Winner • Edgar Award (Best Fact Crime) Winner • Lambda Literary's Judith A. Markowitz Award for Emerging LGBTQ Writers Finalist • Housatonic Book Award (Nonfiction) Finalist • Randy Shilts Award for Gay Nonfiction A Stonewall Honor Book in Nonfiction (American Library Association) Best Book of the Year: Kirkus Reviews, Library Journal and Shelf Awareness An essential work of American civil rights history, *Tinderbox* mesmerizingly reconstructs the 1973 fire that devastated New Orleans' subterranean gay community. Buried for decades, the Up Stairs Lounge tragedy has only recently emerged as a catalyzing event of the gay liberation movement. In revelatory detail, Robert W. Fieseler chronicles the tragic event that claimed the lives of thirty-one men and one woman on June 24, 1973, at a New Orleans bar, the largest mass murder of gays until 2016. Relying on unprecedented access to survivors and archives, Fieseler creates an indelible portrait of a closeted, blue-collar gay world that flourished before an arsonist ignited an inferno that destroyed an entire community. The aftermath was no less traumatic—families ashamed to claim loved ones, the Catholic Church refusing proper burial rights, the city impervious to the survivors' needs—revealing a world of toxic prejudice that thrived well past Stonewall. Yet the impassioned activism that followed proved essential to the emergence of a fledgling gay movement. *Tinderbox* restores honor to a forgotten generation of civil-rights martyrs.

### The Untold Story of Champ Lexington Books

The definitive account of a Lake Champlain legend. "The lake surface was glass. My girlfriend and I were fishing from our anchored rowboat in about fifteen feet of water, facing the New York shore. 'Ron, what's that?' I turned. About thirty feet away I saw three dark humps ... protruding about two feet above the surface. The humps were perhaps two or three feet apart. They didn't move. We didn't either. We watched in disbelief for about ten seconds. The humps slowly sank into the water. There was no wake, no telltale sign of movement. Unexplained. Eerie. Unsettling." — from the Foreword by Ronald S. Kermani Scotland may have Nessie, the Loch Ness Monster, but we have Champ, the legendary serpent-like monster of Lake Champlain. The first recorded sighting of Champ, in 1609, has been attributed to the lake's namesake, French explorer and cartographer Samuel de Champlain. This is pure myth, but there have been hundreds of sightings since then. Robert E. Bartholomew embarks on his own search, both of the lake firsthand and through period sources and archives—many never before published. Although he finds the trail obscured by sloppy journalism, local leaders motivated by tourism income, and bickering monster hunters, he weighs the evidence to craft a rich, colorful history of Champ. From the nineteenth century, when Champ was a household name, to 1977, when he appeared in Sandra Mansi's controversial photograph, Bartholomew covers it all. Real or imaginary, Champ and his story will fascinate believers and

skeptics alike. Robert E. Bartholomew is a native New Yorker who teaches history at Botany College in Auckland, New Zealand. His many books include *The Martians Have Landed! A History of Media-Driven Panics and Hoaxes* (with Benjamin Radford) and *Outbreak! The Encyclopedia of Extraordinary Social Behavior* (with Hilary Evans).

Did Jesus exist? In recent years there has been a massive upsurge in public discussion of the view that Jesus did not exist. This view first found a voice in the 19th century, when Christian views were no longer taken for granted. Some way into the 20th century, this school of thought was largely thought to have been utterly refuted by the results of respectable critical scholarship (from both secular and religious scholars). Now, many unprofessional scholars and bloggers ('mythicists'), are gaining an increasingly large following for a view many think to be unsupportable. It is starting to influence the academy, more than that it is starting to influence the views of the public about a crucial historical figure. Maurice Casey, one of the most important Historical Jesus scholars of his generation takes the 'mythicists' to task in this landmark publication. Casey argues neither from a religious perspective, nor from that of a committed atheist. Rather he seeks to provide a clear view of what can be said about Jesus, and of what can't.

