'Chess Grandmaster Anish Giri sketches his rise to the chess elite and presents 20 fondly remembered games in his trademark style: instructive, witty and delightfully unimpressed by reputations. Included is his win against Magnus Carlsen in Wijk aan Zee, the 'Wimbledon' of Chess, in 2011. The Dutch grandmaster is not only an exceptional player, but also a talented writer with a profound knowledge of the game, a great sense of

humour and contagious enthusiasm. Giri was born to a Russian mother and a Nepalese father and has lived in Russia, Japan and the Netherlands. He is Contributing Editor to New In Chess magazine.

As the first volume of World Scientific Encyclopedia with Semantic Computing and Robotic Intelligence, this volume is designed to lay the foundation for the understanding of the Semantic Computing (SC), as a core concept to study Robotic Intelligence in the subsequent volumes. This volume aims to provide a reference to the development of Semantic Computing, in the terms of "meaning", "context", and "intention". It brings together a series of technical notes, in average, no longer than 10 pages in length, each focuses on one topic in Semantic Computing; being review article or research paper, to explain the

fundamental concepts, models or algorithms, and possible applications of the technology concerned. This volume will address three core areas in Semantic Computing: Understanding the (possibly naturally-expressed) intentions (semantics) of users and expressing them in a machine-processable format: Semantics description languages, ontology integration, interoperability Understanding the meanings (semantics) of computational content (of various sorts, including, but is not limited to, text, video, audio, process, network, software and hardware) and expressing them in a machine-processable format in Multimedia, IoT, SDN, wearable computing, interfactable with mobile computing, search engines, question answering, web services, to support applications in biomedicine, healthcare, manufacturing, engineering, education, finance, entertainment, business, science and humanity Mapping the semantics of the user in context for content retrieval, management, creation in the form of structured data, image and video, audio and speech, big data, natural language, deep learning.

This book examines the development of television in India since the early 1990s, and its implications for Indian society more widely. Until 1991, India possessed only a single state-owned television channel, but since then there has been a rapid expansion in independent satellite channels which came as a complete break from the statist control of the past. This book explores this transformation, explaining how television, a medium that developed in the industrial West, was adapted to suit Indian conditions, and in turn has altered Indian social practices, making possible new ways of imagining identities, conducting politics and engaging with the state. In particular, satellite television initially came to India as the representative of global capitalism but it was appropriated by Indian entrepreneurs and producers who Indianized it. Considering the full gamut of Indian television -

from "national" networks in English and Hindi to the state of regional language networks – this book elucidates the transformative impact of television on a range of important social practices, including politics and democracy, sport and identity formation, cinema and popular culture. Overall, it shows how the story of television in India is also the story of India's encounter with the forces of globalisation.

A cinematic masterpiece, Bimal Roy's *Madhumati* is an enduring classic, and one of the most enduring legacies bequeathed to the Indian film industry by the black-and-white era. Starring the legendary thespians Dilip Kumar, Vyjayanthimala and Pran, *Madhumati* combined a heartbreaking saga of love with a convincing, spine-chilling ghost story to create an award-winning hit movie which continues to inspire Bollywood even today. In *Bimal Roy's Madhumati: Untold Stories from Behind the Scenes*, his daughter, Rinki Roy Bhattacharya, explores how Roy's biggest

commercial success was made; revisiting shoot locations, meeting people who were involved in its making, building on reminiscences, media reports, interviews and, most importantly, the memories of the three stars-Dilip Kumar, Vyjayanthimala and Pran. With a tribute by Amitabh Bachchan, a foreword by Vyjayanthimala and exclusive on-location photographs, this book is a must-have, both for fans of this iconic film and for those interested in the history of the Indian film industry.

There is a widening gap between democracy as a theory and its practice. While supposedly a solution to the problems of the developing world, in practice democracy has more often led to instability, civil wars, genocides, fundamentalism, crime and corruption. In contrast, in the West, voting rights were extended gradually over a century or two, in tandem with economic empowerment and also social awakening. The democratic republics that "evolved" out of this long process were stable and progressive. In the developing world, a shortcut to the end and "premature political opening up" has proven disastrous for many a nation like Nigeria, Iraq, Congo, Kenya, Pakistan, South Africa etc. Even in the few stable ones like India, democracy has failed to make a dent in poverty alleviation and has instead got caught in divisive election stunts. At the same time, some unitary states like China have surged far ahead of others and broken out of the "largely poor and deteriorating" mould. Why? What are the reasons democracy does not work in the developing world? Could it be made to work through improvements or is it the wrong model altogether? The notion that democracy is going to

transform our world holds little credence to anyone who has witnessed its true colors like the author has, hailing from India and also having lived in China and some other countries. Thus as a scientist and researcher, she has studied the history, politics and economics of some 150 countries across the world. The book delves into the complex world of subversive election winning strategies, secession movements, coalition governments, the meaning of freedom to people living amidst violence and poverty as well as a study of other sociopolitical systems. Without any a priori theories, willing to go where the evidence leads, the author is able to point out the "Emperor's new clothes" for what they truly are. It may be time to challenge our perfect theory as democracy may not be the answer to the developing world's problems. The quest for truth leads us to surprising answers in terms of progressive transient alternatives for the developing world as well as some pointers for streamlining democracy, the system per se. Democracy on Trial is a compelling discovery of fresh answers and pragmatic solutions to the pressing problems of our times - from large scale abject poverty in developing countries across Asia and Africa to many civil wars and ongoing mayhem in others. One book that comes close to the perspective in Democracy on Trial All Rise! is The Future of Freedom by Fareed Zakaria. Zakaria's is the first book to acknowledge democracy's failure in the developing world, but it leaves the important question 'what is the alternative' largely unanswered and falls back on rationalizations to conclude. Most of the current literature on democracy is primarily theoretical in nature and addresses some of its faults but democracy per se is eulogized. The new title is different in that it answers the question of 'what

is the alternative' or a way forward based on an empirical analysis that carries the reader along to the conclusions. The perspective is new, as yet unexplored, and marries the progressive with the pragmatic.

