Von Beruf Fotograf sieht
Tom die durch den Winter
zum Erliegen gekommene
Welt um sich herum wie
durch die Linse seiner
Kamera. Schon immer hat

er sein Leben auf diese
Art betrachtet, und so ist
es nicht weiter
verwunderlich, dass er es
anhand von Fotografien
erzählen kann. All diese
Bilder kommen ihm nun in
den Sinn: das erste Foto,
das er von seiner Frau
geschossen hat, die
Aufnahmen von
Familienfeiern, die ihm
seinen Lebensunterhalt
sichern, und diejenigen,

die er stets zu machen
geträumt hat, Fotos
jenseits der gängigen
Sehgewohnheiten. Tom
hat sich längst damit
abgefunden, dass er kein
großer Künstler ist. Doch
wie soll er damit leben,
dass er kein perfekter
Ehemann ist? Und dass er
vor allem seinem
anderen, seinem ältesten
Sohn Daniel kein guter
Vater war? Tief in seiner

Kamera versteckt, gibt es ein Foto von Daniel, das Toms ganze Schuld und ganzes Leid zeigt. Je intensiver Toms innere Zwiegespräche mit Daniel auf dieser Reise werden, desto mehr hofft er, Erlösung und Vergebung zu finden. Mit großer sprachlicher Intensität erzählt David Park von einem Mann, der fast an sich und seinem Schicksal zerbricht.

Wie still und verwunschen es hier ist! Mo und seine Geschwister Kaja und Jonathan haben richtig Gänsehaut, als sie in den verlassenenen Vergnügungspark klettern. Um sie herum

leere Schießbuden, ein zugewuchertes Karussell und ein altes Riesenrad. Doch so verlassen ist der Park gar nicht, denn plötzlich tauchen Dinosaurier, Wahrsager und Riesen auf. Und in der Ferne leuchtet ein Schloss. Magisch zieht es die Geschwister an. Denn in dem Schloss lebt der große Schabalu. Und der verdreht allen den Kopf ...
Atlas der Anatomie des Menschen Mosby
The childhood obesity epidemic in the United States is no secret. Few pediatricians, however,

are equipped with the know-how to educate parents on ways to prevent obesity, or help with the complicated process of encouraging weight loss in an already obese child. Dr. Myung K. Park, MD, FAAP, FACC, a noted pediatric cardiologist, is on the cutting edge of pediatric obesity studies. In *Helping Your Overweight Child: A Do-It-Yourself Guide*, Park offers practical advice for concerned parents based on twenty years of experience studying the childhood obesity

epidemic. As a pediatric cardiologist, Park long ago recognized the connection between lifetime heart health and healthy weight. In the 1990s, he founded one of the first clinics dedicated to the study of pediatric obesity, the Preventative Cardiology and Weight Management Clinic at the University of Texas Medical School, San Antonio. *Helping Your Overweight Child* puts prevention and treatment in the hands of a child's family, negating the need for ineffective

government programs or expensive private weight loss programs. The book notes the exact steps that Park would take if a parent brought a child to the clinic for treatment. Through education at the family level, *Helping Your Overweight Child* is a long overdue tool for proactive and empowered parents. *Pediatric Cardiology for Practitioners* Elsevier, Urban&Fischer Verlag
