The Business Executive's Approach to the Environment Greenwood Publishing Group  
*Mastering the Nikon D850* by Darrell Young provides a wealth of experience-based information and insights for owners of the new D850 camera. Darrell is determined to help the user navigate past the confusion that often comes with complex and powerful professional camera

equipment.

This book explores the features and capabilities of the camera in a way that far surpasses the user's manual. It guides readers through the camera features with step-by-step setting adjustments; color illustrations; and detailed how, when, and why explanations for each option. Every button, dial, switch, and menu configuration setting is explored in a user-friendly manner, with suggestions for setup according to various shooting styles.

Darrell's friendly and informative writing

style allows readers to easily follow directions, while feeling as if a friend dropped in to share his knowledge. The information in this book goes beyond the camera itself and also covers basic photography technique.

Interpreting Phula Variation Soffer Publishing

Beginning in 1952 each issue "with

cumulative totals from 1st January."

Appendix Butterworth-Heinemann

A practical guide to both the tools of environmental management and the ways they can be used to enhance a corporation's profitability while eliminating negative environmental impacts and consequent financial liabilities.

*Geological Survey Water-supply Paper*  
Rocky Nook, Inc.

Undertaking a broadscale experiment in theory and praxis, this book demonstrates grounds for insisting on a more integrational approach to dialectology while simultaneously demonstrating grounds for defining the hidden Phula languages of the Sino-Vietnam borderlands. The modern languages and their ancestral lineage are defined dialectically, through dynamic syntheses of correlative perspectives.

Vocabulary Mastering the Nikon Z7

This book is part of a five-volume set that explores sustainability in textile industry practices globally. Case studies are provided that cover the theoretical and practical implications of sustainable textile

issues, including environmental footprints of textile manufacturing, consumer behavior, eco-design in clothing and apparels, supply chain sustainability, the chemistry of textile manufacturing, waste management and textile economics. The set will be of interest to researchers, engineers, industrialists, R&D managers and students working in textile chemistry, economics, materials science, and sustainable consumption and production. This volume addresses the technologies and mechanical processes of textile production, and what sustainable methods can be employed to achieve improved safety and environmental health. The book covers sustainable aspects of printing, dyeing, coloration, weaving, knitting, tailoring, surface design and antimicrobial finishing for environmentally friendly textile and apparel products.

Block statistics McFarland

In marked contrast to the United States, with its territorial stability, some countries, such as Bulgaria and Ethiopia, reorganize their regional subdivisions frequently. This large-format reference work simplifies the comparison of decades' worth of data from such countries: "With this book in hand,

one can answer any administrative subdivision question about any state or province in the world from 1900 through 1998"—Abstracts of Public Administration, Development and Environment. For each country there is at least one table, and usually several. Histories of subdivision changes and lists of alternate names for subdivisions in each country add to the work's research value. All relevant national and international standards such as ISO and FIPS codes are listed, as well as time zones, populations, areas and capitals for each subdivision. There is a comprehensive index of names.

**Sustainability in the Textile and Apparel Industries**

Walter de Gruyter  
Pounder's Marine Diesel Engines and Gas Turbines, Tenth Edition, gives engineering cadets, marine engineers, ship operators and managers insights into currently available engines and auxiliary equipment and trends for the future. This new edition introduces new engine models that will be most commonly installed in ships over the next decade, as well as the latest legislation and pollutant emissions procedures. Since publication of the last edition in 2009, a number of emission

control areas (ECAs) have been established by the International Maritime Organization (IMO) in which exhaust emissions are subject to even more stringent controls. In addition, there are now rules that affect new ships and their emission of CO2 measured as a product of cargo carried. Provides the latest emission control technologies, such as SCR and water scrubbers Contains complete updates of legislation and pollutant emission procedures Includes the latest emission control technologies and expands upon remote monitoring and control of engines

""34000+ Spanish - Traditional Chinese  
Traditional Chinese - Spanish Vocabulary"  
- is a list of more than 34000 words translated from Spanish to Traditional Chinese, as well as translated from Traditional Chinese to Spanish. Easy to use- great for tourists and Spanish

speakers interested in learning Traditional Chinese. As well as Traditional Chinese speakers interested in learning Spanish.

*Dialectology as Dialectic* Springer

This book presents research advances in intelligent transportation and smart cities in detail, mainly focusing on green traffic and urban utility tunnels, presented at the 3rd International Symposium for Intelligent Transportation and Smart City (ITASC) held at Tongji University, Shanghai, on May 19-20, 2017. It discusses a number of hot topics, such as the 2BMW system (Bus, Bike, Metro and Walking), transportation safety and environmental protection, urban utility design and application, as well as the application of BIM (Building Information Modeling) in city design. By connecting the theory and applications of intelligent transportation in smart cities, it enhances traffic efficiency and quality. The book gathers numerous selected papers and lectures, including contributions from respected scholars and the latest engineering advances, to provide guidance to researchers in the field of transportation and urban planning at universities and in related industries. The first conference in the ITASC series started

in 2013 as a workshop of The International Symposium on Autonomous Decentralized System (ISADS), held in Mexico City, and the second was held in May 2015, in Tongji University, Shanghai.
