This collection records epiphanies, instances of poetry, moments of "extraordinary ordinary" insights that have happened to me in the course of living my life as usual over the past year —the events that occurred in it concentrated and highlighted even more by the Coronavirus pandemic. These are moments when the mind and spirit abstracts from everyday objects, situations and chains of events seminal and universal truths about our existence as sentient creatures evolved to awareness over the process of thirteen billion years — moments when we are dumbstruck with awe, or are startled into wonder, joy and compassion —moments when we see our breathless possibilities and our daunting limitations. I invite you to share them with me.

On a sunny morning in 1927, George Lichter, barely six years old, donned his new skates and rolled to the beach at Gravesend Bay where he witnessed a spectacle that would determine the course of his life. As he watched an airplane take off from the water and fly over the city, he decided he would one day become a pilot. George held onto this dream throughout his childhood in Brooklyn, wild adventures as a trumpet player in the Borscht belt and during his escapades at college in, of all places, the Deep South. A week before his twentieth birthday in 1941, immediately following the bombing of Pearl Harbor, George rode the subway to the nearest recruiting center and joined the United States Air Force. By the end of WWII, having flown eighty-eight combat missions over Nazi-occupied Europe, he had become a decorated fighter pilot. Two years later, in 1947, retired from the Air Force, he learned that the new nation of Israel was about to be attacked by its Arab neighbors. Though George felt the Jewish State had no chance of survival against such insurmountable odds, he knew he had to help. He signed up as a Machalnik (volunteer) and was assigned to an air base in Czechoslovakia where he helped train Israel's first fighter pilots. Within a year they owned the skies over their new nation.

A provocative and often hilarious look at teaching -- a beautifully written book that will resonate with anyone who's been a teacher or been taught in America. Gerald Newman, acclaimed author of *The Rise of English Nationalism* and holder of the Kent State University Distinguished Teaching Award, surveys his youth, education, students, and career in a memoir sparkling with humor and full of arresting portrayals of school life from both sides of the instructor's desk. Sketching his background and confessing his youthful follies and pranks, Newman arrives at his maverick schooldays, depicting a jolly parade of familiar types -- teachers, principals, geeks and Greeks, zany profs and silver-tongued "grandees of the lecture hall." Tracing his progress through the University of Washington, then Harvard, then his thirty-year career at Kent State after the infamous May 4th shooting (1970), he addresses the teacher's main mission to "Fix Stupid,"

amusingly revisiting battles with wayward students, John Birchers, Henry Kissinger, and other Harvard profs and sundry academics, administrators, and "woke" enthusiasts at Kent State. A historian, he shows his own shaping by great outside forces -- World War II, the Cold War, Vietnam, American political controversy, trendy intellectual fashions. He includes valuable teaching tips, laugh-out-loud accounts of educational travels, and biting commentary on the current political scene. This is a big book, containing much more than one man's life story, written in a light-hearted and entertaining spirit by a very keen observer.

Music Education for Children with Autism Spectrum Disorder: A Resource for Teachers provides foundational information about autism spectrum disorder and strategies for engaging students with ASD in music-based activities such as singing, listening, moving, and playing instruments. This practical resource supplies invaluable frameworks for teachers who work with early-years students. The book first provides readers with background information about ASD and how students with this condition manage their behaviors in school environments. It then progresses to provide teachers with information about planning music-based instruction for students on the spectrum. In the book's midsection, readers learn how students with ASD perceive, remember, and articulate pitch perception. Following chapters present a series of practical ideas for engaging students with ASD

though songs and singing and concentrate on skills in music listening, most notably on activities that motivate students with ASD to interact with others through joint attention. Challenges that individuals with ASD experience in motor processing are examined, including difficulties with gait and coordination, motor planning, object control, and imitation. This is followed by practical teaching suggestions for engaging students with activities in which movement is mediated through sound (e.g., drum beats) and music. Closing chapters introduce non-pitched percussion instruments along with activities in which children engage in multisensory experiences by playing instruments--musical activities described in preceding chapters are combined with stories and drama to create musical narratives. Music Education for Children with Autism Spectrum Disorder is accompanied by a companion website that supplies helpful supplemental materials including audio of songs notated in the book for easy access.

