### CERVANTES SINGH

Artificial Intelligence in Education Journal of Contemporary Urban Affairs  
 After three decades of reform and opening up, China is closing its doors, clamping down on Western influence in the economy, media, and civil society. At the same time, President Xi Jinping has positioned himself as a champion of globalization, projecting Chinese power abroad and seeking to reshape the global order. Herein lies the paradox of modern China - the rise of a more insular, yet more ambitious China that will have a profound impact on both the country's domestic politics and its international relations. In The Third Revolution, eminent China scholar Elizabeth Economy provides an incisive look at the world's most populous country. Inheriting a China burdened with slowing economic growth, rampant corruption, choking pollution, and a failing social welfare system, President Xi has reversed course, rejecting the liberalizing reforms of his predecessors. At home, the Chinese leadership has reasserted the role of the state into society and enhanced Party and state control. Beyond its borders, Beijing has recast itself as a great power

and has maneuvered itself to be an arbiter - not just a player - on the world stage. Through an exploration of Xi Jinping's efforts to address top policy priorities - fighting corruption, controlling the internet, reforming state-owned enterprises, improving the country's innovation capacity, reducing the country's air pollution, and elevating its presence on the global stage - Economy identifies the tensions, shortcomings, and successes of Xi's first five years in office. Xi's ambition, she argues, provides new opportunities for the United States and the rest of the world to encourage greater Chinese contribution to global public goods but also necessitates a more proactive and coordinated effort to counter the rapidly expanding influence of an illiberal power within a liberal world order. This is essential reading for anyone interested in both China under Xi and how America and the world should deal with this vast nation in the coming years. Duke University Press  
 The Cunning of Gender Violence focuses on how a once visionary feminist project has folded itself into contemporary world affairs. Combating violence against women and gender-based violence constitutes a highly visible and powerful agenda enshrined in international governance and law and embedded in state violence and global securitization. Case studies on Palestine, Bangladesh,

Iran, India, Pakistan, Israel, and Turkey as well as on UN and US policies trace the silences and omissions, along with the experiences of those subjected to violence, to question the rhetoric that claims the agenda as a "feminist success story." Because religion and racialized ethnicity, particularly "the Muslim question," run so deeply through the institutional structures of the agenda, the contributions explore ways it may be affirming or enabling rationales and systems of power, including civilizational hierarchies, that harm the very people it seeks to protect. Contributors. Lila Abu-Lughod, Nina Berman, Inderpal Grewal, Rema Hammami, Janet R. Jakobsen, Shenila Khoja-Moolji, Vasuki Nesiiah, Samira Shackel, Sima Shakhari, Nadera Shalhoub-Kevorkian, Dina M Siddiqi, Shahla Talebi, Leti Volpp, Rafia Zakaria  
Advances in Swarm Intelligence Frontiers Media SA  
 This book constitutes the proceedings of the 8th International Conference on Statistical Language and Speech Processing, SLSP 2020, held in Cardiff, UK, in October 2020. The 13 full papers presented together with one invited paper in this volume were carefully reviewed and selected from 25 submissions. They cover the wide spectrum of statistical methods that are currently in use in computational language or speech processing.

**CALL in a climate of change: adapting to turbulent global conditions – short papers from EUROCALL 2017** Profile Books

This book examines contemporary Indigenous affairs through questions of relationality, presenting a range of interdisciplinary perspectives on the what, who, when, where, and why of Indigenous-settler relations. It also explores relationality, a key analytical framework with which to explore Indigenous-settler relations in terms of what the relational characteristics are; who steps into these relations and how; the different temporal and historical moments in which these relations take place and to what effect; where these relations exist around the world and the variations they take on in different places; and why these relations are important for the examination of social and political life in the 21st century. Its unique approach represents a deliberate move away from both settler-colonial studies, which examines historical and present impacts of settler states on Indigenous peoples, and from postcolonial and decolonial scholarship, which predominantly focuses on how Indigenous peoples speak back to the settler state. It explores the issues that inform, shape, and give social, legal, and political life to relations between Indigenous and non-Indigenous peoples, both in Australia and globally.

