LOGAN BRODERICK

North Sámi Springer

In "...And it was So" Dr. Scott Ransom argues that perceived gaps between science and the Biblical account of creation are symptoms of misinterpretation. A proper understanding of the Hebrew language, the audience for which Genesis was written, the process of Biblical translation, and the nature of science coalesce into a coherent picture of creation in which science and the Bible align. Ransom takes the reader into the story of creation and the science behind it, distilling complex scientific concepts into easily digestible nuggets, and along the way introducing us to many of the lesser-known heroes of scientific discovery. In the end the reader will have a new appreciation for both science and the Bible as well as the harmony that exists between both.

New International Dictionary Teachers College Press

Religion in the Anthropocene charts a new direction in humanities scholarship through serious engagement with the geopolitical concept of the Anthropocene. Drawing on religious studies, theology, social science, history, philosophy, and what can be broadly termed as environmental humanities, this collection represents a groundbreaking critical analysis of diverse narratives on the Anthropocene. The contributors to this volume recognize that the Anthropocene began as a geological concept, the age of the humans, but that its implications are much wider than this. Does the Anthropocene idea challenge the possibility of a sacred Nature, or is it a secularized theological anthropology more properly dealt with through traditional concepts from Roman Catholic social teaching on human ecology? Not all contributors to this volume agree about the answers to these and many more different questions. Readers will be challenged, provoked, and stimulated by this book.

A Grammar of Mavea Pearson Edexcel International GCSE Spanish Study and Revision Guide

This book addresses big data as a socio-technical construct with huge potential for innovation in key sectors such as healthcare, government and business. Big data and its increasingly widespread use in such influential spheres can generate ethically controversial decisions, including questions surrounding privacy, consent and accountability. This book attempts to unpack the epistemological implications of the term 'big data', as well as the opportunities and responsibilities which come with it. The author analyses the linguistic texture of the big data narrative in the news media, in healthcare and in EU law on data protection, in

order to contribute to its understanding from the critical perspective of language studies. The result is a study which will be of interest to students and scholars working in the digital humanities, corpus linguistics, and discourse studies.

Send students into their exam with the confidence to aim for their best with this formula for effective and structured revision including guidance that helps students practice vocabulary, grammar and all four skills. - Enable students to avoid misconceptions with common mistakes highlighted throughout - Build students' vocabulary and grammar knowledge with recaps for each topic - Develop students' reading, listening, speaking and writing skills through short questions for every topic - Allow students to identify areas for improvement with sample answers and commentary for exam-style questions throughout - Prepare students for the exam with extra exam-style questions to try at the back, plus revision tips throughout - Allow students to mark their own responses using the answers in the back of the book This title has not been through the Cambridge Assessment International Education endorsement process.

Unendlicher Spaß IGI Global

An original examination of the ubiquity of glitter—from bodily adornment to activist glitter bombing—and its vibrant and transformational properties. Glitter is everywhere, from crafting to makeup, from vagazzelling to glitter-bombing, from fashion to fish. Glitter also gets everywhere. It sticks to what it is and isn't supposed to, and travels beyond its original uses, eliciting reactions ranging from delight to irritation. In *Glitterworlds*, Rebecca Coleman examines this ubiquity of glitter, following it as it moves across different popular cultural worlds and exploring its effect on understandings and experiences of gender, sexuality, class and race. Coleman investigates how girls engage with glitter in collaging workshops to imagine their futures; how glitter can adorn the outside and the inside of the body; how glitter features in the films *Glitter* and *Precious*; and how LGBTQ* activists glitter bomb homophobic and transphobic people. Throughout, Coleman attends to the plurality of politics that glitter generates, approaching this through the concepts of hope, wonder, fabulation, and prefigurative politics—all of which indicate the making of different, better worlds, although often not in ways that are straightforward or conventional. She develops an original account of future politics, where time is nonlinear and sometimes non-progressive. Coleman's argument brings together feminist cultural theory, feminist new materialisms, and theories on futures and temporality, in order to propose that we should understand glitter as a thing—vibrant, processual, transformational, and traversing boundaries between media and material, culture and nature, bodies and environments.