Swingin' on Central Avenue iUniverse

The development of jazz and swing in the African-American community in Los Angeles in the years before the second World War received a boost from the arrival of a significant numbers of musicians from Chicago and the southwestern states. In *Swingin' on Central: African-American Jazz in Los Angeles*, a new study of that vibrant jazz community, music historian and jazz journalist Peter Vacher traveled between Los Angeles and London over several years in order to track down key figures and interview them for this oral history of one of the most swinging jazz scenes in the United States. Vacher recreates the energy and vibrancy of the Central Avenue scene through first-hand accounts from such West Coast notables as trumpeters Andy Blakeney, George Orendorff, and McLure "Red Mack" Morris; pianists Betty Hall Jones, Chester Lane, and Gideon Honore, saxophonists Chuck Thomas, Jack McVea, and Caughey Roberts Jr; drummers Jesse Sailes, Red Minor Robinson, and Nathaniel "Monk" McFay; and others. Throughout, readers learn the story behind the formative years of these musicians, most of whom have never been interviewed until now. While not exactly headliners--nor heavily recorded--this community of jazz musicians was among the most talented in pre-war America. Arriving in Los Angeles at a time when black Americans faced restrictions on where they could live and work, jazz artists of color commonly found themselves limited

to the Central Avenue area. This scene, supplemented by road travel, constituted their daily bread as players--with none of them making it to New York. Through their own words, Vacher tells their story in Los Angeles, offering along the way a close look at the role the black musicians union played in their lives while also taking on jazz historiography's comparative neglect of these West Coast players. Music historians with a particular interest in pre-bop jazz in California will find much new material here as Vacher paints a world of luxurious white nightclubs with black bands, ghetto clubs and after-hours joints, a world within a world that resulted from the migration of black musicians to the West Coast.

Pitch and Revelation Routledge

A wrenching account of one family's five-year battle with what proved to be terminal liver disease, this story explores all aspects of the difficulty in raising a family under such conditions. Written from the point of view of the primary caregiver, the story reveals much about the possible challenges facing the 17,000 families now waiting for a liver transplant in the USA. Many more face other debilitating diseases or the ravages of age. Despite his scientific training to try to understand what is happening, the author is crushed by the medical bureaucracy, and the wild ups and downs of the course of the disease. Having adopted their children, the author struggles with his fundamental values and his conflicting responsibilities to the children and to his ailing wife. This book should help friends and family better understand what a stoic experience the caregiver of one seriously ill may be going through. More importantly, it can show such a lonely individual that what they are going through is not unique, and that they need not be alone. As events proceed through hospice, funeral, and grief, the author looks back on their time together and reflects on the nature of life and love.

The Comic Book Bandit is a bright, healthy, mischievous child named Jay. Mentored by his brilliant older brother, Ross, the bandit pulls off his first comic book heist at the age of four. As events unfold, he gradually finds himself to be alone out in a world where the only significant authority over his behavior turns out to be him and his fledgling and relatively ignorant conscience. Being an unattended child may be scary, but it is also immensely exciting. There is a rush that comes with boundless liberty. Not entirely free, but with stolen moments of freedom to explore life

on his own, out and about in the pulsating city of Chicago, where the choices were breathtaking, our hero is captured by the undeniable realization, "I can do whatever I want so long as I don't get caught." The stories take place after the Second World War. Yes, the bandit faces the obstacles of grown-ups but cleverly discovers the slippery power of the believable lie. He creates a secret life of his own and shares an acceptable version with those he must account to: his mother, his father, his brother, his teachers, and his friends. Getting away with stuff starts to become second nature, at least until and when he creates a lie so big, with burden so weighty, its effects are at times overwhelming. The culmination of his struggles with the Great Bar Mitzvah Caper will have the reader riveted to each and every page. How could he? How does he? Will he or won't he? Those are the questions. Come along for the ride. I promise you a child whose ingenious lies make him unlike any child you may have encountered. And beyond all that, he is a great little kid. 1

This book examines the risks to freedom of expression, particularly in relation to the internet, as a result of regulation introduced in response to terrorist threats. The work explores the challenges of maintaining security in the fight against traditional terrorism while protecting fundamental freedoms, particularly online freedom of expression. The topics discussed include the clash between freedom of speech and national security; the multijurisdictional nature of the internet and the implications for national sovereignty and transnational legal structures; how to determine legitimate and illegitimate association online; and the implications for privacy and data protection. The book presents a theoretical analysis combined with empirical research to demonstrate the difficulty of combatting internet use by terror organizations or individuals and the range of remedies that might be drawn from national and international law. The work will be essential reading for students, researchers and policy makers in the areas of Constitutional law; Criminal Law, European and International law, Information and Technology law and Security Studies.

