Students with disabilities who are not able to perform to the best of their abilities often find themselves learning in inaccessible environments and subjected to increased stress levels due to the haphazard provisioning of education characterized by physical, communicative, and unsuitable teaching and learning approaches. Very often this is a result of various shortcomings including unfair assessment practices. Misconceptions and a lack of knowledge with regard to the implementation of inclusive education detract from the successful admission of students with disabilities and their

retention and active participation. The Handbook of Research on Creating Spaces for African Epistemologies in the Inclusive Education Discourse explores the concept of inclusive education in an African context. It advocates for the monitoring and evaluation of inclusive education and proposes interventions where reasonable accommodation or lack of accessibility is a reason for students with disabilities to not benefit from this system. Covering topics such as barriers to learning, rural schools, and student support, this major reference work is an essential resource for administrators, advocates for students with disabilities, policymakers, researchers, pre-service teachers, educators, academicians, and students. *Selbstbild* □□□□□□□□□□□□ Eine Anleitung zum Nach-, Quer- und Gegendenken »Ich weiß, dass ich nichts weiß, erkannte bereits Sokrates. aber mit dem Unbekannten, mit dem, was wir nicht wissen, faktisch umgehen und idealerweise umgehen sollten, das beschreibt der Risikoforscher und Essayist Nassim Nicholas Taleb in seinem Handbuch. Er enthüllt die Begrenztheiten unserer Datenverliebtheit genauso wie die folgenschweren Irrtümer und Voreingenommenheiten unseres Denkens. So zeigt er, wie uns Denkfehler, falsche Kategorien und blinde Flecken immer wieder in die Irre führen – und wie wir mit Unwissen gewinnbringend umgehen können.
