Twilight in the Desert

This collection of essays treats the development of modern architecture in the Middle East, ranging from Jerusalem at the turn of the 20th century to Libya under Italian colonial rule, and on to present-day Iraq. The

essays cohere around the encounter between the politics of nation-building and architectural modernism.

The Origins of Saudi-American Relations: from recognition to diplomatic representation (1931-1943) Partridge

Despite ongoing efforts to find alternatives, oil is still one of the most critical—and

valuable—commodities on earth. This two-volume set provides extensive background information on key topics relating to oil, profiles countries that are major producers and consumers of oil, and examines relevant political issues. Aside from air and water, oil is perhaps the most valuable natural resource. Oil supplies the tremendous energy needs

of the modern world. What exactly is "oil," where does it come from, how does it get consumed, and who is using it? This encyclopedia provides clear answers to these questions and more, offering students entries on the fundamentals of the oil industry and profiles of the countries that play a major role in oil production and consumption. Volume 1 presents topical entries on critical concepts, key terms, major oil spills and disasters, and important

organizations and individuals relating to the oil industry. Entries define terms such as "barrel" and "reserve," cover incidents such as the BP oil spill, and explain the significance of organizations such as OPEC. The second volume spotlights specific countries that are major producers, consumers, exporters, and importers of oil, from the United States to Russia to Saudi Arabia to Venezuela. Each profile shows readers the importance of oil in that country through a brief

background history, data on its oil usage or production, information about major trading partners, and an explanation of political issues.

Raymond F. Mikesell deals with sources of conflict between private foreign investors and the

governments of developing countries. He concludes that government ownership and control will expand and that foreign investors are most likely to become sellers of their special services rather than remain investors who act freely for the benefit of parent companies. Originally published in 1971.

Although the Arabian Peninsula is the heartland of Islam and of the Arab world, for decades it did

not receive the attention it deserves from scholars and writers. The School of Oriental and African Studies, University of London, and the Middle East Centre of St Antony's College, Oxford, jointly organized a series of seminars, culminating in a conference at which the papers in this volume (first published in 1972) were discussed. Together they constitute an authoritative statement of our present knowledge of several areas of the Peninsula, with particular emphasis on the Gulf

States. Three chapters trace the history of Oman from pre-Islamic times to the recent past, and in so doing emphasize the theme of continuing conflict between sultan and imam. Other chapters examine the Gulf and the Peninsula from the standpoint of inter-Arab and of international relations. The third section of the book is devoted to a discussion of the increasing rate of social change in the area, and the final section deals with problems of oil and state and of economic

development.

U.S.-Saudi relations have

been marked by

ambivalence since their

inception over 50 years

ago. The Arab-Israeli

conflict, the division

between buyer and seller

of oil, the superpower-small state dichotomy, and the divergence of cultures, traditions, and perceptions have all contributed to the anomalies that have marked the relationship between the two countries, although mutual interest has, over time, outweighed mutual antagonism. Dr. Long examines the major factors affecting their association—economic, commercial, military, and political as well as oil-related factors—and develops the thesis that

each has evolved a unique internal dynamic and an existence independent of the others. It is primarily in times of crisis that the factors have overlapped in the minds of decision makers, Saudi and American alike. The author argues that a knowledge of the development of each individual element is crucial for understanding the intricacies of current U.S.-Saudi relations.

Saudi Arabia is one of the most important countries in the modern world. Not only does it possess some 25 per cent of the world's proven oil reserves, it also plays a crucial role in the wider Gulf region where over 50 per cent of proven reserves are located. Developments in Saudi Arabia will inevitably affect the economic well-being of the Western industrialised world, Japan and much of the Third World. At the same time, Saudi Arabia is ruled in a traditional

way by an all-powerful king and royal family, and is one of the key countries of Islam, the Holy City of Mecca being within the country's boundaries. The inroad of modern Western forces into this traditional Islamic society is underlined by the fact that many key posts are filled with imported Western workers. This book, first published in 1982, containing contributions by the world's leading Middle Eastern experts, provides a comprehensive overview of important

social, political and economic developments in Saudi Arabia. The opening chapters consider the formation of the Saudi State, and the bulk of the book surveys key themes such as political opposition, the oil industry, energy policy, banking, external relations and the future direction of development. *State, Society and Economy in Saudi Arabia (RLE Saudi Arabia)* Wiley + ORM
Twilight in the Desert reveals a Saudi oil and production industry that

could soon approach a serious, irreversible decline. In this exhaustively researched book, veteran oil industry analyst Matthew Simmons draws on his three-plus decades of insider experience and more than 200 independently produced reports about Saudi petroleum resources and production operations. He uncovers a story about Saudi Arabia's troubled oil industry, not to mention its political and societal instability, which differs sharply from the globally accepted

