the French Revolution

THE NATIONAL BESTSELLER “This riveting,
courageous memoir ought to be
mandatory reading for every American.”
—Michelle Alexander, New York Times
bestselling author of *The New Jim Crow* “I
cried reading this book, realizing more
fully what my parents endured.” —Amy

Tan, New York Times bestselling author of
The Joy Luck Club and *Where the Past
Begins* “This book couldn’t be more timely
and more necessary.” —Dave Eggers, New
York Times bestselling author of *What Is
the What* and *The Monk of Mokha* Pulitzer-
Prize winning journalist Jose Antonio
Vargas, called “the most famous
undocumented immigrant in America,”
tackles one of the defining issues of our
time in this explosive and deeply personal
call to arms. “This is not a book about the
politics of immigration. This book—at its
core—is not about immigration at all. This

book is about homelessness, not in a
traditional sense, but in the unsettled,
unmoored psychological state that
undocumented immigrants like myself find
ourselves in. This book is about lying and
being forced to lie to get by; about passing
as an American and as a contributing
citizen; about families, keeping them
together, and having to make new ones
when you can’t. This book is about
constantly hiding from the government
and, in the process, hiding from ourselves.
This book is about what it means to not
have a home. After 25 years of living

illegally in a country that does not consider me one of its own, this book is the closest thing I have to freedom.”

Every day Americans make decisions about their privacy: what to share, how much to expose to whom. Securing the boundary between private affairs and public identity has become a central task of citizenship. Sarah Igo pursues this elusive social value across the twentieth century, as individuals asked how they should be known by their own society.

The New York Times bestselling author of the Oprah Book Club Pick *Cane River* brings us the evocative story of a once-enslaved man who buys his freedom after serving as a translator during the American Indian Wars, and his

granddaughter, who sustains his legacy of courage. Cow Tom, born into slavery in Alabama in 1810 and sold to a Creek Indian chief before his tenth birthday, possessed an extraordinary gift: the ability to master languages. As the new country developed westward, and Indians, settlers, and blacks came into constant contact, Cow Tom became a key translator for his Creek master and was hired out to US military generals. His talent earned him money—but would it also grant him freedom? And what would become of him and his family in the aftermath of the Civil War and the Indian Removal westward? Cow Tom’s legacy lives on—especially in the courageous spirit of his granddaughter Rose. She rises to leadership of the family as they struggle against political and societal hostility intent on keeping blacks and Indians oppressed. But through it all, her grandfather’s indelible mark of courage inspires her—in mind, in spirit, and in a family legacy that never dies. Written in two parts portraying the parallel lives of Cow Tom and Rose, *Citizens* Creek is a beautifully rendered novel that takes the reader deep into a little known chapter of American history. It is a breathtaking

tale of identity, community, family—and above all, the power of an individual’s will to make a difference.

Simon Schama brings Britain to life through its portraits, as seen in the five-part BBC series *The Face of Britain* and the major National Portrait Gallery exhibition *Churchill and his painter* locked in a struggle of stares and glares; Gainsborough watching his daughters run after a butterfly; a black Othello in the nineteenth century, the poet-artist Rossetti trying to capture on canvas what he couldn't possess in life, a surgeon-artist making studies of wounded faces brought in from the Battle of the Somme; a naked John Lennon five hours before his death. In the age of the hasty glance and the selfie, Simon Schama has written a tour de force about the long exchange of looks from which British portraits have been made over the centuries: images of the modest and the mighty; of friends and lovers; heroes and working people. Each of them - the image-maker, the subject, and the rest of us who get to look at them - are brought unforgettably to life. Together they build into a collective picture of Britain, our past

and our present, a look into the mirror of our identity at a moment when we are wondering just who we are. Combining his two great passions, British history and art history, for the first time, Schama's extraordinary storytelling reveals the truth behind the nation's most famous portrayals of power, love, fame, the self, and the people. Mesmerising in its breadth and its panache, and beautifully illustrated, with more than 150 images from the National Portrait Gallery, *The Face of Britain* will change the way we see our past - and ourselves.

A compelling biography of a key figure of the French Revolution captures the paradoxical life of Maximilien Robespierre, from his beginnings as a provincial lawyer, to his rise to power as a revolutionary leader, to his eventual end on the guillotine that had taken the lives of so many during the Terror that he had orchestrated. Reprint.

Works from *Les Misérables* by Victor Hugo to *Citizens* by Simon Schama have been inspired by the French Revolution. Now

available for the first time in years, *The Days of the French Revolution* brings to life the events that changed the future of Western civilization. As compelling as any fiction thriller, this real-life drama moves from the storming of the Bastille to the doomed court of Louis XVI, the salon of Madame Roland, and even the boudoir of Marie Antoinette. Hibbert recounts the events that swirled around Napoleon, Mirabeau, Danton, Marat, and Robespierre with eyewitness accounts and his "usual grace and flair for divulging interesting detail" (Booklist). This trade paperback edition has twenty-eight pages of black-and-white illustrations, and will be published in time for Bastille Day.

