This volume sets out to contrast and compare the development of policies related to victims of crime and their place within the criminal justice systems in nine separate jurisdictions (the USA, the Netherlands, England and Wales, Scotland, the Republic of Ireland, Australia, New Zealand, Canada and South Africa). Based on first hand interviews with those responsible for formulating such policies, as well as detailed grounded and document analysis across these jurisdictions, this book exposes the national and transnational policy networks surrounding victims of crime and, in particular, examines how the provision of victim care is becoming globalized.

Abolish Criminology presents critical scholarship on criminology and criminal justice ideologies and practices, alongside emerging freedom-driven visions and practices for new world formations. The book introduces readers to a detailed history and analysis of crime as a concept and its colonizing trajectories into existence and enforcement. These significant contexts buried within peculiar academic histories and classroom practices are often overlooked or unknown outside academic and public discussions, causing the impact of racializing-gendering-sexualizing histories to extend and grow through criminology's creation of crime, extending how the concept is weaponized and enforced through the criminal legal system. It offers written, visual, and poetic teachings from the perspectives of students, professors, imprisoned and formerly imprisoned persons, and artists. This allows readers to engage in multi-sensory, inter-disciplinary, and multi-perspective teachings on criminology's often discussed but seldom interrogated mythologies on violence and danger, and their wide-reaching enforcements through the criminal legal system's research, theories, agencies, and dominant cultures. Abolish Criminology serves the needs of undergraduate and graduate students and educators in the social sciences, arts, and humanities. It will also appeal to scholars, researchers, policy makers, activists, community organizers, social movement builders, and various reading groups in the general public who are grappling with increased critical public discourse on policing and criminal legal reform or abolition.

As if crime and race in the US were not volatile enough issues independently, there is their explosive interface. This is the territory staked out by Russell (criminology and criminal justice, U. of Maryland), who probes racial stereotypes (some perpetuated by "scientific racism"), the hoaxes they have spawned, differing views of police actions by race, and affirmative race law. A public-police contact survey and case summaries of recent racial hoaxes are appended. Annotation copyrighted by Book News, Inc., Portland, OR

`If the First Edition was an invaluable guide for students, the Second is well nigh indispensable. I can think of no better starting point for those wanting a "quick fix" on any given criminological topic' - Professor Tony Jefferson, Keele University `Since its initial publication in 2001, I've steadfastly kept The SAGE Dictionary of Criminology within easy reach of my desk, referring to it countless times in writing articles, books, and lectures. I've found it to be a remarkable book - a comprehensive dictionary, certainly, but as much so a significant achievement in intellectual inquiry. It may seem odd to say of a dictionary, but it really is one of my favourite books; the only book that can replace it on my deskside bookshelf is this Second Edition, whose new entries confirm the editors' grasp of contemporary criminology in all its excitement and complexity' - Professor Jeff Ferrell, Texas Christian University `The welcome inclusion of entries on contemporary theoretical and policy concerns ranging from Anti Social Behaviour, Eco crime and Emotions through Forensic Anthropology, Globalisation, Governance and Mentoring to Sex Crime, Virtual Criminology and What Works?, adds to the well established strengths of the first edition. The entries, all written by established scholars, provide a clear, concise and critical introduction to criminological concepts and constitute an invaluable resource for all criminology students and academics' - Professor Hazel Croall, Glasgow Caledonian University 'It is unusual for a dictionary to be interesting, but this one manages to be both compelling and useful for faculty and students across a range of disciplines and orientations who are commonly interested in criminology. The SAGE Dictionary of Criminology is also distinctive in providing a literally encyclopaedic

compendium of information that has been carefully placed in social, cultural and political contexts.'