[Host cellular responses to viruses](#) Springer

In this new and updated volume, the contributors examine the phenomena of presidential swing states in the 2016 presidential election. They explore the reasons why some states and, now counties are the focus of candidate attention, are capable of voting for either of the major candidates, and are decisive in determining who wins the presidency.

**People Like Us** Springer Nature

Public ownership is more widespread and popular in the United States than is commonly understood. This book is the most comprehensive and up-to-date analysis of the scope and scale of U.S. public ownership, debunking frequent misconceptions about the alleged inefficiency and underperformance of public ownership and arguing that it offers powerful, flexible solutions to current problems of inequality, instability, and unsustainability— explaining why after decades of privatization it is making a comeback, including in the agenda of Jeremy Corbyn's Labour Party in Britain. Hanna offers a vision of deploying new forms of democratized public ownership broadly, across multiple sectors, as a key ingredient of any next system beyond corporate capitalism. This book is a valuable, extensively researched resource that sets out the past record and future possibilities of public ownership at a time when ever more people are searching for answers.

**Text, Speech, and Dialogue** Manchester University Press

This volume celebrates the twentieth anniversary of CLEF - the Cross-Language Evaluation Forum for the first ten years, and the Conference and Labs of the Evaluation Forum since - and traces its evolution over these first two decades. CLEF's main mission is to promote research, innovation and development of information retrieval (IR) systems by anticipating trends in information management in order to stimulate advances in the field of IR system experimentation and evaluation. The book is divided into six parts. Parts I and II provide background and context, with the first part explaining what is meant by experimental evaluation and the underlying theory, and describing how this has been interpreted in CLEF and in other internationally recognized evaluation initiatives. Part II presents research architectures and infrastructures that have been developed to manage experimental data and to provide evaluation services in CLEF and elsewhere. Parts III, IV and V represent the core of the book, presenting some of the most significant evaluation activities in CLEF, ranging from the early multilingual text processing exercises to the later, more sophisticated experiments on multimodal collections in diverse genres and media. In all cases, the focus is not only on describing "what has been achieved", but above all on "what has been learnt". The final part examines the impact CLEF has had on the research world and discusses current and future challenges, both academic and industrial, including the relevance of IR benchmarking in industrial settings. Mainly intended for researchers in academia and industry, it also offers useful insights and tips for practitioners in industry working on the evaluation and performance issues of IR tools, and graduate students specializing in information retrieval.

A new generation of technological vaccines protect against many infectious diseases. This book describes synthetic peptide-based vaccine prototypes - the future of vaccination. Production of peptides becomes simple using automatic synthesizers. Peptides are weak immunogen and need adjuvants to provide an effective autoimmune response, which is why peptide antigens are conjugated with biopolymers and loaded with nanoparticles. The book illustrates the use of peptides vaccine systems and makes predictions of future development not only for infectious diseases, but also for cancers and brain diseases such as Alzheimer, Parkinson and psychiatric diseases. Key Features Summarizes current studies on technological vaccines Describes the uses of vaccines for the prevention of brain diseases Reviews the ways different polymers are used to enhance vaccine efficacy

*The Third Revolution* Development Report on China's Court Informatization ,No. 1 [2017]

Until the recent political shift pushed workers back into the media spotlight, the mainstream media had largely ignored this significant part of American society in favor of the moneyed "upscale" consumer for more than four decades. Christopher R. Martin now reveals why and how the media lost sight of the American working class and the effects of it doing so. The damning indictment of the mainstream media that flows through No Longer Newsworthy is a wakeup call about the critical role of the media in telling news stories about labor unions, workers, and working-class readers. As Martin charts the decline of labor reporting from the late 1960s onwards, he reveals the shift in news coverage as the mainstream media abandoned labor in favor of consumer and business interests. When newspapers, especially, wrote off working-class readers as useless for their business model, the American worker became invisible. In No Longer Newsworthy, Martin covers this shift in focus, the loss of political voice for the working class, and the emergence of a more conservative media in the form of Christian television, talk radio, Fox News, and conservative websites. Now, with our fractured society and news media, Martin offers the mainstream media recommendations for how to push back against right-wing media and once again embrace the working class as critical to its audience and its democratic function.