Austerlitz, Wagram, Borodino, Trafalgar, Leipzig, Waterloo: these are the places most closely associated with the era of the Napoleonic Wars. But how did this period of nearly continuous conflict affect the

world beyond Europe? The immensity of the fighting waged by France against England, Prussia, Austria, and Russia, and the immediate consequences of the tremors that spread throughout the world. In this ambitious and far-ranging work, Alexander Mikaberidze argues that the Napoleonic Wars can only be fully understood in an international perspective. France struggled for dominance not only on the plains of Europe but also in the Americas, West and South Africa, Ottoman Empire, Iran, India, Indonesia, the Philippines, Mediterranean Sea, and the Atlantic and Indian Oceans. Taking specific regions in turn, Mikaberidze discusses major political-military events around the world and situates geopolitical decision-making within its long- and short-term contexts. From the British expeditions to Argentina and South Africa to the Franco-Russian maneuvering in the Ottoman Empire, the effects of the French Revolution and Napoleonic Wars would shape international affairs well into the next century. In Egypt, the wars led to the rise of Mehmed Ali and the emergence of a powerful state; in North America, the

period transformed and enlarged the newly established United States; and in South America, the Spanish colonial empire witnessed the start of national-liberation movements that ultimately ended imperial control. Skillfully narrated and deeply researched, here at last is the global history of the period, one that expands our view of the Napoleonic Wars and their role in laying the foundations of the modern world.

Notes of an Undocumented Citizen Vintage
Citizenship is invaluable, yet our status as citizens is always at risk—even for those born on US soil. Over the last two centuries, the US government has revoked citizenship to cast out its unwanted, suppress dissent, and deny civil rights to all considered “un-American”—whether due to their race, ethnicity, marriage partner, or beliefs. Drawing on the narratives of those who have struggled to be treated as full members of “We the People,” law professor Amanda Frost exposes a hidden history of discrimination and xenophobia that continues to this day. The Supreme Court’s rejection of Black citizenship in *Dred Scott* was among the first and most notorious examples of

citizenship stripping, but the phenomenon did not end there. Women who married noncitizens, persecuted racial groups, labor leaders, and political activists were all denied their citizenship, and sometimes deported, by a government that wanted to redefine the meaning of “American.” Today, US citizens living near the southern border are regularly denied passports, thousands are detained and deported by mistake, and the Trump administration is investigating the citizenship of 700,000 naturalized citizens. Even elected leaders such as Barack Obama and Kamala Harris are not immune from false claims that they are not citizens eligible to hold office. *You Are Not American* grapples with what it means to be American and the issues surrounding membership, identity, belonging, and exclusion that still occupy and divide the nation in the twenty-first century.

The Practice of Citizenship traces the parallel development of early black print culture and legal and cultural understandings of U.S. citizenship. Considering a variety of texts by both

canonical and lesser-known authors, Derrick R. Spires demonstrates how black writers articulated an expansive, practice-based theory of citizenship.

The author uses her journey from Moroccan immigrant to U.S. citizen as a starting point for an exploration of the rights, liberties, and protections that are traditionally associated with American citizenship. Tapping into history, politics, and literature, she elucidates how accidents of birth - such as national origin, race, or gender - that once determined the boundaries of Americanness still cast their shadows today

The story of the dramatic postwar struggle over the proper role of citizens and government in American society. In the 1960s and 1970s, an insurgent attack on traditional liberalism took shape in America. It was built on new ideals of citizen advocacy and the public interest. Environmentalists, social critics, and consumer advocates like Rachel Carson, Jane Jacobs, and Ralph Nader crusaded against what they saw as a misguided and often corrupt government. Drawing energy from civil rights protests and opposition to the Vietnam War, the new citizens' movement drew legions of followers and scored major victories. Citizen advocates disrupted government plans for urban highways and new hydroelectric dams and got Congress to pass tough legislation to protect clean air and clean water. They helped lead a revolution in safety that forced companies and governments to

better protect consumers and workers from dangerous products and hazardous work conditions. And yet, in the process, citizen advocates also helped to undermine big government liberalism—the powerful alliance between government, business, and labor that dominated the United States politically in the decades following the New Deal and World War II. Public interest advocates exposed that alliance's secret bargains and unintended consequences. They showed how government power often was used to advance private interests rather than restrain them. In the process of attacking government for its failings and its dangers, the public interest movement struggled to replace traditional liberalism with a new approach to governing. The citizen critique of government power instead helped clear the way for their antagonists: Reagan-era conservatives seeking to slash regulations and enrich corporations. Public Citizens traces the history of the public interest movement and explores its tangled legacy, showing the ways in which American liberalism has been at war with itself. The book forces us to reckon with the challenges of regaining our faith in

government's ability to advance the common good.