- Professor Lynn Chancer, Hunter College, City University of New York `The list of new entries is quite impressive. Once you've read them, you start to wonder how come that the First Edition of The SAGE Dictionary of Criminology already felt so complete' - Dr Ren van Swaaningen, Erasmus University, Rotterdam `Thoughtful evaluations of the key concepts criminologists must think about by quality contributors who include many of the world's leading criminologists' - Professor John Braithwaite, Australian National University The Second Edition of the bestselling SAGE Dictionary of Criminology is the ultimate reference tool for students of criminology and criminal justice. It provides an accessible introduction to key theories, concepts and topics, offering comprehensive guidance through the field. The editors have brought together a group of internationally prominent academics and practitioners to produce this definitive reference and research tool. Each entry contains: " a definition of the concept or topic " distinctive features offering detailed comment on the concept's origins, development and general significance " evaluation of those concepts considered to have greatest theoretical weight and lasting legacy " associated concepts for cross-referencing and mapping connections across various fields and issues " key readings to enable the student to take their knowledge further The new edition contains thirty-six new entries covering subjects such as anti-social behaviour, globalization, human trafficking and terrorism. Selected entries have been revised and updated. This comprehensive text is the essential reference point for all students of criminology and criminal justice, at all levels. Praise for the First Edition `The compilers have done criminology a tremendous service. This dictionary is an invaluable resource for students and teachers and I'm certain will be a key reference work for years to come' - Professor Tim Newburn, London School of Economics `Great dictionaries inform, intrigue and investigate. McLaughlin and Muncie's perceptive collection does all three. The SAGE Dictionary of Criminology is wide and accessible enough to interest anyone concerned with crime, the law and the panoply of issues and explanations that surround them. This admirable volume will inform, guide and contribute to debates in the years ahead' - Ellis Cashmore, Professor of Culture, Media and Sport, Staffordshire University, author of Dictionary of Race and Ethnic Relations and co-editor of Dictionary of Cultural Theorists `McLaughlin and Muncie have assembled an impressive list of international contributors and have succeeded in putting together a wonderfully entertaining booke the Dictionary belongs on every criminologist's bookshelf' - Professor George Mair, Liverpool John Moores University (Criminal Justice: An International Journal 2:2) `The main strength of the project lies in its attempts at integration of a wide range of themes and theoretical perspectives under one set of covers' - Professor John Raine, University of Birmingham (Youth Justice 2:1) `There is a genuine international feel to the compilation as a whole.e Nowadays, such has criminology grown, it is barely possible to keep up even in a narrowly defined sub-field, and a new dictionary is essential. Anyway, we will all have to read it because our students will. What a relief that it is such a pleasure to do so' - Jason Ditton, University of Sheffield (British Journal of Criminology 43:2)

The readings in The Nature and Theory of Crime represent the eighteen most influential theories and perspectives in criminology. Each reading, while accessible to the student-reader, has been chosen to represent the complexity of theoretical issues in the field. Students will explore the classical, biological, and control perspectives, the influence of neighborhoods and communities on crime, labeling theories, feminist criminology, and more. The text teaches readers to understand both the concepts described within numerous theories and the criteria used to evaluate criminological theory. Readers will also learn how theoretical concepts are developed and how theoretical hypotheses are tested. They will become familiar with the empirical support related to major theories and the policy and program implications of each theory. Lastly, they will come to see how the study of criminological theory is related to real-world criminal justice practice. Each reading is framed by an original introduction to provide context and discussion questions to support retention, critical thinking, and classroom engagement. The Nature and Theory of Crime is designed for upper-division undergraduate courses in criminology, criminal justice, and sociology.

This new textbook will provide students of criminology with a better understanding of criminal justice policy and, in doing so, offers a framework for analysing the social, economic and political processes that shape its creation. The book adopts a policy-oriented approach to criminal justice,

connecting the study of criminology to the wider study of British government, public administration and politics. Throughout the book the focus is on key debates and competing perspectives on how policy decisions are made. Recognising that contemporary criminal justice policymakers operate in a highly politicised, public arena under the gaze of an ever-increasing variety of groups, organisations and individuals who have a stake in a particular policy issue, the book explores how and why these people seek to influence policymaking. It also recognises that criminal policy differs from other areas of public policy, as policy decisions affect the liberty and freedoms of citizens. Throughout, key ideas and debates are linked to wider sociology, criminology and social policy theory. Key features include: a foreword by Tim Newburn, leading criminologist and author of Criminology (2nd Edition, 2013), a critical and informed analysis of the concepts, ideas and institutional practices that shape criminal justice policy making, an exploration of the relationship between criminal justice and wider social policy, a critical analysis of the debate about how and why behaviour becomes defined as requiring a criminal justice solution, a range of case studies, tasks, seminar questions and suggested further readings to keep the student engaged. This text is perfect for students taking modules in criminology; criminal justice; and social and public policy, as well as those taking courses on criminal and administrative law.