Reciprocity in English Hachette UK

This book makes accessible the major structural features of the dialects of Italy and emphasises the importance of a detailed understanding of the dialects for issues in general linguistic theory. Selected contents include: * Phonology * Morphology * Syntax * Lexis * The Dialect Areas * Sociolinguistics of Dialects Contributors: Paola Benica; Gaetano Berruto; Guglielmo Cinque; Michela Cennamo; Patrizia Cordin; Thamas Cravens; Marie-Jose Dalbera Stefanaggi; Franco Fanciullo; Werner Forner; Luciano Giannelli; John Hajek; Hermann Haller; Robert Hastings; Michael Jones; Michele Lopporcaro; Martin Maiden; Marco Mazzoleni; Zarko Miljadic; Mair Parry; Cecilia Poletto; Lorenzo Renzi; Lori Repetti; Giovanni Ruffino; Giampaolo Salvi; Glauco Sanga; Leonardo Savoia; Alberto Sobrero; Rosanna Sornicola; Tullio Telmon; John Trumper; Edward Tuttle; Alberto Valvaro; Laura Vanelli; Ugo Vignuzzi; Nigel Vincent; Irene Vogel.

Pearson Edexcel International GCSE Spanish Study and Revision Guide Bloomsbury Publishing

The Oxford Handbook of Charles Dickens is a comprehensive and up-to-date collection on Dickens's life and works. It includes original chapters on all of Dickens's writing and new considerations of his contexts, from the social, political, and economic to the scientific, commercial, and religious. The contributions speak in new ways about his depictions of families, environmental degradation, and improvements of the industrial age, as well as the law, charity, and communications. His treatment of gender, his mastery of prose in all its varieties and genres, and his range of affects and dramatization all come under stimulating reconsideration. His understanding of British history, of empire and colonization, of his own nation and foreign ones, and of selfhood and otherness, like all the other topics, is explained in terms easy to comprehend and profoundly relevant to global modernity.

The Visual Language of Comics Pacific Linguistics

Although the grammatical expression of reciprocal (or 'mutual') situations in the languages of the world has received a surprising amount of attention in recent years, so far no comprehensive study specifically dealing with the historical development and synchronic structure of English reciprocal constructions has been published. This book takes into consideration insights from the three major research projects on reciprocity in the languages of the world as well as the rich literature on more specific aspects of reciprocity. Assuming a usage-based model of grammar, the development of the reciprocal strategies used in present-day English is described, with special attention paid to the periods following Middle English, where today's system began to take shape. The means of expressing reciprocity in today's English (e.g. the expressions each other and one another) are then analyzed as a system of competing constructions, the make-up and distribution of which can be related both to their history and

subtle distinctions in meaning and use associated with the different constructions. Quantitative data from corpora of natural language provides evidence for the analyses put forward. Wherever possible, claims on the expression of reciprocity in present-day English are checked against what is known about the grammar of reciprocity in other languages.

Powerful Literacy in the Montessori Classroom Hachette UK Spoken on Mavea Island by approximately 32 people, Mavea is an endangered Oceanic language of Vanuatu. This work provides grammatical descriptions of this hitherto undescribed language. Fourteen chapters, containing more than 1,400 examples, cover topics in the phonology and morphosyntax of Mavea, with an emphasis on the latter. Of particular interest are examples of individual speaker variation presented throughout the grammar; the presence of three linguo-labials (still used today by a single speaker) that were unexpectedly found before the rounded vowel /o/; and a chapter on numerals and the counting system, which have long been replaced by Bislama's but are remembered by a handful of speakers. Most of the grammatical descriptions derive from a corpus of texts of various genres (conversations, traditional stories, personal histories, etc.) gathered during the author's fieldwork, conducted for eleven months between 2005 and 2007.

