In view of the prolonged financial meltdown and the resulting
clash of socio-economic interests, both between nations and
within societies, unforeseen challenges have to be met by
contemporary managers. The current organizational, financial,

political and social situation calls for innovative, out-of-the-box solutions, while also presenting a unique "opportunity" for management scholars, practitioners and policy makers to work out and bring forward creative and imaginative, as well as realistic, responses to problems. Appealing to scholars, students, researchers and practitioners, and covering a wide spectrum of organizational types and institutions, this book provides scientific evidence, direction and insight on issues associated with confronting challenges related to the contemporary socio-economic scenario. In this respect, the presents conceptual and empirical research, putting forward a wide range of paradigms and ideas transcending conventional theory, on finding innovative solutions to contemporary business and managerial challenges. It brings forward contemporary theoretical underpinning across an array of sectors and organizational structures, while also presenting their practical implementations -

Magic will make you invincible. If it doesn't kill you first. In a world where magic is punishable by death, brothers Aric and Fadan stumble upon a mysterious, ancient book - A Manual of Magic. They are faced with a choice: take the book straight to the Emperor or see if one of them has the forbidden magical Talent. A decision that will change their lives, and the Empire itself, forever. The brothers are swept away, sent to opposite ends of

the world, one to train as a Dragon Hunter while the other taps into magical powers that could spell his execution. Dark forces are moving in the shadows, and while the nobility whispers of rebellion, an ancient evil, long thought gone, is about to awaken. Can Aric and Fadan save the Empire? Will they survive to ever see each other again?

"A beautiful, absorbing, tragic book."—Larry McMurtry In 1851, a war began in what would become Yosemite National Park, a war against the indigenous inhabitants. A century later—in 1951—and a hundred and fifty miles away, another war began when the U.S. government started setting off nuclear bombs at the Nevada Test Site. It was called a nuclear testing program, but functioned as a war against the land and people of the Great Basin. In this foundational book of landscape theory and environmental thinking, Rebecca Solnit explores our national Eden and Armageddon and offers a pathbreaking history of the west, focusing on the relationship between culture and its implementation as politics. In a new preface, she considers the continuities and changes of these invisible wars in the context of our current climate change crisis, and reveals how the long arm of these histories continue to inspire her writing and hope.

Do you want to understand Neural Networks and learn everything about them but it looks like it is an exclusive club? Are you fascinated by Artificial Intelligence but you think that it would be too difficult for you to learn? If you think that Neural Networks and Artificial Intelligence are the present and, even more, the future of technology, and you want to be part of it... well you are in the right place, and you are looking at the right book. If you are reading these lines you have probably already noticed this: Artificial Intelligence is all around you. Your smartphone that suggests you the next word you want to type, your Netflix account that recommends you the series you may like or Spotify's personalised playlists. This is how machines are learning from you in everyday life. And these examples are only the surface of this technological revolution. Either if you want to start your own AI enterprise, to empower your business or to work in the greatest and most innovative companies, Artificial Intelligence is the future, and Neural Networks programming is the skill you want to have. The good news is that there is no exclusive club, you can easily (if you commit, of course) learn how to program and use neural networks, and to do that Neural Networks for Beginners is the perfect way. In this book you will learn: The types and components of neural networks The smartest way to approach neural network programming Why

Algorithms are your friends The "three Vs" of Big Data (plus two new Vs) How machine learning will help you making predictions The three most common problems with Neural Networks and how to overcome them Even if you don't know anything about programming, Neural Networks is the perfect place to start now. Still, if you already know about programming but not about how to do it in Artificial Intelligence, neural networks are the next thing you want to learn. And Neural Networks for Beginners is the best way to do it. Download Neural Network for Beginners now to get the best start for your journey to Artificial Intelligence. See the art that helped create the Grammy Award-nominated music video Do the Evolution by legendary band Pearl Jam, a Rock and Roll Hall of Fame 2017 inductee. Drawing inspiration from the Grammy Award-nominated music video of the same name, Do the Evolution takes fans inside this unforgettable work of art. Directed by visionary comics legend Todd McFarlane (Spawn) and veteran animator Kevin Altieri (Batman: The Animated Series), this achievement in animation told a graphic and dark history of the world in four gripping minutes and is widely considered one of the best music videos of all time. Now, the full story of the making of this historic video will be told. Lushly illustrated by the video's striking animation cells with never before seen storyboards and designs from the video, the video's co-producer, Joe Pearson, will guide readers through the fascinating process of bringing the band's vision to life in this one-of-a-kind art book.

This SpringerBrief deals with the control and optimization problem in hybrid electric vehicles. Given that there are two (or

more) energy sources (i.e., battery and fuel) in hybrid vehicles, it shows the reader how to implement an energy-management strategy that decides how much of the vehicle's power is provided by each source instant by instant. Hybrid Electric Vehicles: •introduces methods for modeling energy flow in hybrid electric vehicles; •presents a standard mathematical formulation of the optimal control problem; •discusses different optimization and control strategies for energy management, integrating the most recent research results; and •carries out an overall

comparison of the different control strategies presented. Chapter by chapter, a case study is thoroughly developed, providing illustrative numerical examples that show the basic principles applied to real-world situations. The brief is intended as a straightforward tool for learning quickly about state-of-the-art energy-management strategies. It is particularly well-suited to the needs of graduate students and engineers already familiar with the basics of hybrid vehicles but who wish to learn more about their control strategies.
