The 2001 report

completed a

comprehensive review

of the risks to offspring

following parental

exposure to radiation.

The review included an

evaluation of those

diseases which have

both hereditary and

environmental

components. The major

finding is that the total

hereditary risk to the

first generation

following radiation is

less than one tenth of

the risk of fatal

carcinogenesis

following irradiation.

The Committee

concluded that a

sounder basis now

exists for estimating

the hereditary risks of

radiation exposure.

in molecular genetics,
and in the evaluation
of multifactorial
diseases, such as
coronary heart disease.

Do bi- and

multilinguals perceive
themselves differently

in their respective

languages? Do they

experience different

emotions? How do they

express emotions and

do they have a favorite

language for emotional

expressions? How are

emotion words and

concepts represented

in the bi- and

multilingual lexicons?

This ground-breaking

book opens up a new

field of study,

bilingualism and

emotions, and provides

intriguing answers to

these and many

related questions.

Research, Applications, and Implications A fior d'artell cantiere edile cremonese pre-industriale: prassi e glossario

The University has lost its way. The world needs the university more than ever but for new reasons. If we are to clarify its new role in the world, we need to find a new vocabulary and a new sense of purpose. This book offers nothing less than a fundamental reworking of the way in which we understand the modern university.

Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods

Multilingual Matters
In 1934, with World War II on the horizon, writer Jacob Glatstein

(1896–1971) traveled from his home in America to his native Poland to visit his dying mother. One of the foremost Yiddish poets of the day, he used his journey as the basis for two highly autobiographical novellas (translated as *The Glatstein Chronicles*) in which he intertwines childhood memories with observations of growing anti-Semitism in Europe. Glatstein's accounts "stretch like a tightrope across a chasm," writes preeminent Yiddish scholar Ruth Wisse in the Introduction. In Book One, *Homeward Bound*, the narrator, Yash, recounts his voyage to his birthplace in Poland and the array of international travelers he meets along the

way. Book Two, Homecoming at Twilight, resumes after his mother's funeral and ends with Yash's impending return to the United States, a Jew with an American passport who recognizes the ominous history he is traversing. The Glatstein Chronicles is at once insightful reportage of the year after Hitler came to power, a reflection by a leading intellectual on contemporary culture and events, and the closest thing we have to a memoir by the boy from Lublin, Poland, who became one of the finest poets of the twentieth century.

A Journey Through the End of the Soviet Empire MDPI

The exploitation of biodiversity is essential to select resilient

genotypes for sustainable cropping systems as one of the main challenges for plant breeding. Mapping traits of agronomic interest in specific genomic regions appears as another pivotal effort for the future development of novel cultivars. For this purpose, there is evidence that MAGIC and other exotic populations will play a major role in the coming years in allowing for impressive gains in plant breeding for developing new generations of improved cultivars. This Special Issue focused on the application of advanced technologies devoted to crop improvement and exploit the available biodiversity in crops. In

detail, next-generation sequencing (NGS) technologies supported the development of high-density genotyping arrays for different plants included in this issue. Volume 2 Harry N Abrams Incorporated Comic strips tell the stories of a beautiful runaway, an arranged marriage, a hidden family treasure, and the reluctant chieftain of a Scottish clan Intercultural Communication LED Edizioni Universitarie A fior d'artell cantiere edile cremonese pre-industriale: prassi e glossario LED Edizioni Universitarie **Denatured Visions** Springer Science & Business Media Utopian thought and experimental approaches to societal organization have been

rare in the last decades of planning and politics. Instead, there is a widespread belief in ecological modernization, that sustainable societies can be created within the frame of the current global capitalist world order by taking small steps such as eco-labeling, urban densification, and recycling. However, in the context of the current crisis in which resource depletion, climate change, uneven development, and economic instability are seen as interlinked, this belief is increasingly being questioned and alternative developmental paths sought. This collection demonstrates how utopian thought can be used in a contemporary context,

as critique and in exploring desired futures. The book includes theoretical perspectives on changing global socio-environmental relationships and political struggles for alternative development paths, and analyzes micro-level practices in co-housing, alternative energy provision, use of green space, transportation, co-production of urban space, peer-to-peer production and consumption, and alternative economies. It contributes research perspectives on contemporary green utopian practices and strategies, combining theoretical and empirical analyses to spark discussions of possible futures.