There is no doubt that behavioral economics is becoming a dominant lens through which we think about economics. Behavioral economics is not a single school of thought but representative of a range of approaches, and uniquely, this volume presents an overview of them. The wide spectrum of international contributors each provides an exploration of a central approach, aspect or topic in behavioral economics. Taken together, the whole volume provides a comprehensive overview of the subject which considers both key developments and future possibilities. Part One presents several different approaches to behavioural economics, including George Katona, Ken Boulding, Harvey Leibenstein, Vernon Smith, Herbert Simon, Gerd Gigerenzer, Daniel Kahneman, and Richard Thaler. This section looks at the origins and development of behavioral economics and compares and contrasts the work of these scholars who have been so influential in making this area so prominent. Part Two presents applications of behavioural economics including nudging; heuristics; emotions and morality; behavioural political economy, education, and economic innovation. The Routledge Handbook of Behavioral Economics is ideal for advanced economics students and faculty who are looking for a complete state-of-the-art overview of this dynamic field.

*Power, Politics and Society: An Introduction to Political Sociology* discusses how sociologists have organized the study of politics into conceptual frameworks, and how each of these frameworks foster a sociological perspective on power and politics in society. This includes discussing how these frameworks can be applied to understanding current issues and other "real life" aspects of politics. This second edition incorporates new material on cultural divides in American politics, emerging roles for the state, the ongoing effects of the Great Recession and recovery, the 2016 election, social media, and the various policies introduced during the Trump administration and how they affect people's lives.

Qatar is a country of spectacular contrasts: from pearl fishing, its main industry until the 1930s, to gas and oil, which generate immense wealth today; to famously being at the center of both triumph and controversy in recent years for hosting the 2022 FIFA World Cup. Almost a lifetime since he grew up in Qatar, Michael Quentin Morton writes about the country's colorful past and its astonishing present. The book is filled with stories about the people of this land: the tribes and the travelers, the seafarers and slaves—as much a part of Qatar's history as its rulers and their wealth. The opaque Arabian world guards its secrets well, but *Masters of the Pearl* penetrates the veil to shed light on a country that until now has defied explanation.

*Culture and Cultural Politics Under Reza Shah* presents a collection of innovative research on the interaction of culture and politics accompanying the vigorous modernization programme of the first

Pahlavi ruler. Examining a broad spectrum of this multifaceted interaction it makes an important contribution to the cultural history of the 1920s and 1930s in Iran, when, under the rule of Reza Shah Pahlavi, dramatic changes took place inside Iranian society. With special reference to the practical implementation of specific reform endeavours, the various contributions critically analyze different facets of the relationship between cultural politics, individual reformers and the everyday life of modernist Iranians. Interpreting culture in its broadest sense, this book brings together contributions from different disciplines such as literary history, social history, ethnomusicology, art history, and Middle Eastern politics. In this way, it combines for the first time the cultural history of Iran's modernity with the politics of the Reza Shah period. Challenging a limited understanding of authoritarian rule under Reza Shah, this book is a useful contribution to existing literature for students and scholars of Middle Eastern History, Iranian History and Iranian Culture.

*Addressing Ableism* is a set of philosophical meditations outlining the scale and scope of ableism. By explicating concepts like experience, diagnosis, precariousness, and prosthesis, Scuro maps out the institutionalized and intergenerational forms of this bias as it is analogous and yet also distinct from other kinds of dehumanization, discrimination, and oppression. This project also includes a dialogical chapter on intersectionality with Devonya Havis and Lydia Brown, a philosopher and writer/activist respectively. Utilizing theorists like Judith Butler, Tobin Siebers, Emmanuel Levinas, and Hannah Arendt to address ableism, Scuro thoroughly critiques the neoliberal culture and politics that underwrites ableist affections and phobias. This project exposes the many material and non-material harms of ableism, and it offers multiple avenues to better confront and resist ableism in its many forms. Scuro provides crucial insights into the many uninhabitable and unsustainable effects of ableism and how we might revise our intentions and desires for the sake of a less ableist world.
