Introduction to Human Development and Family Studies
Routledge

In the last 35 years, governments around the globe have increasingly contracted with nonprofit and for-profit entities designed to provide a portion of the public sector's portfolio of goods and services. This trend can be traced to a variety of factors, including perceived or actual economic efficiencies in outsourcing goods and services, values concerning the role and size of government in society, and the financial and organizational constraints of many government entities. In the United States, child welfare services adopted a pro-contracting approach early, and a variety of other human services have followed suit, including mental health care, job training, homeless services and others. Although there is strong evidence to suggest that human service contracting is growing over time, scholarship continues to lag on topics related to human service contract management, policy implementation and innovation, performance-based contracting and evaluation. This new volume in the Public Solutions Handbook series is the first volume-length treatment of human services contracting issues, integrating both policy and practice, and exploring a broad range of issues that includes the fields of history, growth, innovations, results and outcomes, best practices and the future of government human service contracting. Chapters in this book examine specific human service contracts, both in the U.S. and abroad, geared to practitioners in the public sector—from local government service contractors to municipal employees—as well as MPA students and those enrolled in courses on intergovernmental relations and nonprofit management.

An Introduction to Music Psychology Rowman & Littlefield

This is a revised edition of *Theory and Practice in Health and Social Welfare* which was well received on its first publication: "Throughout the book the writing is stimulating and thought provoking. The author repeatedly demonstrates a good capacity for synthesizing and summarizing in an accessible manner a range of material which is drawn from many sources ... encourages the critical questioning that is vitally necessary for those practitioners, educators and trainers who struggle with the elusive and demanding topic of linking theory and practice as a significant part of their working lives." - *British Journal of Social Work* "...a substantial contribution to the demystification of theoretical and practical issues surrounding health and social welfare" - *Nursing Times* Relating theory to practice is a long-standing concern in the human services. The first edition of this book helped readers appreciate the complexities of many of the key issues surrounding the integration of theory and practice. This revised and updated edition builds on that success, covering the latest developments in the relationship between theory and

practice. The altered title reflects the widened focus of the book which now considers not just social work and social care, nursing and healthcare, but also areas such as probation and community justice, youth and community work, counselling, advocacy and advice work. *Theory and Practice in Human Services* argues a case for making theory relevant to practice and ensuring that practice is informed by theory in an open, non-dogmatic way. The book is critical of approaches to theory which create a mystique and barriers to understanding. Equally, approaches to practice which neglect the underpinning knowledge base and values are presented as fundamentally flawed and dangerous. The book offers an integrated approach to theory and practice geared towards improving practice, increasing job satisfaction and promoting an attitude of continuous learning and development. The new edition has been substantially re-worked to make it even more accessible to a wide readership. It now contains structural devices to aid learning, a glossary and self test questions. It will be invaluable to students and practitioners in social work, nursing and other human services.

A Guide for Students of the Social and Behavioral Sciences Pearson

Introduction to Human Development and Family Studies is the first text to introduce human development and family studies (HDFS) as inextricably linked areas of study, giving students a complex yet realistic view of individuals and families. Pioneers of research paradigms have acknowledged that the family is one setting in which human development occurs. Moreover, in many academic programs, the lines of these two disciplines blur and much work is inherently multidisciplinary and interdisciplinary. This book helps to fortify an understanding of HDFS and subareas within it. Vignettes from current HDFS students as well as new professionals, an overview of the lifespan stage(s) within the family context, a wide description of research methods and applications, current policy issues relevant to the area, and discussions of practice/careers coupled with strategies for pursuing specializations or careers in the area are hallmarks of this textbook. Introduction to Human Development and Family Studies is essential reading for students new to the major and minor wanting to know: What is HDFS? Who are the people involved in HDFS? Why is HDFS important? How does theory and research inform work in HDFS? What does the pursuit of being an ethical professional require? What are the key areas in HDFS? Incredibly user-friendly both on the page and online, the text also features the following resources: Chapter Summaries where the main points of each chapter are pinpointed at the end of every

chapter for review and study. Key Terms listed and defined within the margins of every chapter, a complete Glossary at the end of the text, and Flashcards online for additional review and study. Challenge: Integration section at the end of each chapter that underscores concepts from the chapter and draws connections between content presented in other chapters. Journal Questions to encourage reflection about the content and encourage thinking about some of the content coupled with students' own experiences. Suggested Resources that lists relevant websites, books, articles, and video links for further study. A Closer Look at Applied Experiences Appendix outlines the internship process and shows how the internship experience can be meaningful and useful, and a Consuming Research Appendix that focuses on what it means to be a consumer of research, the knowledge and skills consumers need, and considerations for transitioning from a consumer of research to a producer of research.

Generalist Case Management Workbook CRC Press

In *Restorative and Responsive Human Services*, Gale Burford, John Braithwaite, and Valerie Braithwaite bring together a distinguished collection providing rich lessons on how regulation in human services can proceed in empowering ways that heal and are respectful of human relationships and legal obligations. The human services are in trouble: combining restorative justice with responsive regulation might redeem them, renewing their well-intended principles. Families provide glue that connects complex systems. What are the challenges in scaling up relational practices that put families and primary groups at the core of health, education, and other social services? This collection has a distinctive focus on the relational complexity of restorative practices. How do they enable more responsive ways of grappling with complexity than hierarchical and prescriptive human services? Lessons from responsive business regulation inform a re-imagining of the human services to advance wellbeing and reduce domination. Readers are challenged to re-examine the perverse incentives and contradictions buried in policies and practices. How do they undermine the capacities of families and communities to solve problems on their own terms? This book will interest those who harbor concerns about the creep of domination into the lives of vulnerable citizens. It will help policymakers and researchers to re-focus human services to fundamental outcomes at the foundation of sustainable democracies.
