'Crammed with practical exercises for anyone who wants to reclaim the power of spacing out' - Gretchen Rubin, author of #1 New York Times Bestseller The Happiness Project It's time to move 'doing nothing' to the top of your to-do list Have you ever noticed how you have your best ideas when doing the dishes or staring out the window? It's because when your body goes on autopilot, your brain gets busy connecting ideas and

solving problems. However in the modern world it often feels as though we have completely removed boredom from our lives; we are addicted to our phones, we reply to our emails twenty-four hours a day, tweet as we watch TV, watch TV as we commute, check Facebook as we walk and Instagram while we eat. Constant stimulation has become our default mode. In this easy to follow, practical book, award-winning journalist Manoush Zomorodi

explores the connection between boredom and original thinking, and will show you how to ditch your screens and start embracing time spent doing nothing. Spark will help you unlock the way to becoming your most productive and creative self. 'Full of easy steps to make each day more effective' - Charles Duhigg, author of The Power of Habit

I know something about you without knowing you. I bet you spend A LOT of

time in your head. You know, thinking, worrying, stressing, freaking out -- call it whatever you want. I call it a preoccupied mind. And with what? 99% of your thoughts are useless. William James, once the leading psychologist in America, and one of the founders of the philosophical school of pragmatism, put it best: "A great many people think they are thinking when they are merely rearranging their prejudices." Pragmatism believes that the mind is a tool. Your mind should

work for you, not against you. People who don't master their mind, don't believe it's possible. They say: "I can't help but thinking these things." Well, you can TAKE CONTROL of your mind with enough practice. I've done it. And in THINK STRAIGHT, I share exactly how. It's a quick read and you can use it to immediately to improve your thinking. You have the ability to decide what you think. Or, you can choose NOT to think. And that is one of the most important and most

practical things you can learn in life. Before I learned that skill, I would spend hours and hours inside my head. Just think about how much you think. - "I wonder what my boss thinks?" - "What happens if I screw up and lose my job?" - "What if my business never takes off?" - "Does she love me?" - "Why does my life suck?" - "What if I get cancer?" - "I can't finish anything. What's wrong with me? And the list goes on. THINK STRAIGHT reveals the recipe for taking control of your mind so

you can improve your life, career, relationships, business. I wrote this little book in a way that you can read it more than once. And I hope that this book serves as an anchor to you--especially during trying times. The mind is the most powerful tool on earth. Change the way you think. And you'll change your life.

A quarter of adolescents engage in some form of self-harm and even experienced therapists

can find working with these young people difficult. Based on Cognitive Behaviour Therapy (CBT), a highly effective method for working with emotional problems, Cutting Down offers a practical and accessible programme for mental health therapists from different professional backgrounds working with young people who self-harm. The programme is comprised of four parts, each covering a specific stage of therapy, and is split into 27 short modules. Although

designed to be delivered over a course of 14 sessions, the programme is presented in a way that allows the therapist to decide which combination of specific modules is chosen and how long is spent on each, based on the specific clinical needs of the person they are working with. Throughout the programme, virtual patients are used to illustrate the various exercises and strategies. Part One, What's Going On?, introduces self-harm and CBT and aims to develop insight into

feelings, problems, goals and the concept of change. Part Two, Feelings, Thoughts and Behaviour, looks at working on activities, managing depression and identifying and managing negative thoughts. Part Three, Coping Strategies, introduces modules on problem solving, assertiveness, mindfulness and alternatives to self-harm. Part Four, On You Go!, finishes up the programme with a review of goals, identifying triggers and developing a

'first aid kit' and a 'tool box' of skills to reinforce the programme. Downloadable worksheets enhance the practicality of the text. Designed to support clinicians working with adolescents engaging in self-harm, this unique workbook is ideal for counsellors, counselling psychologists, clinical psychologists, CBT therapists, IAPT practitioners, CAMHS mental health workers and nurse therapists as well as students and trainees. *Spark Lulu.com*

different than anyone else in his field, or as a matter of fact, in the world. He could have simply taken the road to success and had an illustrious career as a neurosurgeon with a model wife, four children and a beautiful home in the suburbs, but he wanted more and was driven by a force that could not be explained. A force to conquer the human brain and communicate with it in ways that would change the world as we know it today. His early experiments had already

proven that he could retrieve the memories of the dead, but now he had more ambitious goals. He was on a quest to capture the memories of the living and ultimately provide his subjects with new memories, all without harming them. Memories that he had retrieved from previous subjects. Unfortunately, he could have never predicted the casualties that would occur in the wake of his success.

I am an advocate of 'self-improvement, the straightening out process and the bigger picture where spirituality is concerned. Even though it may appear; I'm a controversial writer, the reality is: I only state clear and precise true facts. In

these modern times, I believe that too many people become seriously caught up in this 'global fast paced world' of technology. Most people are trapped in error. Many people don't creatively thrive. Many people are not consciously aware that they are programmed and conditioned to think in a humanistic robotic fast pace way. People become trapped in their ruts. The world is seriously confused. This is a world that is dangerously losing its way. Christian values

seriously need to be brought back into the world. In this book, I encourage hobbies and therapy techniques, for the purpose of logic and constructive thoughts. I also analyze conscious thought, open-mindedness and new awareness through natural logic and reasoning. In order for a person to break away from distracted error; (a person should use their own intelligence, logic and common sense, find out the absolute truth involving the facts; also

use Gods Wisdom; pray, be open minded, find true spiritual direction, also become self educated, learn new awareness & find graceful hope with God.) As a writer, I continue working towards the cause of: a better world. I created some amazing profound parts of this book, through divine providence granted to me from the grace of God.
