## AUGUST BRANSON

### ROAD SERIES Climbingvan

It's a simple plan for each of them. Cathal wants money, Anto wants money and to be with Laura, and Laura wants to escape a life of poverty. Life however is never that simple. The three young Dubliners slide down the road of improvisedcrime in an effort to realize their dreams. In a cascade of clueless effort and bizarre schemes, the three slip further into crime and the strange life of the Irish underworld. Unlike the boys, however, Laura has a plan for getting out before she gets in over her head. All she has to do is stay the course until that one big score that will give her a way out of crime and poverty. Sooner or later they have to get there, right? Anto and Cathal have it sussed: after all, how difficult could crime be? The police, their fellow criminals, and those who would not be conned all contribute to the answer as the trio and their friends scramble onwards. "Turlough O'Neill's keen ear for dialogue and cynical affection for his home country make Floating down the Liffey a delightful romp through Dublin's grimy streets, mingling scrupulously realistic description

and expression with the ironic charm of true Irish humour." -Stephan Grundy, best-selling author of Rhinegold.

"Scotland is known as the Home of Golf and is renowned for its fascinating history, rich culture and heritage and but above all, our golf courses are situated amid some of the most spectacular scenery in the world. Throughout Scotland there is a huge choice of golf courses to suit every skill level, offering quality, value for money, and above all, a fantastic and unique golfing experience. You are never too far from a golf course with more than 400 courses less than an hour from a city or an airport. Furthermore, the average green fee is £45 which is only around \$70. Every golfer in the world should experience golf in Scotland at least once in their lifetime. Up and down the country Scotland offers unique coastal courses and magnificent links golf, complemented by breathtaking parkland, heathland and moorland golf courses, many of which have been designed by renowned golf architects and played by the golfing elite; another reason for cementing Scotland's golfing reputation. Scotland of course boasts the famous greens of Turnberry and The

Old Course. But we are not ones to rest on our laurels and new courses are being added to Scotland's amazing collection all the time. Machrihanish Dunes Golf Club, set hard against the shores of the Atlantic Ocean, is the first 18-hole links golf course to be built on the west coast of Scotland in 100 years, while Castle Stuart in the Highlands is a championship links course overlooking the Moray Firth and well-known landmarks that are synonymous with Highlands. With more than 550 courses populating the stunning scenery the length and breadth of the country, you will never be stuck for quality or choice. With all this and more, there is always a reason for visiting Scotland." Phillip Riddle, Chief Executive VisitScotland

Road Series takes us on a voyage which opens us up to see God and the Gospel in the regular occurrences of our daily lives. We are pointed toward God in our interactions, walk, talk, school, driving, cooking—in everything. Road Series encourages us to look for God not just in the extraordinary, but also in the most mundane and menial of activities we engage in.

JEREMY CLARKSON'S LATEST - AND MOST OUTRAGEOUS - TAKE ON THE WORLD CLARKSON'S BACK

- AND THIS TIME HE'S PUTTING HIS FOOT DOWN From his first job as a travelling sales rep selling Paddington Bears to his latest wheeze as a gentleman farmer, Jeremy Clarkson's love of cars has just about kept him out of trouble. But in a persistently infuriating world, sometimes you have to race full-throttle at the speed-bumps. Because there's still plenty to get cross about, including: · Why nothing good ever came out of a meeting · Muesli's unmentionable side effects · Navigating London when every single road is being dug up at once · People who read online reviews of dishwashers · \*\*\*\*ing driverless cars Buckle up for a bumpy ride - you're holding the only book in history to require seatbelts . . . Praise for Jeremy Clarkson: Brilliant . . . Laugh-out-loud' Daily Telegraph 'Outrageously funny . . . Will have you in stitches' Time Out 'Very funny . . . This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.

An indispensable tool for the beginning stages of designing and planning a building project This new edition of a classic, bestselling text provides, in one concise volume, the essential information needed to form the framework for the more detailed design and development of any building project. Organized largely by building type, it covers planning criteria and considerations of function and siting—and with over 6200 diagrams, it provides a mass of data on spatial requirements. Most of the featured illustrations are dimensioned and each building type includes plans, sections, site layouts, and design details. The book also includes an extensive bibliography and detailed set of metric/imperial conversion tables. Architects' Data starts with the basics of designing for a new building project, before moving on to covering everything an architect needs

to know. It also looks at the design styles and specifications for creating different types of structures, such as those made for residential, religious, cultural, sports, medical, and other types of occupation. Covers user requirements, planning criteria, basic dimensions, and considerations of function and siting Includes numerous examples and over 6200 illustrations and tables 5th English edition of the classic, international reference for architects Architects' Data is an excellent resource for architects, building surveyors, space planners, and design and build contractors everywhere.