The two-volume set LNAI 11431 and 11432 constitutes the refereed proceedings of the 11th Asian Conference on Intelligent Information and Database Systems, ACIIDS 2019, held in Yogyakarta, Indonesia, in April 2019. The total of 124 full papers accepted for publication in these proceedings were carefully reviewed and selected from 309 submissions. The papers of the first volume are organized in the following topical sections: knowledge engineering and semantic web; text processing and information retrieval; machine learning and data mining; decision support and control systems; computer vision techniques; and databases and intelligent information systems. The papers of the second volume are divided into these topical sections: collective intelligence for service innovation, technology management, E-learning, and fuzzy intelligent systems; data structures modelling for knowledge representation; advanced data mining techniques and applications; intelligent information systems; intelligent methods and artificial intelligence for biomedical decision support systems; intelligent and contextual systems; intelligent systems and algorithms in information sciences; intelligent supply chains and e-commerce; sensor networks and Internet of Things; analysis of image, video, movements and brain intelligence in life sciences; and computer vision and intelligent systems.

This two-volume set LNAI 12748 and 12749 constitutes the refereed proceedings of the 22nd International Conference on Artificial Intelligence in Education, AIED 2021, held in Utrecht, The Netherlands, in June 2021.\* The 40 full papers presented together with 76 short papers, 2 panels papers, 4 industry papers, 4 doctoral consortium, and 6 workshop papers were carefully reviewed and selected from 209 submissions. The conference provides opportunities for the cross-fertilization of approaches, techniques and ideas from the many fields that comprise AIED, including computer science, cognitive and learning sciences, education, game design, psychology, sociology, linguistics as well as many domain-specific areas. \*The conference was held virtually due to the COVID-19 pandemic.

**Human Language Technologies - The Baltic Perspective** Routledge

The two-volume set of LNCS 10385 and 10386, constitutes the proceedings of the 8th International Conference on Advances in Swarm Intelligence, ICSI 2017, held in Fukuoka, Japan, in July/August 2017. The total of 133 papers presented in these volumes was carefully reviewed and selected from 267 submissions. The paper were organized in topical sections as follows: Part I: theories and models of swarm intelligence; novel swarm-based optimization algorithms; particle swarm optimization; applications of particle swarm optimization; ant colony optimization; artificial bee colony algorithms; genetic algorithms; differential evolution; fireworks algorithm; brain storm optimization algorithm; cuckoo search; and firefly algorithm. Part II: multi-objective optimization; portfolio optimization; community detection; multi-agent systems and swarm robotics; hybrid optimization algorithms and applications; fuzzy and swarm approach; clustering and forecast; classification and detection; planning and routing problems; dialog system applications; robotic control; and other applications.

[Advances and Trends in Artificial Intelligence. Theory and Practices in Artificial Intelligence](#) Frontiers Media SA

A New Statesman Book of the Year AS HEARD ON BBC RADIO 4'S BOOK OF THE WEEK 'Hashi Mohamed powerfully exposes the alienating and segregating effect of social immobility in this country.' David Lammy 'A moving, shocking and clear-eyed account of the increasingly rare phenomenon of social mobility. Using his own extraordinary story as a spine [Hashi Mohamed] has written an analysis, how-to-guide and polemic on getting on and up in Britain today.' - Grayson Perry 'Beautifully written and powerfully argued, People Like Us is essential reading' The Secret Barrister What does it take to make it in modern Britain? Ask a politician, and they'll tell you it's hard work. Ask a millionaire, and they'll tell you it's talent. Ask a CEO and they'll tell you it's dedication. But what if none of those things is enough? Raised on benefits and having attended some of the lowest-performing schools in the country, barrister Hashi Mohamed knows something about social mobility. In People Like Us, he shares what he has learned: from the stark statistics that reveal the depth of the problem to the failures of imagination, education and confidence that compound it. We live in a society where the single greatest indicator of what your job will be is the job of your parents. Where power and privilege are concentrated among the 7 per cent of the population who were privately educated. Where, if your name sounds black or Asian, you'll need to send out twice as many job applications as your white neighbour. Wherever you are on the social spectrum, this is an essential investigation into our society's most intractable problem. We have more power than we realise to change things for the better.

