A provocative look at the “cult of pedigree” and an entertaining social history of purebred dogs In this illuminating and entertaining social history, social critic Michael Brandow probes the “cult of pedigree” and traces the commercial rise of the purebred dog. Combining consumer studies with sharp commentary, *A Matter of Breeding* reveals the sordid history of the dog industry and shows how our brand-name pets—from Labs to French bulldogs and everything in between—pay the price with devastatingly poor health. From the Trade Paperback edition.

The Book of the Horse A Matter of Breeding

"A gathering chiefly of talks given either by invitation or at conferences throughout the world over the last quarter century. The topics range widely, but recurrent themes include the place of classical music in contemporary society and culture, the fraught relationship between aesthetics and ethics, and the responsibilities of scholarship in an age of spin"--

THE PRACTICAL KENNEL GUIDE WITH PLAIN INSTRUCTIONS ON HOW TO REAR AND BREED DOGS FOR PLEASURE, SHOW, AND PROFIT By Gordon Stables. M.D. A VINTAGE DOG BOOKS CLASSIC REPRINT Originally published in 1875, this extremely scarce early work on dog breeding and showing, is both expensive and hard to find in any edition. VINTAGE

DOG BOOKS have republished it, using the original text and engravings, as part of their CLASSIC BREED BOOKS series. The author was a well known dog man who wrote this book with the benefit of his many years experience in breeding and showing. Much of the information published here was previously little known to the dog world and was warmly welcomed, especially by show dog enthusiasts. It's two hundred and four pages consist of nineteen comprehensive chapters, each nicely illustrated with early engravings: Origins of the Different Breeds. - Words and Phrases used in the Fancy. - First Lessons in Caniology. - The Points of Field Dogs. - The Points of Guard Dogs. - The Points of Terriers. - The Points of Toy or Fancy Dogs. - The Points of Utility and

Working Dogs. - Hints on Purchasing Dogs. - Management of Stud Dogs. - Management of Show Dogs. - Faking, and Tricks of the Show Ring. - Breeding for Pleasure and Profit. - Discussions on the Breeds. - A Breeder's and Exhibitors Non-Sporting Kennel. - Dogs and the Law. Etc. This is a fascinating insight to the early world of dogs and dog shows, and will prove of great interest to all dog lovers and historians of the various breeds. It also contains much information that is still useful and practical today. Many of the earliest dog breed books, particularly those dating back to the 1900's and before, are now extremely scarce and increasingly expensive. VINTAGE DOG BOOKS are republishing these classic works in affordable, high quality, modern

editions, using the original text and artwork.

The Practical Kennel Guide with Plain Instructions on How to Rear and Breed Dogs for Pleasure, Show, and Profit Bloomsbury Academic

First published in 1928, this volume contains a timeless guide to breeding animals, with a special focus on breeding to type. Type breeding refers to breeding animals in order to produce traits that define certain breeds or are particularly desirable, with such characteristics usually being the basis for animal shows and competitions. This profusely-

illustrated guide deals with all manner of animals ranging from dogs to cattle, and it will be of considerable utility to anyone with an interest in the subject. Contents include: "Breeding to Type", "False Doctrines", "Pedigree", "Modern Heredity", "Mendelism", "Establishing a Strain", "Inbreeding", "Methods of Mating", "Colour", "Heredity and Disease", "Early Maturity", "Sterility", etc. Many vintage books such as this are increasingly scarce and expensive. It is with this in mind that we are republishing this volume now in an affordable, modern, high-quality edition complete with a specially-commissioned new introduction on farming.

Webber, State College of Agriculture. In considering this subject one of the things I think we ought to do is to compare plant and animal breeding, and some of the fundamental differences' between them. We are more familiar with animal breeding than we are with plant breeding. In the case of animal breeding one seldom hears of a man attempting to breed a new race. The production of a new race of animals is so rare that it is a matter of history. Ordinarily speaking, we are satisfied with the dairy herd at the present time, taking the various breeds which already exist. In the case

of any of our standard breeds the selection of the individual breeder is ordinarily within the confines of that race. The different individuals of the race vary considerably and the breeder is engaged in selecting the best. The plant breeder, on the contrary, ordinarily strives to produce new races or breeds, differing from the known sorts in some important characters, by which the new variety or race may be recognized. The new varieties or races of the plant breeder would correspond to the different breeds of animals. If a breeder produces a new type of wheat he wants some new character. He breeds to get some distinguishing characters, so that the main differences between the two types of breeding is that the animal breeder is breeding to develop strains

within the race, while the plant breeder is breeding to develop new races or varieties. The striving after markedly new varieties has led the plant breeder to largely overlook the advancement that may be wrought within the variety by pedigree breeding. The plant breeder can handle thousands where the 'animal breeder handles tens. The plant breeder crosses different strains; he takes the most adverse things, t...

This book is the first to analyze the compliance of different types of a breeder's exception to patent rights with article 30 of the Agreement on Trade-

Related Aspects of Intellectual Property Rights. This type of exception allows using protected biological matter for breeding new varieties of plants. The breeder's exception is widely accepted under plant variety legislation, but it is not common under patent laws despite the fact that patent rights often cover plant varieties. Only few European countries have adopted such an exception. After the entry into force of the Agreement on a Unified Patent Court, the exception will be mandatory for all European Union Member states. Based on a legal and economic approach, this book offers guidance to those countries that need to incorporate a breeder's exception into their national patent systems and suggests the importance of the exception for

promoting plant breeding activities.

Lawyer and private enquiries agent Karl Werthen accepts an assignment to protect the famous Irish writer Bram Stoker while on a speaking tour of Vienna. Meanwhile, his colleague, renowned criminologist Dr Hanns Gross

has been called away to advise on a bizarre series of murders near his hometown of Graz, in the Austrian province of Styria. Three women have been killed with strange mutilations and scarring patterns left on their bodies. The third, most recent victim has had her unborn baby cut out of her womb. Clues have been left at each scene; clues that have been clearly mentioned in Gross's handbook for magistrates, Criminal Investigation. A coincidence? Dr Gross thinks not. Meanwhile, back in Vienna, Werthen's wife Berthe is investigating what seems to be a fraudulent breeding scheme involving the prized Lipizzaner horses. Could the two investigations possibly be connected? Matters become complicated with Werthen and Stoker's arrival in

Graz. For, having read wild newspaper accounts of vampire killings, the Dracula author insists they investigate.

PREFACE. THE Author of this very

practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes. The Author need hardly say that any suggestions addressed to the case of the

publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when we say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is depend- ent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a

day, weeks beforehand whereas the stream- fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, -such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing

is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler.

Well, we don't deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...
