medical students, junior doctors and all operating theatre and critical care staff.

[What Everyone Should Know about Anesthesia](#) Cambridge University Press

The Oxford American Handbooks of Medicine, now available in PDA format, each offer a short but comprehensive overview of an entire specialty featuring instant access to guidance on the conditions that are most likely to be encountered. Precise and prescriptive, the handbooks offer up-to-date advice on examination, investigations, common procedures, and in-patient care. Written by leading American practitioners, these PDAs will be invaluable resources for students, residents, and practitioners. These PDA versions enable enhanced, multi-layered access to the entire text, illustrations, and tables. Other features include fast access available via the key word search, and a facility for book marking and annotating the text. It is suitable for Palm and Windows Mobile.

*Anesthesiology In-Training Exam Review* Springer Nature

"This brilliantly assembled expert compendium provides a much-needed guide for the practical application of anesthesiology in medical practice in the most bereft underdeveloped and violence-afflicted regions of the globe." —Seymour Topping, Professor Emeritus of International Journalism, Columbia University This is a

comprehensive guide to the role of anesthesiologists in medical missions. In their capacity as perioperative physicians, anesthesiologists improve the safety and efficacy of surgical interventions for underserved patients in low- and middle-income countries around the world. Contributions from international experts in global health provide essential historical context, practical medical and surgical considerations for planning missions, and scenarios of “on the ground” implementation of care. The final section considers anesthesiology education in the context of global health. This is an encompassing and eye-opening resource for trainees and physicians considering participating in a medical mission and students and faculty of global health.

**Decision Making in Anesthesiology** Elsevier Health Sciences

This book provides easy to follow guidance on how to manage emergency situations and common problems in obstetric anesthesia. The book provides different anesthetic recipes for obstetric procedures and describes challenges that will be encountered on a day-to-day basis. There are trouble-shooting chapters and ‘what to do lists’ for frequent dilemmas. The book covers obstetric-specific resuscitation and medical emergencies seen on the labor ward. Antenatal and postpartum complications relating to anesthesia are covered as well as issues that may arise during follow up of patients who have had neuraxial anesthesia during delivery. Quick Hits in Obstetric Anesthesia should be used as a cognitive aid for emergency cases and as a decision-making tool for urgent management plans. It is a guide to common problems and provides core knowledge to facilitate anesthesia care on labor wards for all grades of anesthesiologist.

**Simulators in Anesthesiology Education** First Aid for the Anesthesiology Boards

Textbook of Anaesthesia has become the book of choice for trainee anaesthetists beginning their career in the specialty. It is highly suitable for part 1 of the Fellowship of the Royal College of Anaesthetists and similar examinations. It is also a practical guide for all anaesthetists and other health care professionals involved in the perioperative period.

**The First 24 Hours** Lippincott Williams & Wilkins

Focused on rotations in regional anesthesia and chronic pain, this book provides a structured review of the concepts covered in the American Board of Anesthesiology in-training exam. The first section of the book covers regional anesthesia with dedicated chapters on basic science, acute postoperative pain, and nerve blocks for neuraxial, lower and upper extremity blocks, and head and neck. The second section on chronic pain includes chapters on basic science and common pain conditions - including craniofacial pain, CRPS, neuropathic pain, and cancer pain. This section closes on multimodal analgesia and other treatment approaches. Each chapter presents a common clinical topic and is organized by indications, preparation, technique, complication, prevention, clinical pearls, and related ABA key points. Highlights must-know information in bold throughout the text. Concise, practical, and easy-to-read, this book will aid anesthesiology residents, certified nurse anesthetists, and medical students in their study regarding patient care practices on regional anesthesia and chronic pain. The book will also be useful to residents going into regional anesthesia and pain medicine subspecialties during the year of their anesthesiology training.

**First Aid for the Match, Fifth Edition** Oxford University Press

First Aid for the Anesthesiology Boards McGraw Hill Professional  
**Smith and Aitkenhead's Textbook of Anaesthesia E-Book** Cambridge University Press

This issue of Anesthesiology Clinics, guest edited by Dr. Alexander A. Hannenberg, focuses on Management of Critical Events. This is one of four issues each year selected by the series consulting editor, Dr. Lee Fleisher. Articles in this issue include, but are not limited to: Why We Fail to Rescue from Critical Events; High Fidelity Simulation Training; Alternatives to High Fidelity Simulation Training; Tools to Improve our Capacity to Rescue; Use of Cognitive Aids to Improve Management of Critical Events; Real-time debriefing after critical events: Exploring the Gap between Principle and Reality; Mass Casualty Events; Obstetrical Hemorrhage; Intraoperative cardiac arrest; The Lost Airway; The Septic Patient and Oxygen Supply Failure.

**First Aid for the Match: Insider Advice from Students and Residency Directors** Elsevier Health Sciences

With contributors from Massachusetts General Hospital and Harvard Medical School, the unique and thorough Anesthesia Review: 1000 Questions and Answers to Blast the BASICS and Ace the ADVANCED covers both BASIC or ADVANCED levels of Anesthesiology training in a single volume. Any resident in Anesthesiology will find a gold mine of material—including topic-specific chapters with exam-like questions, answers with explanations, and references for further, in-depth review—for fast, efficient preparation.

**Anesthesia Outside of the Operating Room** McGraw Hill Professional

There is no more universal truth in life than death. No matter who you are, it is certain that one day you will die, but the mechanics and understanding of that experience will differ greatly in today's modern age. Dr. Haider Warraich is a young and brilliant new voice in the conversation about death and dying started by Dr. Sherwin Nuland's classic How We Die: Reflections on Life's Final Chapter, and Atul Gawande's recent sensation, Being Mortal: Medicine and What Matters in the End. Dr. Warraich takes a broader look at how we die today, from the cellular level up to the very definition of death itself. The most basic aspects of dying—the whys, wheres, whens, and hows—are almost nothing like what they were mere decades ago. Beyond its ecology, epidemiology, and economics, the very ethos of death has changed. Modern Death, Dr. Warraich's debut book, will explore the rituals and language of dying that have developed in the last century, and how modern technology has not only changed the hows, whens, and wheres of death, but the what of death. Delving into the vast body of research on the evolving nature of death, Modern Death will provide readers with an enriched understanding of how death differs from the past, what our ancestors got right, and how trends and events have transformed this most final of human experiences.

**Combat Anesthesia** Lippincott Williams & Wilkins

Trauma patients present a unique challenge to anesthesiologists, since they require resource-intensive care, often complicated by pre-existing medical conditions. This fully revised new edition focuses on a broad spectrum of traumatic injuries and the procedures anesthesiologists perform to care for trauma patients perioperatively, surgically, and post-operatively. Special emphasis is given to assessment and treatment of co-existing disease, including surgical management of trauma patients with

head, spine, orthopaedic, cardiac, and burn injuries. Topics such as training for trauma (including use of simulation) and hypothermia in trauma are also covered. Six brand new chapters address pre-hospital and ED trauma management, imaging in trauma, surgical issues in head trauma and in abdominal trauma,

anesthesia for oral and maxillofacial trauma, and prevention of injuries. The text is enhanced with numerous tables and 300 illustrations showcasing techniques of airway management, shock resuscitation, echocardiography and use of ultrasound for the performance of regional anesthesia in trauma.