This volume is based on papers presented by invited speakers at a symposium entitled "Plant Nitrogen Metabolism" held in conjunction with the 28th Annual Meeting of the Phytochemical Society of North America. The meeting took place on the campus of the University of Iowa at Iowa City during June 26-30, 1988, and attracted 110 participants from 11 countries. The goal of the symposium was to trace the pathway by which nitrogen passes from soil and atmosphere into both primary and secondary nitrogenous metabolites, focusing upon areas which were felt to be most rapidly expanding. From nodulines (nodule specific proteins) and GS/GOGAT mutants to sugar mimics

(polyhydroxyalkaloids) and herbicide inhibitors of amino acid metabolism, research in nitrogen metabolism has expanded into areas barely envisioned only a few years ago. Both the nitrogen specialist and the general plant biochemist will be pleased by the range of topics covered here. Following an overview in Chapter 1 of plant nitrogen metabolism, the remaining chapters are loosely organized into three groups. Chapters 2-6 deal primarily with the biochemistry and molecular biology of nitrogen assimilation and transport, Chapters 7-9 with amino acid metabolism, and Chapters 10-12 with secondary metabolites.

The Oxford Handbook of Charles Dickens is a comprehensive and up-to-date collection on Dickens's life and works. It includes original chapters on all of Dickens's writing and new considerations of his contexts, from the social, political, and economic to the scientific, commercial, and religious. The contributions speak in new ways about his depictions of families, environmental degradation, and improvements of the industrial age, as well as the law, charity, and communications. His treatment of gender, his mastery of prose in all its varieties and genres, and his range of affects and dramatization all come under stimulating reconsideration. His understanding of British history, of empire and colonization, of his own nation and foreign ones, and of selfhood and otherness, like all the other topics, is explained in terms easy to comprehend and profoundly relevant to global modernity.

Anjali Kumar, a pragmatic lawyer for Google, was part of a rapidly growing population in America: highly spiritual but religiously uncommitted. But when her daughter was born, she became compelled to find God--or at least some kind of enlightenment.

Convinced that traditional religions were not a fit for her, and knowing that she couldn't simply Google an answer to "What is the meaning of life?", Kumar set out on a spiritual pilgrimage, looking for answers--and nothing was off limits or too unorthodox. She headed to the mountains of Peru to learn from the shamans, attended the techie haunt of Burning Man, practiced transcendental meditation, convened with angels, and visited saints, goddesses, witches, and faith healers. She even hired a medium to convene with the dead. Kumar's lighthearted story offers a revealing look at the timeless and vexing issue of spirituality in an era when more and more people are walking away from formal religions. Narrated from the open-minded perspective of a spiritual seeker rather than a religious scholar, Kumar offers an honest account of some of the less than mainstream spiritual practices that are followed by millions of people in the world today as she searches for the answers to life's most universal questions: Why are we here? What happens when we die? Is there a God?

In "Romancing with Life," the first-ever full-fledged memoir by a leading Bollywood star, Dev Anand tells his remarkable life story like only he can. Here are tales from Dev's youth in 1930s Gurdaspur and Lahore; his years of struggle in 1940s Bombay; his friendship with Guru Dutt and his doomed romance with Suraiya; his marriage to co-star Kalpana Kartik; his relationships with his brothers Chetan and Vijay Anand, with S.D. and R.D. Burman, with his compatriots Dilip Kumar and Raj Kapoor; to both of whom he was very close, and with his heroines from Geeta Bali, Madhubala, Meena Kumari, Nutan, Vyjayanthimala, Mumtaz

and Hema Malini to Waheeda Rehman, Zeenat Aman and Tina Munim, all of whom he launched. Dev Anand has produced an unputdownable book chock-full of bittersweet reminiscences, written in a pacy, effervescent style that carries the reader through sixty of Bollywood's most interesting years. With rare pictures from his personal archive, "Romancing with Life" is the quintessential Dev Anand.

This book explores the lives, inventions, discoveries, and significant work of three extraordinary European inventors with noteworthy links to the great Thomas Alva Edison – Alessandro Volta, Nikola Tesla, and Eric Tigerstedt. It explores the business and scientific legacies that these men have contributed to the modern world. Despite prejudices, ill health, financial stringency, geopolitical situations, business rivalries, and in many cases just awful luck, they remained determined to deliver extraordinary scientific and technological developments to a skeptical and unappreciative world. This book is a testament to anyone pursuing their technological dreams for the benefit of society, and will enhance the literature for scholars, researchers, and the well-informed reader with an interest in science, technology, and the personalities involved in history.
