Make use of a detailed
plan and ready-to-use
lessons for teaching
appeal terms and Book
Hook writing to
students. Getting
Beyond "Interesting":
Teaching Students the
Vocabulary of Appeal
to Discuss Their

Reading is a practical
application book that
gives librarians all the
tools they need to
implement the
teaching of both
appeal terms and Book
Hook writing and
sharing. When
students know how to
write Book Hooks and
have access to an
easy-to-use system for
allowing students to
share Book Hooks, the
result is greatly

increased reading through the power of peer recommendations. This book not only supplies a detailed plan for teaching appeal terms and Book Hook writing, but it also provides two extensive appendices containing all the black line masters and forms needed to implement these lessons. As a result, practitioners will be able to enhance their students' reading culture through increased sharing of reading—and most importantly, by empowering students with the ability to clearly define their reading preferences.

Join environmentally
conscious kid crusader
Michael Recycle as he
makes the eco-friendly
leap into his first
comic! Michael's green
adventures are about
to get a whole lot
messier when he faces
threats to Earth's
environment from all
over the globe. These
clever stories will
delight readers of all
ages with their
charming art and
green messages and
tips.

Purposeful Planning for

Learning IGI Global
 Litterbug Doug is lazy. He is wasteful. He is messy. But worst of all, he hates recycling! The clean and green town where he lives is in danger from his lazy ways, not to mention suffering from the stench released by the mountains of garbage that Doug leaves wherever he goes! So strong is its stink that even the army of rats that follow Doug around are rethinking their friendship with him. It's up to Michael Recycle, planet Earth's green-caped crusader, to show dastardly Doug the error of his ways...before it's too late!

Michael Recycle Meets Borat the Space Cat
 Bloomsbury Publishing USA

"Michael's green adventures are about

to get a whole lot messier when he faces threats to Earth's environment from all over the globe. Readers will blossom into full-fledged eco-super heroes as Michael teaches them about the challenges our planet faces and what they can do to help"--

Statistics in Early Childhood and Primary Education Walter de Gruyter

Wir alle kennen ihn - aber wer ist Michael Jackson? In ihrem eleganten Essay nähert sich Margo Jefferson der spannendsten und widersprüchlichsten Figur der Popkultur, einem Star, den Hits wie Billie Jean und Thriller unsterblich machten. Sie analysiert das Phänomen Jackson, wie er erst als schwarzer Kinderstar,

dann als exzentrischer Freak und schließlich als Verdächtiger vor Gericht von sich reden machte - und zur zerbrechlichsten Ikone der Postmoderne wurde. Eine brillante, pointiert gefasste Studie, die Publishers Weekly mit Susan Sontags frühen Aufsätzen zur amerikanischen Popkultur verglich.

Fachleute zeigen in übergreifenden Beiträgen und anhand von konkreten Fallbeispielen sowohl aus Deutschland wie aus anderen Teilen Europas, Asiens, Australiens und den USA, wie der ökologische Fußabdruck im Alltag der Bibliothek verringert werden kann und was Nachhaltigkeit für die soziale Verantwortung von Bibliotheken in ihrer Rolle als gesellschaftliche Multiplikatoren bedeutet. Die Beiträge sind entweder in Deutsch oder Englisch, die Abstracts sind konsequent zweisprachig verfasst. Der Sammelband

richtet sich an Bibliothekare in Öffentlichen und in Wissenschaftlichen Bibliotheken sowie in Firmen- und Spezialbibliotheken, an Hochschullehrer und Studierende aus dem Bereich Bibliotheks- und Informationswissenschaft, darüber hinaus an alle, die sich für ökologische Nachhaltigkeit interessieren - Architekten, Bibliotheksträger, Zertifizierungsstellen sowie Bibliotheksorganisationen und verbände.

Getting Beyond "Interesting" National Geographic Books

"I'm Michael Recycle, for all that I'm worth, I'm green and I'm keen to save planet Earth!"

A small town near you is drowning in piles of

rubbish from its lazy and wasteful inhabitants! But here is Michael Recycle, the green-caped crusader, to rescue the town and prove that recycling is fun! A new superhero in a new world.