The Glatstein

Chronicles John Wiley & Sons

Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods presents the concepts and details of applications of MADM methods. A range of methods are covered including Analytic Hierarchy Process (AHP), Technique for Order Preference by Similarity to Ideal Solution (TOPSIS), Višekriterijumsko Kompromisno Rangiranje (VIKOR), Data Envelopment Analysis (DEA), Preference Ranking METHod for Enrichment Evaluations (PROMETHEE), ELimination Et Choix Traduisant la Réalité (ELECTRE), Complex

PRoportional
 ASsessment (COPRAS),
 Grey Relational
 Analysis (GRA), UTility
 Additive (UTA), and
 Ordered Weighted
 Averaging (OWA). The
 existing MADM
 methods are improved
 upon and three novel
 multiple attribute
 decision making
 methods for solving
 the decision making
 problems of the
 manufacturing
 environment are
 proposed. The concept
 of integrated weights is
 introduced in the
 proposed subjective
 and objective
 integrated weights
 (SOIW) method and the
 weighted Euclidean
 distance based
 approach (WEDBA) to
 consider both the
 decision maker's
 subjective preferences
 as well as the
 distribution of the
 attributes data of the
 decision matrix. These
 methods, which use
 fuzzy logic to convert
 the qualitative
 attributes into the
 quantitative attributes,
 are supported by
 various real-world
 application examples.
 Also, computer codes
 for AHP, TOPSIS, DEA,
 PROMETHEE, ELECTRE,
 COPRAS, and SOIW
 methods are included.
 This comprehensive
 coverage makes
 Decision Making in
 Manufacturing
 Environment Using
 Graph Theory and
 Fuzzy Multiple
 Attribute Decision
 Making Methods a key
 reference for the
 designers,
 manufacturing
 engineers,
 practitioners,
 managers, institutes
 involved in both design
 and manufacturing

related projects. It is also an ideal study resource for applied research workers, academicians, and students in mechanical and industrial engineering.

From Molecules to

Man Open Road Media

Multiple Criteria

Decision Making

(MCDM) is all about

making choices in the

presence of multiple

conflicting criteria.

MCDM has become one

of the most important

and fastest growing

subfields of Operations

Research/Management

Science. As modern

MCDM started to

emerge about 50 years

ago, it is now a good

time to take stock of

developments. This

book aims to present

an informal,

nontechnical history of

MCDM, supplemented

with many pictures. It

covers the major developments in MCDM, from early history until now. It also covers fascinating discoveries by Nobel Laureates and other prominent scholars. The book begins with the

early history of MCDM,

which covers the roots

of MCDM through the

1960s. It proceeds to

give a decade-by-

decade account of

major developments in

the field starting from

the 1970s until now.

Written in a simple and

accessible manner, this

book will be of interest

to students,

academics, and

professionals in the

field of decision

sciences.

Psychological Sense

of Community

Springer Science &

Business Media

In this book, the

authors have explored

a series of different types of communities - moving from the basic idea of those based at a specific location all the way to virtual communities of the internet. A key feature of this book is the research focus that emphasizes the theory-driven analyses and the diversity of contexts in which sense of community is applied. The book will be of great interest to those concerned with understanding various forms of community and how communities can be mobilized to achieve wellbeing.

Plurality and Heterodox Ideas in Teaching and Research Edward Elgar Publishing

Advances and major investments in the field of neuroscience can enhance traditional behavioral science

approaches to training, learning, and other applications of value to the Army. Neural-behavioral indicators offer new ways to evaluate how well an individual trainee has assimilated mission critical knowledge and skills, and can also be used to provide feedback on the readiness of soldiers for combat. Current methods for matching individual capabilities with the requirements for performing high-value Army assignments do not include neuropsychological, psychophysiological, neurochemical or neurogenetic components; simple neuropsychological testing could greatly improve training success rates for these assignments.

