Capability Maturity Model Integration

(CMMI) is a process level improvement  
training (5 levels) and appraisal program.

Capability levels apply to an organization's

performance and process improvement

achievements in individual practice areas.

Within practice areas, the practices are

organized into practice groups labeled

Level 0 to Level 5 which provide an

evolutionary path to performance ...

Maturity Model | What Works Centre for

Crime Reduction

In the Maturity Model, the many activities

that need to be managed in order to

deliver integrated care have been grouped

into 12 dimensions, each of which

addresses part of the overall effort.

In this article, we are going to discuss Test

Maturity Model Integration (also known as

TMMi) and Test Process Improvement (also

known as TPI) to take the advantages of

these methods so that these methods

could be used to improve our day to day

Testing practices as well as performance

intensely. These methods play a key role

in stabilizing the IT standards for any

mature IT organization as demanded by its

investors, clients, regulators, and

employees.