Michael Recycle and the Tree Top Cops ebook Berlin Verlag

Teach your kids the importance of environmentalism and sustainability in this fun, exciting adventure! It's the near future and Earth is on the brink of an environmental apocalypse. Michael Recycle is desperate to reverse the situation when suddenly a visitor from another galaxy enters Earth's atmosphere—Borat The Space Cat! Borat not only has ideas to help Michael stop Earth spiraling into the

disaster zone but he wants to SHOW Michael just how sustainability can really be done. The intergalactic cat takes Michael back to his own planet—Splearth—a planet very similar to our own but in a parallel universe where only cats have survived and reversed the fate of their planet. Oh and let's not forget the vegan vikings that helped out too. It might not be too late to help Earth reverse its fate and if anyone can, Borat can!

[Building STEM Skills Through Environmental Education](#) Springer
The Handbook of Research on the Education of Young Children is the essential reference on research on early childhood education

throughout the world. This outstanding resource provides a comprehensive research overview of important contemporary issues as well as the information necessary to make knowledgeable judgments about these issues. Now in its fourth edition, this handbook features all new sections on social emotional learning, non-cognitive assessment, child development, early childhood education, content areas, teacher preparation, technology, multimedia, and English language learners. With thorough updates to chapters and references, this new edition remains the cutting-edge resource

for making the field's extensive knowledge base readily available and accessible to researchers and educators. It is a valuable resource for all of those who work and study in the field of early childhood education including researchers, educators, policy makers, librarians, and school administrators. This volume addresses critical, up-to-date research on several disciplines such as child development, early childhood education, psychology, curriculum, teacher preparation, policy, evaluation strategies, technology, and multimedia exposure.

Even super-heroes need a vacation, so where better than one of the world's natural wonders, the great Redwood Forest! But disaster has struck and the forest is under threat... can Michael Recycle and his new friends, the Tree Top Cops, save the day? Recycle - (Re)invent

IDW Publishing

Environmental studies

provide an ideal opportunity for children

of any age to build critical and creative thinking skills while also building skills in science, technology, engineering, and mathematics (STEM). Exploring issues related to sustainability and environmental concerns permits learners to identify problems, develop research questions, gather and analyze data, develop possible solutions, and disseminate this information to others. Despite the advantages of green education and its ability to improve student achievement, there is a gap in understanding the interplay between curriculum and instruction and how this affects teaching and learning. Building STEM Skills Through

Environmental Education is an essential publication that addresses gaps in the understanding of green education and offers educators meaningful and comprehensive examples of environmental and sustainability education in the Pre-K through secondary grade levels. The book offers a unique combination of foundational understanding of green education and chapters that illustrate the principles and impact of green education across grade levels, content areas, assessment systems, instructional strategies, technology, and other related topics. It is ideally designed for educators, curriculum developers,

instructional designers, advocates, policymakers, researchers, academicians, and students.

Discover new and exciting ways to teach STEM content through the arts in your early childhood program with this innovative and comprehensive guidebook. Chapters feature playful activities divided by age band that bridge early academic learning and social, emotional, physical, and mental development with active engagement in the arts. Structured activities include a materials list, safety concerns, key takeaways, and related

readings, as well as explicit connections to research and national standards. With clear and concise lesson plans that walk you through activities in music, dance, media arts, visual arts, and theater, it becomes easy to bring development and learning through movement and creativity to your classroom or program. *Wee Recyclers* IDW Publishing
Michael is on a mission to save the plight of the Monarch Butterflies when their migration south from Canada to Mexico is threatened!

Will Michael be able to change the fate of his fluttery friends? Find out in "Michael Recycle and the Monarch Butterflies!"

Michael Recycle and Bootleg Peg Michael Recycle

Children have lots of fun meeting RECYCLE MICHAEL and learning about how we we can all make a difference on our planet when we RECYCLE. This book fits in with Science curriculum and discusses concepts such as Natural Resources, Landfill Space, Pollution, Energy, and Clean Air, and Water.
