 Graphing Linear Functions
 4 Subtract 4.
 5 According to the graph, 6 should be a solution and 4 should not be a solution.
 Check: $x = 4$ $9x - 4 = 9(4) - 4 = 36 - 4 = 32$
 $9x - 4 = 9(6) - 4 = 54 - 4 = 50$
 So, 6 is in the solution set and 4 is not in the solution set. Thus, the solution set for the inequality $9x - 4 > 5$. Write true or false.
 1. $7 > 4 + 2$ 0 9
 3. $3 > 4$ Using the variable n , write the inequality

 4.1 Systems of Equations - Graphing

Objective: Solve systems of equations by graphing and identifying the point of intersection. We have solved problems like $3x - 4 = 11$ by adding 4 to both sides and then dividing by 3 (solution is $x = 5$). We also have methods to solve equations with more than one variable in them. 4.1 Systems of Equations - Graphing - CCfaculty.org Algebra I Practice F.IF.B.4: Graphing Linear Functions Page 2 www.jmap.org NAME: _____