Emerging Trends and Innovation in Sports Marketing and Management in Asia Routledge

This book constitutes the proceedings of the 15th International Conference on Web Information Systems Engineering, WISE 2014, held in Thessaloniki, Greece, in October 2014. The 52 full papers, 16 short and 14 poster papers, presented in the two-volume proceedings LNCS 8786 and 8787 were carefully reviewed and selected from 196 submissions. They are organized in topical sections named: Web mining, modeling and classification; Web querying and searching; Web recommendation and personalization; semantic Web; social online networks; software architectures and platforms; Web technologies and frameworks; Web innovation and applications; and challenge.

A Dictionary of the English Language Routledge

This volume brings together new research from different theoretical paradigms addressing the acquisition of French. It focuses on the acquisition of French in combination with English, German, Russian or Spanish and enriches our understanding of the particularities of French and the role of language combinations in the acquisition process. The chapters examine the development of different grammatical aspects (word order phenomena, adjective placement, dislocation and cleft constructions, wh-questions, DP phenomena, argument omissions and constructions with particular word groups) and use various methodologies (such as elicitation tasks, longitudinal studies and parsing experiments) to further add to our understanding of how French is acquired in different contexts. This book will be a resource for researchers and graduate students working in the discipline of language acquisition, especially those who are interested in language contact phenomena where two typologically different languages are involved.

A Reference Grammar of Romanian Multilingual Matters

An exploration of minimal writing—texts generally shorter than a sentence—as complex, powerful literary and visual works. In the 1960s and 70s, minimal and conceptual artists stripped language down to its most basic components: the word and the letter. Barbara Kruger, Jenny Holzer, Carl Andre, Lawrence Weiner, and others built lucrative careers from text-based art. Meanwhile, poets and writers created works of minimal writing—visual texts generally shorter than a sentence. (One poem by Aram Saroyan reads in its entirety: eyeeye.) In absence of clutter, Paul Stephens offers the first comprehensive account of minimal writing, arguing that it is equal in complexity and power to better-known, more

commercial text-based art. Minimal writing, Stephens writes, can be beguilingly simple on the surface, but can also offer iterative reading experiences on multiple levels, from the fleeting to the ponderous. “absence of clutter,” for example, the entire text of a poem by Robert Grenier, is both expressive and self-descriptive. Stephens first sets out a theoretical framework for reading and viewing minimal writing and then offers close readings of works of minimal writing by Saroyan, Grenier, Norman Pritchard, Natalie Czech, and others. He “reverse engineers” recent works by Jen Bervin, Craig Dworkin, and Christian Bök that draw on molecular biology, and explores print-on-demand books by Holly Melgard, code poetry by Nick Montfort, Twitter-based work by Allison Parrish, and the use of Instagram by Hans-Ulrich Obrist and Saroyan. Text, it seems, is becoming ever more prevalent in visual art; meanwhile, poems are getting shorter. When reading has become scanning a screen and writing tapping out a text, absence of clutter invites us to reflect on how we read, see, and pay attention.

The Imperial Dictionary Cambridge University Press

The present Dictionary is designed to meet the long-felt need of the English knowing reader, who is interested in the study of classical as well as modern Sanskrit. It covers a very large field—epics such as the Ramayana and Mahabharata, Puranas and Upapuranas, Smṛti and Niti literature, Darsanas or Systems of Philosophy, such as Nyaya, Vedanta, Mimamsa, Sankhya and Yoga, Grammar, Rhetoric, Poetry in all its branches, Dramatic and Narrative literature, Mathematics, Medicine, Botany, Astronomy Music and other technical or scientific branches of learning. Thus it embraces all words occurring in the general post-Vedic literature. It includes most of the important terms in Grammar. It gives quotations and references to the peculiar and remarkable meaning of words, especially such as occur in books prescribed for study in the Indian and foreign universities. It also renders explanation of important technical terms occurring in different branches of Sanskrit learning. To add to its usefulness,

