Renowned valuation expert Aswath Damodaran reviews the core tools of valuation, examines today's most difficult estimation questions and issues, and then systematically addresses the valuation challenges that arise throughout a firm's lifecycle in *The Dark Side of Valuation: Valuing Young, Distressed and Complex Businesses*. In this thoroughly revised edition, he broadens his perspective to consider all companies that resist easy valuation, highlighting specific types of hard-to-value firms, including commodity firms, cyclical companies, financial services firms, organizations dependent on intangible assets, and global firms operating diverse businesses. He covers the entire corporate lifecycle, from "idea" and "nascent growth" companies to those in decline and distress, and offers specific guidance for valuing technology, human capital, commodity, and cyclical firms.

Understanding Strategic Management is the ideal introduction to strategy for students who require a concise, informative and practical approach. The book's four-part structure defines the concept of strategy, before using the overarching strategic framework of analysis, formulation, and implementation to show how strategy can be used to develop a sustainable competitive advantage in business. The author conveys the realities of strategic management through diverse, international and contemporary examples, while Strategy in Focus boxes use examples from popular media to show strategic management issues at work in the headlines we read every day. A longer, integrated case study in every chapter ties together multiple strategic challenges that affect businesses large and small, public and private. Review and discussion questions then encourage students to be critical of the material and juxtapose alternative concepts and frameworks to evaluate their strengths and weaknesses. Students may extend their learning with additional material available as part of the online resources. Written by the author to build seamlessly on the book, Extension Material is signposted from every chapter, providing further depth on a specific topic where required. Multiple choice questions are also signposted at the end of every chapter, encouraging students to test their knowledge and understanding. The rounded approach, extensive examples, and additional resources make this book a balanced and accessible introduction for students taking their first steps into strategic management. The ebook offers a mobile experience and convenient access: www.oxfordtextbooks.co.uk/ebooks The online resources include: For students: Internet exercises Glossary Extension material Working through strategy Multiple-choice questions Additional recommended resources For lecturers: Bank of additional case studies Additional discussion questions and prompts Test bank Further case material Answers to discussion questions PowerPoint slides Figures and tables from the book

This text presents an accessible introduction to techniques and applications of economic analysis and financial accounting as a method for approaching real-life business problems for managerial decision making in a logical manner. It focusses on the essential skills needed to formulate business policies that help gain a competitive edge in today's work environment. The book discusses the basic concepts, terminology, and methods that eventually allow students to interpret, analyse, and evaluate actual corporate financial statements. It covers the major areas of managerial economics and financial accounting such as the theory of the firm, the demand theory and forecasting, the production and cost theory and estimation, the market structure and pricing, investment analysis, accountancy, and different forms of business organisations. The book includes numerous examples, problems, self-assessment tests, as well as review questions at the end of each chapter to aid in working out solutions to business problems. The book will be particularly suitable for courses in Managerial Economics and Financial Accounting as part of an engineering degree education at undergraduate level where the students have no previous back-ground in economic and financial analysis. It will also be immensely useful for M.B.A., M.Com. and C.A. students, business executives, and administrators who need to learn the application of economic theory to realistic business situations.

Primarily intended for the postgraduate students of commerce and management, this compact text covers all the topics prescribed in almost all universities and autonomous institutes in India. Each concept is explained with the help of many real-life examples from the Indian context. Considering the fact that the understanding of the concept of strategic intent is prerequisite to the understanding of strategic management, the chapter on strategic intent is included which brings out the differences between various elements of strategic intent. It also covers the current happenings in the businesses from the Indian context. Similarly, a topic on strategic choice has been discussed at length because of the fact that BCG growth-share matrix and GE nine-cell matrix are extremely useful in making a strategic decision in real life. Besides, the book contains ten case studies on various topics of strategic management such as environmental appraisal, critical success factors, SWOT analysis, strategic intent, strategic choice, business level strategy formulation and choice of growth strategy. All these cases are provided with authentic industry specific data. Firms are chosen from different businesses thereby giving business-specific flavour and a broad understanding of various business domains.