To date, the focus in the field of sustainable building has been on new building design. However, existing residential buildings inflict great environmental burden through three causes: continuous energy consumption, regular building maintenance and replacements. This publication analyses and compares these three causes of environmental burden and shows that material resources needed for replacements generally have a limited potential to reduce environmental impact. Reducing energy consumption for climate control and electrical appliances is much more effective. According to the author, sustainable measures should be tested for shifts in the kind of environmental impact caused due to the use of alternative types of energy resources and altered material quantities. The sustainability of the electricity supply is essential to decrease the total environmental impact of the residential building stock.

Who are these Guptas who are so powerful, they're distributing cabinet posts like matrons handing out condoms at a brothel? Who do Americans think they are, accusing Trevor Noah of 'stealing' a joke from one of their comedians? Is Sizakele MaKhumalo Zuma's spaza shop a National Key Point? In #ZuptasMustFall, and other rants, Fred Khumalo runs riot, contemplating the pressing issues that continue to confound, infuriate and exasperate the nation - or to sink it into further controversy. Covering a wide range of topics, including politics, history, current events and celebrity gossip, this compilation of recent and new writings contains Khumalo's trademark blend of humour and shrewd analysis, as well as his treatment of everyday issues from a uniquely South African perspective. This is an entertaining collection of thoughts from one of the country's most seasoned journalists, offering many questions, and tongue-in-cheek answers, on who we are as a nation, where we are going, and how we compare to the rest of the world.

The book presents - based on the most recent research and development results worldwide - the perspectives of new propulsion concepts such as electric cars with batteries and fuel cells, and furthermore plug in hybrids with conventional and alternative fuels. The propulsion concepts are evaluated based on specific power, torque characteristic, acceleration behaviour, specific fuel consumption and pollutant emissions. The alternative fuels are discussed in terms of availability, production, technical complexity of the storage on board, costs, safety and infrastructure. The book presents summarized data about vehicles with electric and hybrid propulsion. The propulsion of future cars will be marked by diversity - from compact electric city cars and range extender vehicles for suburban and rural areas up to hybrid or plug in SUV's, Pick up's and luxury class automobiles.

In October 2010, Shane Clifton had a serious accident that left him a quadriplegic. *Husbands Should Not Break* is a memoir that describes the challenges of adjusting to life with a disability. Shane is a theologian by trade, so the memoir explores the problem of pain--where is God when we suffer--weighing the sometimes-abstract categories of theology against the harsh realities of his experience. It is a brutally honest account, which does not shy away from the author's doubts and failures, and touches on rarely spoken-about topics, such as the impact of spinal cord injury upon sexuality. But while the narrative deals with sadness, it is a hopeful rather than depressing text, and often surprisingly funny, as it describes the comedic strangeness of struggling with a broken body. The memoir is an invitation into Shane's mind, providing readers with the opportunity to imagine what it might be like to experience the loss that comes with spinal cord injury and, thereafter, to think about life, loss, disability, and the possibility of happiness in the midst of the hardship and fragility of life.

Nick Haynes is a normal guy, and he has a normal life. A job he doesn't like, a wife he argues with, and a car that needs work. He also has a baby son he adores. Wife and son asleep, Nick settles down with a few beers for a night in front of the TV. But a gate slamming in the wind sends him into the back yard to close it. There, he discovers a bedroom window open, and his son gone. He rushes into the street in time to see a car driving away, all lights off. He should call the police, but instead he pursues the car. And that's where it begins. The long nightmare night. Half-drunk, barefoot and tired, Nick is about to run head-first into the dark criminal underworld. But he plans to save his baby son whatever it takes. And he's going to make damn sure he does so before his wife

wakes up in the morning.

Who manufactures cereal for Kellogg's? Why are the Mercedes Smart and the Renault Twingo almost identical? Do Danone and Nestlé really manufacture everything they make us believe they manufacture? Is Zara an opaque or a transparent brand? Why do some companies claim "we do not manufacture for other brands" when yet they hide from us the fact that sometimes "other brands manufacture for them"? The number of companies outsourcing the whole of their production for their brands in an opaque manner is constantly increasing while they disregard the legitimate need for information and communication of the general public and consumers.

Paradoxically, in this age of transparency opacity is ever growing among well-known brands in every industrial sector. Black Brands (in the Age of Transparency) is an extraordinary piece of work on truths and lies, on transparency and opacity of leading companies and brands in our age. The book is full of relevant cases never discussed before in sectors such as consumer products, baby foods, fashion, vehicles and mobile phones. Insightful and incisive, Fernando Olivares has directed his team to produce this book that will educate us as citizens and consumers. Their goal is to promote honest transparency -the only way to attain corporate legitimacy and sustainability in our time.