*Information and Communications for Development 2018* Springer

Delays in implementing the Court's judgments, lack of political will in certain states parties, attempts to discredit the Court... In ratifying the European Convention on Human Rights, the signatory states accept the Court's jurisdiction and authority and "undertake to abide by the final judgment of the Court in any case to which they are parties" (Article 46 of the Convention). While certain member states have made real progress in implementing the judgments of the European Court of Human Rights, some others face serious structural and political problems forming real "pockets of resistance" that delay or prevent the execution of judgments. The Committee of Ministers is still supervising the execution of some 10 000 judgments, although they are not all at the same stage of implementation. This publication highlights the difficulties in implementing certain judgments encountered in the 10 countries which have the highest number of non-implemented judgments against them (Italy, the Russian Federation, Turkey, Ukraine, Romania, Hungary, Greece, Bulgaria, the Republic of Moldova and Poland). It also analyses judgments whose execution raises complex political issues.

**German-American Relations in the 21st Century** Routledge

2017 saw the 25th conference for the European Association of Computer-Assisted Language

Learning (EUROCALL). Every year, EUROCALL serves as a rich venue to share research, practice, new ideas, and to make new international friends – and this year was no different. It is an innovative and inspiring conference in which researchers and practitioners share their novel and insightful work on the use of technology in language learning and teaching. This volume of short papers captures the pioneering spirit of the conference and you will find here both inspiration and ideas for theory and practice.

**Multimedia and Network Information Systems** Rand Corporation

2016 2020 2016 3.0

**The Pragmatics of Text Messaging** Simon and Schuster

These proceedings collect papers presented at the 11th International Conference on Multimedia & Network Information Systems (MISSI 2018), held from 12 to 14 September 2018 in Wrocław, Poland. The keynote lectures, given by four outstanding scientists, are also included here. The Conference attracted a great number of scientists from across Europe and beyond, and hosted the 6th International Workshop on Computational Intelligence for Multimedia Understanding as well as four special sessions. The majority of the papers describe various artificial intelligence (AI)

methods applied to multimedia and natural language (NL) processing; they address hot topics such as virtual and augmented reality, identity recognition, video summarization, intelligent audio processing, accessing multilingual information and opinions, video games, and innovations in Web technologies. Accordingly, the proceedings provide a cutting-edge update on work being pursued in the rapidly evolving field of Multimedia and Internet Information Systems.

**Information Retrieval Evaluation in a Changing World** Routledge

Human language technology is the study of the methods by which computer programs or electronic devices can analyze, produce, modify or respond to human texts and speech. It consists of natural language processing and computational linguistics on the one hand, and speech technology on the other. This book presents the proceedings of the 9th International Conference, Human Language Technologies – The Baltic Perspective (Baltic HLT 2020), organised in Kaunas, Lithuania on 22 and 23 September 2020. This biennial conference offers researchers a platform to share knowledge on recent advances in human language processing for the Baltic languages, as well as promoting interdisciplinary and international cooperation in human language-technology research within and beyond the Baltic States. In addition to the traditional topics of natural language processing and language technologies, this year's conference featured a special session

on resource and tool development for teaching and learning the less resourced Baltic languages. This year, 42 submissions were received, each of which was evaluated by two reviewers, resulting in a total of 34 papers being accepted for presentation and publication. The book is divided into four sections: speech and text analysis (9 papers); machine translation and natural understanding (6 papers); tools and resources (14 papers); and language learning resources (5 papers). Providing a fascinating overview of current research in the field from a primarily Baltic perspective, the book will be of interest to all those whose work involves human language technology.

**In Deep Water** CQ Press

This book constitutes the refereed proceedings of the 26th International Conference on Text, Speech, and Dialogue, TSD 2023, held in Pilsen, Czech Republic, during September 4-6, 2023. The 31 full papers presented together with the abstracts of 3 keynote talks were carefully reviewed and selected from 64 submissions. The conference attracts researchers not only from Central and Eastern Europe but also from other parts of the world. One of its goals has always been bringing together NLP researchers with various interests from different parts of the world and promoting their cooperation. One of the ambitions of the conference is, not only to deal with dialogue systems but also to improve dialogue among researchers in areas of NLP, i.e., among the “text” and the “speech” and the “dialogue” people.