Opportunities in Neuroscience for Future Army Applications makes 17 recommendations that focus on utilizing current scientific research and development initiatives to improve performance and efficiency, collaborating with pharmaceutical companies to employ neuropharmaceuticals for general sustainment or enhancement of soldier performance, and improving cognitive and behavioral performance using interdisciplinary approaches and technological investments. An essential guide for the Army, this book will also be of interest to other branches of military, national

security and intelligence agencies, academic and commercial researchers, pharmaceutical companies, and others interested in applying the rapid advances in neuroscience to the performance of individual and group tasks.

Grain Elevators in the American Landscape
World Scientific

This innovative book addresses the leadership and management challenges of maximising the contribution of universities to civil society both locally and globally. It does this by developing a model of the civic university as an academic concept, drawing out practical lessons for university management on how

to embed civic engagement in the heartland of the university. To this end, the contributors compare experiences and reports on a developmental process in eight institutions: University College London and Newcastle University in the UK, Amsterdam and Groningen Universities in the Netherlands, Aalto and Tampere Universities in Finland and Trinity College Dublin and Dublin Institute of Technology in Ireland. It will be of interest to academics of politics, public policy and management studies, as well as having relevance to policymakers in the field.

Catalogo generale della libreria italiana
 ... Columbia University Press

In *Mary, Woman and Mother* Fr. Francis Moloney studies the New Testament's presentation of Mary's person and role. After indicating the limits and strengths of a biblical study of Mary, he examines the Marian texts from the Letter of Paul to the Galatians, the Gospels of Mark, Matthew, and Luke, the Acts of the Apostles, and the Gospel of John. She is above all a woman and a mother. This book shows that in recognizing Mary as God's place of encounter with all that is most beautiful among women and men, we will gain access to the womanly, maternal face of God.

A Concrete Atlantis
Routledge

The aim of this book on the use of multiple criteria analysis in physical planning is to synthesize most of the relevant work in this field. Its first objective is to provide a concise and systematic overview of the state of the art in the area of multiple criteria analysis, with a strong emphasis on practical use and planning. Secondly, this book attempts to show the wealth of potential applications of multiple criteria analysis by providing a presentation and discussion of various

real-world uses of multiple criteria decision-making in the practice of physical planning. The book is mainly intended as a textbook for practitioners in the field and for students in the areas of (physical) planning, regional and urban economics, geography, transportation science and environmental management.

Managing Workforce 2000 MIT Press

In *Migrancy, Culture, Identity*, Iain Chambers unravels how our sense of place and identity is realised as we move through myriad languages, worlds and histories. The author explores the uncharted impact of cultural diversity on today's world, from the 'realistic' eye of the painter to the

'scientific' approach of the cultural anthropologist or the critical distance of the historian; from the computer screen to the Walkman and 'World Music'. Migrancy, Culture and Identity takes us on a journey into the disturbance and dislocation of culture and identity that faces all of us to explore how migration, marginality and homelessness have disrupted the West's faith in linear progress and rational thinking, undermining our knowledge, history and cultural identity.

In this, his second book, the author of *Carpediem* tells us about his studies, his passions, his research and his inventions. The *Connectivist* (Il *Connettivista*) is Claudio Ronco's personal story. It is the incredible journey of a doctor/scientist/humanist who thinks outside

the box.
History of Modern Architecture The Committee
"In the United States there is more space where nobody is than where anybody is", said Gertude Stein.
From the Midway area of Minneapolis to the prairie grasslands of Kansas, the American landscape is characterized by this spaciousness--and by the presence of windowless, rumbling, enormous grain elevators, rising above the steeples of churches to announce the presence of a town and to explain, in great measure, the function of its inhabitants. Why did their builders choose that particular form to fulfill a practical necessity? And how does the experience of great

emptiness shape what people think, feel, and do? Frank Gohlke, one of America's foremost photographers of landscape, has pondered and documented the relationship between these enormous structures and the emptiness of the surrounding landscape for the past two decades. The result is this evocative sequence of images, beginning with Gohlke's earliest formal studies of structural fragments and their mechanisms, and gradually expanding to depict the grain elevator as a part of the landscape. His

camera eventually retreats so far that the grain elevator disappears in the horizon, and only the landscape--the "space where nobody is"--is visible. Introducing the photographs is a personal essay by Gohlke on the relationship between people and their space, and the ways in which that relationship actually creates a landscape. A concluding historical essay by John C. Hudson details the development and function of the grain elevator and its geographical and economic role in American life.
