Staring at the Sun Random House

A bold account of the development of human consciousness and spirituality over the ages and an examination of the dynamic global transformation of attitudes about healing. For more than fifteen years, Caroline Myss has studied why some people heal, while others do not. In her previous book, *Anatomy of the Spirit*, Dr. Myss illuminated the hidden interactions of belief and body, soul and cell to show how, as she inimitably puts it, "your biography becomes your biology." In *Why People Don't Heal and How They Can*, she builds on her earlier teachings of the seven different energy centers of the body to provide a vital self-healing program for physical and spiritual disorders. With her characteristic no-nonsense style and high-voltage storytelling, she exposes and explodes the five myths about healing, explains the

cultural and individual contexts in which people become physically and spiritually ill and invested in "woundology," and teaches new methods of working with the challenges that the seven energy centers embody. To help you get and stay on the path to wellness, Dr. Myss provides rituals and prayers for gaining a symbolic perspective on your life issues; for bolstering your personal power; and for connecting with a universal divine energy. Dr. Myss's breakthrough views on energy medicine and her active approach to healing life issues and physical illness will help you overcome the mental blocks that keep you from becoming well.

A Dog's Purpose BRILL

Spiritual Authority and Temporal Power is an analysis of cyclical manifestation, and more specifically of the relationship between royal and sacerdotal power. In accord with the Hindu doctrine of manvantaras and Plato's depiction of historical degeneration in the Republic, Gu non views history here as a series of 'revolts' of lower castes against the higher. The kshatriyas (warriors) revolt against the brahmins (priests), thus setting the stage for a revolt of the vaishyas (loosely, the bourgeoisie), as in the French revolution-and, finally, the shudras (the proletariat), as in the Russian revolution (which Gu non does not touch upon in this

work). From one point of view, this is a progressive degeneration; from another it is entirely lawful, given the 'entropic' nature of manifestation itself. External, historical descent reflects an inner degeneration: knowledge (the celestial paradise) is eclipsed by heroic action (the terrestrial paradise), which is in turn overrun by the inertia and agitation of the passions. Yet the nadir of degeneration is also the point of renewal: the dawning of the Heavenly Jerusalem-spiritual Knowledge-which begins a new cycle of manifestation.

Revenirea in forta la metodele de tratament fitoterapeutic, explicate si insele la nivelul secoului 21, sugereaza ca civilizatia contemporana merita mai mult decat substante chimice de sinteza. O simpla lecturare a biochimiei organismelor vii demonstreaza complexitatea proceselor celulare care se produc concomitent si interrelationat in miliarde de variante. Introducerea unor substante de sinteza straina de circuitele biochimice este suportata ca o agresiune si nicidecum ca o solutie terapeutica. In marea lor majoritate substantele de sinteza nu se pot administra pe o perioada mai mare de 10-14 zile, fara a produce efecte secundare, fiind vorba, in ultima instanta, de o suferinta celulara generalizata. For years, scientists have been warning us that a pandemic was all but inevitable. Now it's here, and the rest of us have a lot to learn. Fortunately, science writer Carl Zimmer is here to guide us. In this compact volume, he tells the story of how the smallest living things known to science can bring an entire planet of people to a halt--and what we can learn from how we've defeated them in the past. Planet of Viruses covers such threats as Ebola, MERS, and chikungunya virus; tells about recent scientific discoveries, such as a hundred-million-year-old virus that infected the common ancestor of armadillos, elephants, and humans; and shares new findings that show why climate change may lead to even deadlier outbreaks. Zimmer's lucid explanations and fascinating stories demonstrate how deeply humans and viruses are intertwined. Viruses helped give rise to the first life-forms, are responsible for many of our most devastating diseases, and will continue to control our fate for centuries. Thoroughly readable, and, for all its honesty about the threats, as reassuring as it is frightening, A Planet of Viruses is a fascinating tour of a world we all need to better understand.

Written in Irv Yalom's inimitable story-telling style, *Staring at the Sun* is a profoundly encouraging approach to the universal issue of mortality. In this magisterial opus, capping a lifetime of work and personal experience, Dr. Yalom helps us recognize that the fear of death is at the heart of much of our anxiety. Such recognition is often catalyzed by an "awakening experience"—a dream, or loss (the death of a loved one, divorce, loss of a job or home), illness, trauma, or aging. Once we confront our own mortality, Dr. Yalom writes, we are inspired to rearrange our priorities, communicate more deeply with those we love, appreciate more keenly the beauty of life, and increase our willingness to take the risks necessary for personal fulfillment.

How Simple Lifestyle Changes Can Reverse Most Chronic Diseases Macmillan

Welcome to the world of alternative medicine. Prince Charles is a staunch defender and millions of people swear by it; most UK doctors consider it to be little more than superstition and a waste of money. But how do you know which treatments really heal and which are potentially harmful? Now at last you can find out, thanks to the formidable partnership of Professor Edzard Ernst and Simon Singh. Edzard Ernst is the world's first professor of complementary medicine, based at Exeter University, where he has spent over a decade analysing meticulously the evidence for and against alternative therapies. He is supported in his findings by Simon Singh, the well-known and highly respected science writer of several international bestsellers. Together they have written the definitive book on the subject. It is honest, impartial but hard-hitting, and provides a thorough examination and judgement of more than thirty of the most popular treatments, such as acupuncture, homeopathy, aromatherapy, reflexology, chiropractic and herbal medicine. In *Trick or Treatment?* the

ultimate verdict on alternative medicine is delivered for the first time with clarity, scientific rigour and absolute authority.

A Review Book Norman Publishing

'Alternative' medicine is now used by one in three of us. In the UK we spend an estimated £4.5 billion a year on it and its practitioners are now insinuating themselves into the mainstream. There are methods based on ancient or far-eastern medicine, as well as ones invented in the nineteenth and twentieth centuries. Many are promoted as natural treatments.

What they have in common is that there is no hard evidence that any of them work. Treatments like homeopathy, acupuncture and chiropractic are widely available and considered reputable by many. Ever more bizarre therapies, from naturopathy to nutraceuticals, ear candling to ergogenics, are increasingly favoured. Endorsed by celebrities and embraced by the middle classes, alternative medicine's appeal is based on the spurious rediscovery of ancient wisdom and the supposedly benign quality of nature. Surrounded by an aura of unquestioning respect and promoted through uncritical airtime and column inches,

alternative medicine has become a lifestyle choice. Its global market is predicted to be worth \$5 trillion by 2050. Suckers reveals how alternative medicine can jeopardise the health of those it claims to treat, leaches resources from treatments of proven efficacy and is largely unaccountable and unregulated. In short, it is an industry that preys on human vulnerability and makes fools of us all. Suckers is a calling to account of a social and intellectual fraud; a bracing, funny and popular take on a global delusion.