Social Media and Politics [2 volumes] John Benjamins Publishing

Teaching reading successfully requires deep knowledge of the reading process and development, as well as the implementation of impactful reading instruction and differentiation. This book aligns Montessori didactic materials and pedagogy, developed over a century ago, with current research on reading development. Readers will gain a solid overview of the Montessori philosophy and method, specifically those related to reading and language development, enabling them to support their practice in today's educational context while inspiring the wider field of education. The authors explain how the Montessori approach is inherently aligned with the Science of Reading in that they are both scientifically based and contain methods that follow a logical, systematic, and explicit progression of teaching and learning. Montessori education supports instructional differentiation that is cognizant of children's need for independence and highly mindful of literacy and language development. This book provides valuable contributions to all educators implementing Science of Reading and Structured Literacy in their practice, and is a must-have for Montessori teachers (preschool to grade 3) and those that prepare, coach, and supervise them. Book Features: Aligns the Montessori curriculum to reading research, currently known as the Science of Reading. Explains how the Montessori curriculum builds reading skills, background knowledge, and vocabulary across disciplines. Shows educators how to balance state requirements and standards with maintaining a pedagogy aligned with Montessori principles. Provides descriptions of teaching materials, classroom examples, and images. Demonstrates how to use Montessori methods to support multiculturalism and differentiation to meet the needs of diverse students. Includes

suggested progressions of development, such as phonological awareness, that extend lessons using the Moveable Alphabet. Explores multisensory approaches to language and literacy instruction.

Taylor & Francis

Despite his significance, little scholarly attention has been paid to Adams's contributions as an artist or his place in photographic history. This handsome book addresses this gap by looking beyond his reputation as a Sierra Club environmentalist and examining in depth his life as an artist, and the complexities of his creative vision. 80 illustrations.

Contemporary Linguistic Parameters John Benjamins Publishing Drawings and sequential images are an integral part of human expression dating back at least as far as cave paintings, and in contemporary society appear most prominently in comics.

Despite this fundamental part of human identity, little work has explored the comprehension and cognitive underpinnings of visual narratives—until now. This work presents a provocative theory: that drawings and sequential images are structured the same as language. Building on contemporary theories from linguistics and cognitive psychology, it argues that comics are written in a visual language of sequential images that combines with text. Like spoken and signed languages, visual narratives use a lexicon of systematic patterns stored in memory, strategies for combining these patterns into meaningful units, and a hierarchic grammar governing the combination of sequential images into coherent expressions. Filled with examples and illustrations, this book details each of these levels of structure, explains how cross-cultural differences arise in diverse visual languages of the world, and describes what the newest neuroscience research reveals about the brain's comprehension of visual narratives. From this emerges the foundation for a new line of research within the linguistic and cognitive sciences, raising intriguing questions about the connections between language and the diversity of humans' expressive behaviours in the mind and brain.

Religion in the Anthropocene Motilal Banarsidass Publ.

This book constitutes the refereed proceedings of the 11th International Conference on Games and Learning Alliance, GALA 2022, held in Tampere, Finland, in November/December 2022.

The 27 full papers and 9 short papers were carefully reviewed and selected from 61 submissions. The papers cover a broad spectrum of topics: Serious Games and Game Design; Serious Games for Instruction; Serious Game for Digital Literacy and Numeracy; Novel Approaches and Application Domains; Taxonomies and Evaluation Frameworks.

The Imperial Dictionary, English, Technological, and Scientific BoD – Books on Demand

Constructions in Spanish is the first book-length English-language volume in the field of usage-based and Cognitive Construction Grammar dedicated exclusively to Spanish. The contributions investigate a wide range of constructions from both a synchronic and a diachronic perspective, cutting across morphology, syntax, semantics and pragmatics. The constructionist perspective is also linked to comparative and typological research, to language learning and teaching and to multi-modal discourse analysis. The volume aims both at increasing the visibility of constructionist approaches to Spanish, and at offering data and analyses of Spanish for scholars working on constructional analyses of other languages. The volume thus addresses both scholars in Spanish and Romance linguistics, as it builds connections between more traditional approaches and constructionist approaches, and construction grammarians generally, especially scholars interested in comparative work.
