Proceedings of the Society for Experimental Biology and Medicine  
 The 1982 statistics on the use of family planning and infertility services presented in this report are preliminary results from Cycle III of the National Survey of Family Growth (NSFG), conducted by the National Center for Health Statistics. Data were collected through personal interviews with a multistage area probability sample of 7969 women aged 15-44. A detailed series of questions was asked to obtain relatively complete estimates of

the extent and type of family planning services received. Statistics on family planning services are limited to women who were able to conceive 3 years before the interview date. Overall, 79% of currently married nonsterile women reported using some type of family planning service during the previous 3 years. There were no statistically significant differences between white (79%), black (75%) or Hispanic (77%) wives, or between the 2 income groups. The 1982 survey questions were more comprehensive than those of earlier cycles of the survey. The annual rate of visits for family planning services in 1982 was 1077 visits /1000 women. Teenagers had the highest annual visit rate (1581/1000) of any age group for all sources of family planning services combined. Visit rates declined sharply with age from 1447 at ages 15-24 to 479 at ages 35-44. Similar declines with age also were found in the visit rates for white and black women separately. Nevertheless, the annual visit rate for black women (1334/1000) was significantly higher than that for white women (1033). The highest overall visit rate was for black women 15-19 years of age (1867/1000). Nearly 2/3 of all family planning visits were to private medical sources. Teenagers of all races had higher family planning service visit rates to clinics than to private medical sources, as did black women age 15-24. White women age 20 and older had higher visit rates to private medical services than to clinics. Never married women had higher visit rates to clinics than currently or formerly married women. Data were also collected in 1982 on use of medical services for infertility by women who had difficulty in conceiving or carrying a pregnancy to term. About 1 million ever married women had 1 or more infertility visits in the 12 months before the interview. During the 3 years before interview, about 1.9 million women had infertility visits. For all ever married women, as well as for white and black women separately, infertility services were more likely to be secured from private medical sources than from clinics. The survey design, reliability of the estimates and the terms used are explained in the technical notes.

### Nuclear Science Abstracts

Wail on your harmonica! The harmonica is one of the most popular and versatile instruments in the world. There are several reasons harmonicas are awesome—you can play them anywhere, they're inexpensive, and you can show off in dozens of musical styles. The friendly and pleasingly tuneful Harmonica For Dummies is the fastest and best way to learn for yourself! You'll find an easy-to-follow format that takes you from the basics to specialized techniques, with accompanying audio and video content included to make learning even more simple and fun. Before you know it, you'll be playing jazz in your living room and

the blues on your way to work or school—and that's just the prelude to mastering classical riffs. That's right, the humble harmonica has graced some of the grandest concert halls on planet Earth! Choose the right harmonica Enhance your sound with tongue technique Develop your own style Perfect your live performance The harmonica is awesome to learn, but even more awesome to learn well, and Harmonica For Dummies will get you on the road from being an occasional entertainer to becoming an accomplished live performer. P.S. If you think this book seems familiar, you're probably right. The Dummies team updated the cover and design to give the book a fresh feel, but the content is the same as the previous release of Harmonica For Dummies (9781118880760). The book you see here shouldn't be considered a new or updated product. But if you're in the mood to learn something new, check out some of our other books. We're always writing about new topics!