Citizenship Stripping from Dred Scott to the Dreamers Bloomsbury Publishing USA

Domesticating Empire is the first contextually-oriented monograph on Egyptian imagery in Roman households. Caitlín Barrett draws on case studies from Flavian Pompeii to investigate the close association between representations of Egypt and a particular type of Roman household space: the domestic garden. Through paintings and mosaics portraying the Nile, canals that turned the garden itself into a miniature "Nilescape," and statuary depicting Egyptian themes, many gardens in Pompeii offered ancient visitors evocations of a Roman vision of Egypt. Simultaneously faraway and familiar, these imagined landscapes made the unfathomable breadth of empire compatible with the familiarity of home. In contrast to older interpretations that connect Roman "Aegyptiaca" to the worship of Egyptian gods or the problematic concept of "Egyptomania," a contextual analysis of these garden assemblages suggests new possibilities for meaning. In Pompeian houses, Egyptian

and Egyptian-looking objects and images interacted with their settings to construct complex entanglements of "foreign" and "familiar," "self" and "other."

Representations of Egyptian landscapes in domestic gardens enabled individuals to present themselves as sophisticated citizens of empire. Yet at the same time, household material culture also exerted an agency of its own: domesticizing, familiarizing, and "Romanizing" once-foreign images and objects. That which was once imagined as alien and potentially dangerous was now part of the domus itself, increasingly incorporated into cultural constructions of what it meant to be "Roman." Featuring brilliant illustrations in both color and black and white, *Domesticating Empire* reveals the importance of material culture in transforming household space into a microcosm of empire.

A striking account of the impact of the French Revolution in Paris, across the French countryside, and around the globe. The French Revolution has fascinated, perplexed, and inspired for more than two centuries. It was a seismic event that radically transformed France and launched shock waves across the world. In this provocative new history, Peter McPhee draws on a lifetime's study of eighteenth-century France and Europe to create an entirely fresh account of the world's first great modern revolution—its origins, drama, complexity, and significance. Was the Revolution a major turning point in French—even world—history, or was it instead a protracted period of violent upheaval and warfare that wrecked millions of lives? McPhee evaluates the Revolution within a genuinely global context: Europe, the Atlantic region, and even farther. He acknowledges the key revolutionary events that unfolded in Paris, yet also uncovers the varying experiences of French citizens outside the gates of the city: the provincial men and women whose daily lives were altered—or not—by developments in the capital. Enhanced with evocative stories of those

who struggled to cope in unpredictable times, McPhee's deeply researched book investigates the changing personal, social, and cultural world of the eighteenth century. His startling conclusions redefine and illuminate both the experience and the legacy of France's transformative age of revolution. "McPhee...skillfully and with consummate clarity recounts one of the most complex events in modern history.... [This] extraordinary work is destined to be the standard account of the French Revolution for years to come."—Publishers Weekly (starred review)

This book tracks the dramatic outcomes of the federal government's growing involvement in higher education between

World War I and the 1970s, and the conservative backlash against that involvement from the 1980s onward. Using cutting-edge analysis, Christopher Loss recovers higher education's central importance to the larger social and political history of the United States in the twentieth century, and chronicles its transformation into a key mediating institution between citizens and the state. Framed around the three major federal higher education policies of the twentieth century--the 1944 GI Bill, the 1958 National Defense Education Act, and the 1965 Higher Education Act--the book charts the federal government's various efforts to deploy education to ready citizens for the national, bureaucratized, and increasingly global world in which they lived. Loss details the myriad ways in which academic leaders and students shaped, and were shaped by, the state's shifting political agenda as it moved from a preoccupation with economic security during the Great Depression, to national security during World War II and the Cold War, to securing the rights of African Americans, women, and other previously marginalized groups during the 1960s and

'70s. Along the way, Loss reappraises the origins of higher education's current-day diversity regime, the growth of identity group politics, and the privatization of citizenship at the close of the twentieth century. At a time when people's faith in government and higher education is being sorely tested, this book sheds new light on the close relations between American higher education and politics.

A timely chronicle of what is now an ordinary day in America, where gun violence regularly takes the lives of children and teens, and leaves shattered families in its wake. Winner of the 2017 J. Anthony Lukas Prize Shortlisted for the 2017 Hurston/Wright Foundation Award Finalist for the 2017 Helen Bernstein Book Award for Excellence in Journalism Longlisted for the 2017 Andrew Carnegie Medal for Excellence in Non Fiction On an average day in America, seven children and teens will be shot dead. In *Another Day in the Death of America*, award-winning journalist Gary Younge tells the stories of the lives lost during one such day. It could have been

any day, but he chose November 23, 2013. Black, white, and Latino, aged nine to nineteen, they fell at sleepovers, on street corners, in stairwells, and on their own doorsteps. From the rural Midwest to the barrios of Texas, the narrative

crisscrosses the country over a period of twenty-four hours to reveal the full human stories behind the gun-violence statistics and the brief mentions in local papers of lives lost. This powerful and moving work puts a human face-a child's face-on the "collateral damage" of gun deaths across

the country. This is not a book about gun control, but about what happens in a country where it does not exist. What emerges in these pages is a searing and urgent portrait of youth, family, and firearms in America today.