**Group Problems in Crime and Punishment** Sage Publications

In this important and original book, Reece Walters examines the politics of criminology and the ways in which criminological knowledge is generated. It includes an overview of the politics and practice of conducting criminological research (drawing upon material from Britain, Europe, Australia, New Zealand and the USA), and the ways that regulatory and governing authorities set research agendas, manipulate the processes and production of knowledge and silence or suppress critical voices through various techniques of neutralisation. The book argues for 'knowledges of resistance' - a position that promotes critique, challenges concepts of power and social order, wrestles with notions of truth and adheres to intellectual autonomy and independence. It provides invaluable insights into the relationship between the criminological researcher, public officials and corporate representatives. Drawing upon a wide range of interviews with academics and administrators from government and business, the book provides rare insights into the ways that knowledge about crime and criminal justice is produced and consumed, revealing why certain topics of criminological enquiry are rarely funded and why others receive ongoing political and governmental support. The book will be essential reading for anybody interested in the development of criminological theory and research, and the context and influences that shape it. [Cultural Criminology](#) SAGE

This is Volume II of fifteen in a series on the Sociology of Law and Criminology. Originally published in 1965, this textbook is part two of two, meant for students and deals more fully than usual with such fundamental matters as the very concepts of crime and criminology and especially with the highly complex relationship between crime, the criminal law and certain burning moral issues of our time. It also includes several chapters on the methods of research used in criminological and penological investigations.

This book, first published in 1936, provides an introduction to the various branches of criminology, including criminal psychology and criminology as an applied science. [Teaching Criminology at the Intersection](#) Routledge

This book provides a comprehensive and up-to-date introduction to criminological theory for students taking courses in criminology at both undergraduate and postgraduate level. Building on previous editions, this book presents the latest research and theoretical developments. The text is divided into five parts, the first three of which address ideal type models of criminal behaviour: the rational actor, predestined actor and victimized actor models. Within these, the various criminological theories are located chronologically in the context of one of these different traditions, and the strengths and weaknesses of each theory and model are clearly identified. The fourth part of the book looks closely at more recent attempts to integrate theoretical elements

from both within and across models of criminal behaviour, while the fifth part addresses a number of key recent concerns of criminology: postmodernism, cultural criminology, globalization and communitarianism, the penal society, southern criminology and critical criminology. All major theoretical perspectives are considered, including: classical criminology, biological and psychological positivism, labelling theories, feminist criminology, critical criminology and left realism, situation action, desistance theories, social control theories, the risk society, postmodern condition and terrorism. The new edition also features comprehensive coverage of recent developments in criminology, including 'the myth of the crime drop', the revitalization of critical criminology and political economy, shaming and crime, defiance theory, coerced mobility theory and new developments in social control and general strain theories. This revised and expanded fifth edition of *An Introduction to Criminological Theory* includes chapter summaries, critical thinking questions, policy implications, a full glossary of terms and theories and a timeline of criminological theory, making it essential reading for those studying criminology and taking courses on theoretical criminology, understanding crime, and crime and deviance

*Facts, Frameworks, and Forecasts* calls for rethinking the development of criminological theory. In her introduction, Joan McCord argues that the field is ready for new approaches and that its progress depends on a sound factual base. Examining the discipline's research design, methodology, and quantitative analysis efforts, the contributors identify significant advances in criminological theory. This empirical orientation results in a balanced blend of information and speculation. This book contains a comprehensive review. The first chapter describes biological conditions that have theoretical links with criminal behavior - ending with a discussion of how biological and social conditions may interact to influence criminal behavior. Early chapters discuss general issues related to crime. These are followed by expositions of theoretical orientations not typically found in criminological literature. The second half of the book describes seven longitudinal studies in four countries. The authors interpret their data to expose biological, social, and psychological factors they believe may influence criminal behavior. These contributors include:

Guenther Knoblich and Roy King, Daniel Glaser, Robert A. Rosellini and Robin L. Lashley, Robert J. Sampson, Ellen S. Cohn and Susan O. White, Joan McCord, L. Rowell Huesmann and Leonard D. Eron, Robert Cairns and Beverly Cairns, Richard E. Tremblay, Patricia Cohen and Judith S. Brook, David P. Farrington and David Magnusson, Britt af Klinteberg, and Hakan Stattin. *Facts, Frameworks, and Forecasts* addresses the observation of noted criminologist Marvin Wolfgang that criminological theory had stagnated. This groundbreaking work, available in paperback for the first time, is as relevant now as when first published. It should be read by all concerned with data-related approaches to criminology.

*Big Data* Routledge

In recent decades there has been a vast increase in the use of imprisonment and penal supervision, and to many this development appears to be qualitatively as well as quantitatively different. The causes of this development, its consequences and future course form the main point of departure for the contributors to this volume, who consider the changes that have contributed to these apparently fundamental shifts in the use of punishment. In this major new book contributors from a range of disciplines provide an integrated approach to a range of questions surrounding the use of punishment: In what ways have broader social institutions and processes contributed to penal expansion? This book is the principal outcome of the Guggenheim Punishment Project which aimed for a truly interdisciplinary account of thinking about punishment, and an outcome which was general and reflective rather than specific and policy oriented, and accessible to the generalist as well as those with a specialist interest in the field.
