"Simple text and full-color illustrations describe the true story of Laika, the first dog in outer space"--

ParaNorman: Attack of the Pilgrim Zombies! First Second

In these 20 poems, addressed to the Soviet dog who perished

in space, Laika threads moments of love and loss into an astonishing lyric lament on isolation, queerness, coming of age and womanhood. Maggie Olszewski is from Columbia South Carolina. She was named a Top 15 Foyle young Poet of the Year by the UK Poetry Society with her winning poem 'At The Funeral'. Her text 'Gap' won a national gold medal from Scholastic Art & Writing

Awards in 2019 and her work has appeared in Jasper magazine. She is currently studying English at Smith College. *The Art and Making of ParaNorman* Space Doc Media LLC Features the Laika Foundation, from Moscow, Russia, originally formed to provide lifelong care to retired space program animals. Funds general scientific research. Includes

information on the Laiko V/O RaznoExport and the production of its cigarette. **Laika** Harper Collins Laika was the abandoned puppy destined to become Earth's first space traveler. This is her journey. Nick Abadzis masterfully blends fiction and fact in the intertwined stories of three compelling lives. Along with Laika, there is Korolev, once a political prisoner, now a driven

engineer at the top of the Soviet space program, and Yelena, the lab technician responsible for Laika's health and life. This intense triangle is rendered with the pitch-perfect emotionality of classics like *Because of Winn Dixie*, *Shiloh*, and *Old Yeller*. Abadzis gives life to a pivotal moment in modern history, casting light on the hidden moments of deep humanity behind

history. Laika's story will speak straight to your heart. Laika is the winner of the 2008 Eisner Award for Best Publication for Teens and an Eisner Award nominee for Best Reality-Based Work. Laika The 1950s were a turbulent time in history as the United States and the Soviet Union were in a frenetic race to reconnoiter the frontier of space. By 1957 the Soviets had jettisoned Sputnik II,

carrying the first-ever living being to go to space--Laika. Laika, the genesis of space exploration, symbolized not only the zenith of pertinacity but the engenderment of curiosity into actualization. So many children today still turn their heads towards the stars and beyond, and their inquisitive nature is pivotal in their ebullient curiosity. Their questions need to be

answered, so that one day they will answer questions we never thought to ask. And who better for them to ask than the dog who went to space in the first place? The creative design of the book introduces Laika to the audience through jocular dialogue embellished by furtive delineations of spaceships, spacesuits, Laika herself, and much more. The children in the storyline ask

insightful questions about gravity, the atmosphere, lunar craters, and why we can't breathe in space. Laika answers them through detailed explanations sure to provoke more questions. Ultimately, the book reminds the kids to keep looking towards the stars, and that they will change the world. Moreover, it reminds those of us living in today's world that there is meaning to be found not only

in our lives but beyond. *Anatomy Of A Laika*

Den här boken som du nu håller i handen är på svenska. Den handlar om en planet som du själv bor och lever på. Den när boken tar även upp om kändskapet och andras offentliga personers man hade möte med och intervjuat genom tiderna. - Om dina ögon ser droppar hör de inte munkänslan. Als Mischas und Sam Laika treffen, sind

sie gute Freunde, und es kann sein, dass die Welt, in der sie leben, erkennt, dass Kriege und Konflikte den Frieden zerstören. This book is about a life just like the reader's consideration of his life and living. Each human being is a unique creature that makes the planet earth a resource in one way or another. We humans, in the name of Humanity, live on a planet called Earth. It is only 1 planet, but we

live as if it were 1-3 plants. To plant our society in various sovereign countries and states, where we should live in peace without conflicts and other problems. It is we humans who have lived our lives as since parents the world. Then it's time for us humans to get anxious and go to the therapy couch to be reconciled. But if we lived then those lives better, we would

probably never live so that the world did not change so that the next generation will have problems. Tell me if it's not love? A wise Indian says that all creatures that are animals on planet earth live under the same roof, naked in the face of truth. But the most dangerous animal is the one who wears clothes and is civilized enough to know better. This animal is human. Civilization is dangerous!

Människorna reser inte till någonting egentligen, dom reser från någonting, så att de kommer bort i fiskens fjäll en liten smula bortom alla berg i på alpernas fjäll, där vardagen får sina alldagliga händelser.

Space Station Investigation

Trinity University Press
All the sensible hogfolk in Pigdom Plains know that if pigs were meant to fly, they'd have been born

with wings—but there's no convincing Lily Leanchops. The daughter of renowned inventor Hercules Fatchops, Lily has watched her father's flying machines fail time and time again. Working in secret, Lily is trying to build what her father couldn't: an aircraft that actually works. And of course, she's following his example and employing scientific principals alone—not

magic. (Well, a protection spell or two doesn't count, right?) Lily's secret project takes on a new sense of urgency when a mysterious enemy emerges from beyond the mountains. The Warthogs are coming, and they're piloting flying machines powered by dangerous magic spells. To save Pigdom Plains, Lily must take to the skies in her own experimental aircraft—and there's no time for a test run. Pigs