Saudi version. Its a story that is provocative and disturbing, based on undeniable facts, but until now never told in its entirety. Twilight in the Desert answers all readers questions about Saudi oil and production industries with keen examination instead of unsubstantiated posturing, and takes its place as one of the most important books of this still-young century. Yale University Press The two-hundred-year-long relationship between the Arab world and United

States has been fraught with tension and resentment. What began in the nineteenth century as a favorable exchange of cultural understanding and economic opportunity deteriorated with America's increasing interest in oil, and finally collapsed when America's pushed for the legitimization of the State of Israel. In this provocative new book, Lebanese-American historian Ussama Makdisi explores America's fractured relationship with the Arab world, and offers

policy recommendations that can lead to its repair.

The untold story of how Exxon, Mobil, Chevron,

and Texaco teamed up with the CIA and Department of State to thwart the plans of Greek shipping magnate Aristotle Onassis, who almost managed to reshape the Middle East. In 1954 Aristotle Onassis (long before he married Jacqueline Kennedy) made a bold business gamble: he tried to corner the crude oil shipping market by signing a deal with the King of Saudi Arabia. If it had worked, it would have reshaped the history of the Middle East. As it was, the proposed

deal terrified British and U.S. oil companies and the Dulles brothers, who saw it as the first move in the nationalization of Saudi oil. Complicating things was the burgeoning Arab nationalist movement led by Egypt's newly elected president, Gamal Nasser. And of course there were the Soviets, now without Stalin, eager to build influence in the region. This little-known story about the collision of nationalism, money, celebrity, and oil sheds new light on the tangled

history of the Middle East. Drawing on the author's immense knowledge of the Middle East and original research incorporating unexplored declassified documents, the book is an eye-opener for students of U.S. foreign policy, anyone interested in the global oil business, and scholars and historians of the role of the U.S. in the Arab world.

Urban Violence in the Middle East Routledge

In this groundbreaking book Kent E. Calder argues that a new

transnational configuration is emerging in Asia, driven by economic growth, rising energy demand, and the erosion of longstanding geopolitical divisions. What Calder calls the New Silk Road—with a strengthening multi-faceted relationship between East Asia and the Middle East at its core—could eventually emerge as one of the world's most important multilateral configurations. Straddling the border between comparative politics and

international relations theory, this important book will stimulate debate and discussion in both fields.

In *Violence Work* Micol Seigel offers a new theorization of the quintessential incarnation of state power: the police. Foregrounding the interdependence of policing, the state, and global capital, Seigel redefines policing as “violence work,” showing how it is shaped by its role of channeling state violence. She traces this dynamic by examining the formation, demise, and aftermath of the U.S. State Department's Office

of Public Safety (OPS), which between 1962 and 1974 specialized in training police forces internationally. Officially a civilian agency, the OPS grew and operated in military and counterinsurgency realms in ways that transgressed the borders that are meant to contain the police within civilian, public, and local spheres. Tracing the career paths of OPS agents after their agency closed, Seigel shows how police practices writ large are rooted in

violence—especially against people of color, the poor, and working people—and how understanding police as a civilian, public, and local institution legitimizes state violence while preserving the myth of state benevolence.

Area Handbook for Saudi Arabia Bloomsbury Publishing USA

Decades before 9/11 and the 'Arab Spring', US and Arab elites contended over the future of the Middle East. Through unprecedented research in Arabic and English,

Envisioning the Arab Future details how Americans and Arabs - nationalists, Islamists, and communists - disputed the meaning of modernization within a shared set of Cold War-era concepts. Faith in linear progress, the idea that society functioned as a 'system', and a fascination with speed united officials and intellectuals who were otherwise divided by language and politics. This book assesses the regional implications of US power while examining

a range of topics that transcends the Arab-Israeli conflict, including travel, communities, gender, oil, agriculture, Iraqi nationalism, Nasser's Arab Socialism, and hijackings in both the United States and the Middle East. By uncovering a shared history of modernization between Arabs and Americans, Envisioning the Arab Future challenges assumptions about a 'clash of civilizations' and profoundly reinterprets the antecedents of

today's crises.

Violence Work Walter de Gruyter GmbH & Co KG
Covering a period from the late eighteenth century to today, this volume explores the phenomenon of urban violence in order to unveil general developments and historical specificities in a variety of Middle

Eastern contexts. By situating incidents in particular processes and conflicts, the case studies seek to counter notions of a violent Middle East in order to foster a new understanding of violence beyond that of a meaningless and destructive social and

political act. Contributions explore processes sparked by the transition from empires — Ottoman and Qajar, but also European — to the formation of nation states, and the resulting changes in cityscapes throughout the region.