Who Me is a story of a life framed and supported by a bevy of pets. From a pigtailed child wishing for her first kitten to finding herself in the cockpit of a spy plane, from a sheltered teen losing

a father and then a president, from finding love to losing it and finding it again Who Me travels a path similar and unique to those of us who say, "Well, I'm just ordinary." This story will push and pull you through those experiences that shape us to be who we are. There is tragedy, joy, truth, and love. And there are cats, dogs, and birds who partner with our heroine to soften her falls and celebrate her successes, who are always on her side and avid proponents of the sunlit day and one more romp through the grass.

In August of 2007, I started writing a weekly column for my hometown newspaper, the Northland Press. This book is a collection of those essays published over the years. They depict everything from life itself to my roots; nature, pet stories, holidays of the year, fishing, hunting, sports, eulogies, and memories of days gone by. I hope you enjoy reading them as much as I enjoyed writing them. Mike Holst

The complete Diamond Tree, (episodes 1-3). In a world within a world, there exists a small kingdom called Flairyland. A realm born out of a love for wide-flaired jeans like the hippies used to wear. Flairies love those jeans. Years ago the flairies adored everything about the hippies. They loved the flowered headbands, cheesecloth smock-tops, tie-dye T-shirts and daisy chains. Moreover, the very essence of hippy lifestyle was peace and harmony. That's what the flairies wanted the most. A lengthy period of calm and peace endured, until the king's reign came to its end. The younger generation was then due its turn and the king's daughter selected as the next queen. No sooner is Chubina crowned, than her land is thrown into danger. Her first task as ruler therefore, must be to save Flairyland.

A beautiful song comes to life in this story set in Hawaii The day the baby boy was born, on a beautiful Hawaiian island, the world sang him a lullaby. What a good song. But what is the good song? The boy listens for it and finds it in his heart and shares it with the world. Inspired by the medley of the classic songs "Over the Rainbow" and "What a Wonderful World" sung by Hawaiian singer Israel Kamakawiwo'ole, the good song is aloha—love.

Just Beyond Listening asks how we might think about encounters with sound that complicate standard accounts of aurality. In a series of essays, Michael C. Heller considers how sound functions in dialogue with a range of sensory and affective modalities, including physical co-presence, textual interference, and spectral haunting. The text investigates sound that is experienced in other parts of the body, altered by cross-wirings of the senses, weaponized by the military, or mediated and changed by cultural practices and memory. Building on recent scholarship in sound studies and affect theory, Heller questions not only how sound propagates acoustically but how sonic presences temper our total experience of the world around us.

Over the Rainbow shows how Dorothy's passage from Kansas to Oz and back again recapitulates paradigmatic stories of both

America and Christianity. Defining human identity on three symbolic levels (individual, collective, and cosmic), Nathanson shows that The Wizard of Oz has come to be a "secular myth." *Ups and Downs with No Regrets* iUniverse

An invaluable guide for lovers of classical music designed to enhance their enjoyment of the core orchestral repertoire from 1700 to 1950 Robert Philip, scholar, broadcaster, and musician, has compiled an essential handbook for lovers of classical music, designed to enhance their listening experience to the full. Covering four hundred works by sixty-eight composers from Corelli to Shostakovich, this engaging companion explores and unpacks the most frequently performed works, including symphonies, concertos, overtures, suites, and ballet scores. It offers intriguing details about each piece while avoiding technical terminology that might frustrate the non-specialist reader. Philip identifies key features in each work, as well as subtleties and surprises that await the attentive listener, and he includes enough background and biographical information to illuminate the composer's intentions. Organized alphabetically from Bach to Webern, this compendium will be indispensable for classical music enthusiasts, whether in the concert hall or enjoying recordings at home.