Might Fly chronicles the adventures of a team of airplane-flying pigs, from knockout duo Nick Abadzis and Jerel Dye. Laika the Space Dog Ranch Dog Entertainment, LLC Hunting Laika Breeds of Russia By: Vladimir Beregovoy All hunting Laika breeds originated out of primitive aboriginal dogs of the peoples of northeastern Europe and Siberia. Vladimir Beregovoy proposes a

concept of primitive aboriginal dogs (www.laikabreeds.com). In modern times, any aboriginal dog of the Old World, once adopted by a kennel club, becomes subject to change by “tender loving care,” restricted freedom, and breeding in isolation to standards invented by experts from dog shows. General trends Beregovoy notices are reduction of natural variation,

enhancing “trademarks” of the breed, and exaggeration of certain features perceived as beautiful. Behavior and traits needed in hunting, such as agility, stamina, and physiology, are never seen by dog judges. Maria G. Dmitrieva-Sulima, the first expert in Russian Laikas, lived and worked during the dawn of dog shows in Russia (late nineteenth to the early twentieth

century). She was very skeptical on the value of showing without testing at hunting. Now, over 100 years later, Beregovoy's opinion on this matter is the same.

Set in the Cold War, Losing Laika is the story of Petró Konradtovych Kravets, who arrives on the scene of a downed American U-2 spy plane on May Day 1960 to retrieve its camera. An experienced optics technician, Petró's work for the Ministry of Military Aeronautics carries on his father's legacy of defending the Motherland, his father having been

killed in World War II. Covering a half century, *Losing Laika* lets readers follow-- through the eyes of a Soviet Everyman--the lives of Petró, his family, and others across the backdrop of the Cold War with its international space race, Cuban missile crisis, commonplace air raids, and much more. *Grandfather's Laika* First Second
The heart-rending story of Laika, the brave space traveler, by

the co-authors of *From the Stars in the Sky to the Fish in the Sea*.

Laika ABDO Publishing Company LAIKA, the studio behind the hit films *Coraline* and *ParaNorman*, introduces audiences to a new breed of family: the *Boxtrolls*, a community of quirky, mischievous creatures who have lovingly raised an orphaned human boy named Eggs in the amazing cavernous home they've built beneath the streets of

Cheesebridge. When the town's villain, Archibald Snatcher, comes up with a plot to get rid of the *Boxtrolls*, Eggs decides to venture above ground where he meets and teams up with fabulously feisty Winnie to devise a daring plan to save Eggs' family. *The Art of The Boxtrolls* features the amazingly detailed artwork that went into this film's creation, including character sketches, puppets,

textiles, set dressing, and 3-D printed facial models, alongside the story of the film's development.

First Hero in Outer Space

Dorrance Publishing Grandpa and his grandson Matthew share their worries and overcome their grief together when Grandpa's dog becomes sick and dies.

Laika's Window Brick Mantel Books Laika is a homeless stray living on the streets of Moscow when she is picked by the space

programme to be the first ever animal launched into orbit. However, her rocket disappears and everyone thinks Laika is lost forever - no one knows what happened to her. In Owen Davey's imaginative story you discover that Laika was rescued by a loving new owner and found her true home on a planet far, far away.

Chronicle
Books
Animals have

been an influential part of science, technology, and travel throughout time. Laika: The 1st Dog in Space introduces readers to the historical climate of the 1920s through 1950s, background on Laika, a chronology of Laika's trip into space, and how that mission influenced history. Colorful graphic art, diagrams of rockets, history on the Space Race, fast facts, and a glossary will

bring the historic mission to a younger audience. A great supplement to your history graphic novel collection.

A Vermont family doctor, aerospace medical research scientist, USAF flight surgeon, and former NASA scientist-astronaut (NASA Group 4--1965) Graveline looks back on his extraordinary life and achievements.

The Luckiest Dog Chronicle Books
 From LAIKA, the Academy Award®-nominated studio behind *Coraline*, *ParaNorman*, and *The Boxtrolls*, comes a new adventure set in a mythical ancient Japan. In *Kubo and the Two Strings*, scruffy, kind-hearted Kubo cares devotedly for his mother while eking out a humble living in their sleepy shoreside village. But when a spirit from the past

appears, Kubo suddenly finds himself entwined in a violent struggle against gods and monsters. This fully illustrated book offers a behind-the-scenes view of the amazingly detailed artwork and unique stop-motion animation style involved in the film's creation. [Laika the Astronaut](#) BoD - Books on Demand
 Laika began her life as a stray dog on the streets of Moscow and died in 1957

aboard the Soviet satellite Sputnik II. Initially the USSR reported that Laika, the first animal to orbit the earth, had survived in space for seven days, providing valuable data that would make future manned space flight possible. People believed that Laika died a painless death as her oxygen ran out. Only in recent decades has the real story become public: Laika died after only a few hours in orbit when her

capsule overheated. Laika's Window positions Laika as a long overdue hero for leading the way to human space exploration. Kurt Caswell examines Laika's life and death and the speculation surrounding both. Profiling the scientists behind Sputnik II, he studies the political climate driven by the Cold War and the Space Race that expedited the satellite's development. Through this

intimate portrait of Laika, we begin to understand what the dog experienced in the days and hours before the launch, what she likely experienced during her last moments, and what her flight means to history and to humanity. While a few of the other space dog flights rival Laika's in endurance and technological advancements, Caswell argues that Laika's flight serves as a

tipping point in space exploration "beyond which the dream of exploring nearby and distant planets opened into a kind of fever from which humanity has never recovered." Examining the depth of human empathy—wh at we are willing to risk and sacrifice in the name of scientific achievement and our exploration of the cosmos, and how politics and marketing can
