Major Problems in American Foreign Relations, Volume II: Since 1914

Academic Internet Pub Incorporated
Designed to encourage critical thinking about history, this reader uses a carefully selected group of primary sources and analytical essays to allow students to test the interpretations of distinguished historians and draw their own conclusions about the history of American foreign policy. This text serves as an effective educational tool for courses on U.S. foreign policy, recent U.S. history, or 20th Century U.S. history.

Some of the new literature spotlights cultural relations, and the ways in which culturally constructed attitudes about class, gender, race, and national identity have shaped American's perceptions of the world and subsequently its overseas relationships. In this volume, almost one-half of the essays are new, including selections by Laura McEnaney, Michael L. Krenn, Walter A. Hixson, Robert W. Tucker, Erez Manela, Victoria de Grazia, Thomas F. O'Brien, John Lewis Gaddis, Andrew J. Rotter, Chen Jian, Vladislav Zubok, Michelle Mart, Christina Klein, Randall Woods, Jeremi Suri, Carol Eisenberg, Salim Yaquib, Melvyn P. Leffler, Arne Odd Westad, and George C. Herring. This new edition includes expanded coverage of U.S. policy toward the Third World. New selections explore

the U.S. presence in Latin America during the interwar era and the Middle East during the early Cold War and the era of detente. Others examine U.S. relations with Southeast Asia prior to U.S. military escalation in the Vietnam War and the negotiations pursued by the Richard Nixon administration to end that conflict. Recently released documents on Ronald Reagan's presidency and the end of the Cold War have also been added. Finally, the last chapter had been revised to focus on the administration of George W. Bush and its response to the terrorist attacks of September 11th, including the on-going wars in Iraq and Afghanistan. Major Problems in American Urban and Suburban History John Wiley & Sons
"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021)
Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by

2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

This collection of primary source documents and essays provides in-depth coverage of the cultural, social, political, economic, and intellectual events of the 1920-1945 era. In keeping with the proven strengths of the Major Problems series, the compelling documents are grouped with important secondary sources, accompanied by chapter

introductions, selection headnotes, and suggested readings.

Major Problems in American History, Volume I Modern Library

Why are Americans so angry with each other? The United States is caught in a partisan hyperconflict that divides politicians, communities—and even families. Politicians from the president to state and local office-holders play to strongly-held beliefs and sometimes even pour fuel on the resulting inferno. This polarization has become so intense that many people no longer trust anyone from a differing perspective. Drawing on his personal story of growing up as a fundamentalist Christian on a dairy farm in rural Ohio, then as an academic in the heart of the liberal East Coast establishment, Darrell West analyzes the

economic, cultural, and political aspects of polarization. He takes advantage of his experiences inside both conservative and liberal camps to explain the views of each side and offer insights into why each is angry with the other. West argues that societal tensions have metastasized into a dangerous tribalism that seriously threatens U.S. democracy. Unless people can bridge these divisions and forge a new path forward, it will be impossible to work together, maintain a functioning democracy, and solve the country's pressing policy problems. *Divided Politics, Divided Nation* Major Problems in American History

NEW YORK TIMES BESTSELLER “An elegant synthesis done by the leading scholar in the field, which nicely integrates the work on the American

Revolution over the last three decades but never loses contact with the older, classic questions that we have been arguing about for over two hundred years.”—Joseph J. Ellis, author of *Founding Brothers* A magnificent account of the revolution in arms and consciousness that gave birth to the American republic. When Abraham Lincoln sought to define the significance of the United States, he naturally looked back to the American Revolution. He knew that the Revolution not only had legally created the United States, but also had produced all of the great hopes and values of the American people. Our noblest ideals and aspirations—our commitments to freedom, constitutionalism, the well-being of ordinary people, and equality—came out

of the Revolutionary era. Lincoln saw as well that the Revolution had convinced Americans that they were a special people with a special destiny to lead the world toward liberty. The Revolution, in short, gave birth to whatever sense of nationhood and national purpose Americans have had. No doubt the story is a dramatic one: Thirteen insignificant colonies three thousand miles from the centers of Western civilization fought off British rule to become, in fewer than three decades, a huge, sprawling, rambunctious republic of nearly four million citizens. But the history of the American Revolution, like the history of the nation as a whole, ought not to be viewed simply as a story of right and wrong from which moral lessons are to be drawn. It is a complicated and at

times ironic story that needs to be explained and understood, not blindly celebrated or condemned. How did this great revolution come about? What was its character? What were its consequences? These are the questions this short history seeks to answer. That it succeeds in such a profound and enthralling way is a tribute to Gordon Wood's mastery of his subject, and of the historian's craft.

Major Problems in American History,
Volume II Wadsworth Publishing
Company

Designed to encourage critical thinking about history, the MAJOR PROBLEMS IN AMERICAN HISTORY series introduces students to both primary sources and analytical essays on important topics in U.S. history. This collection serves as the primary anthology for the introductory survey course, covering the subject's entire chronological span.

Comprehensive topical coverage includes politics, economics, labor, gender, culture, and social trends. The fourth edition has been revised to reflect two new historiographical trends: the emergence of the history of religion as an exceptionally lively field and the internationalization of American history.

Several chapters include images, songs, and poems to give students a better “feel” for the time period and events under discussion. Key pedagogical elements of the Major Problems format have been retained: 15 to 16 chapters per volume, chapter introductions, headnotes, and suggested readings.

How to Lead Infectiously in the Era of Big Problems Wadsworth Publishing

Chronic homelessness is a highly complex social problem of national importance. The problem has elicited a variety of societal and public policy responses over the years, concomitant

with fluctuations in the economy and changes in the demographics of and attitudes toward poor and disenfranchised citizens. In recent decades, federal agencies, nonprofit organizations, and the philanthropic community have worked hard to develop and implement programs to solve the challenges of homelessness, and progress has been made. However, much more remains to be done. Importantly, the results of various efforts, and especially the efforts to reduce homelessness among veterans in recent years, have shown that the problem of homelessness can be successfully addressed. Although a number of programs have been developed to meet the needs of persons experiencing homelessness, this report

focuses on one particular type of intervention: permanent supportive housing (PSH). Permanent Supportive Housing focuses on the impact of PSH on health care outcomes and its cost-effectiveness. The report also addresses policy and program barriers that affect the ability to bring the PSH and other housing models to scale to address housing and health care needs.

Designed to encourage critical thinking about history, this concise reader uses a carefully selected group of primary sources and analytical essays to allow students to test the interpretations of distinguished historians and to draw their own conclusions about the history of American foreign policy. The text serves as an effective educational tool for one-semester courses on U.S. foreign policy or recent U.S. history. The Concise Edition consolidates the two volumes of Major Problems in American Foreign Relations, 6/e, into a single volume. Covering the major events of American foreign relations from the Revolutionary era through September 11 and its aftermath, the chapters also address the role of gender, race, and national

identity in American foreign policy. This one-volume edition includes selected chapters from the two-volume edition that cover major events of American foreign policy from the Revolutionary era through September and its aftermath. The chapters have been carefully chosen to be inclusive of the most important events in American foreign relations. Chapter 1, "Explaining American Foreign Relations," has been expanded to encompass the broader period of time covered by this text. The final chapter includes coverage of September 11, Anti-Americanism in the Muslim world, and other recent events and attitudes. Chapter Introductions fill chronological gaps where chapters have been reduced from two volumes to one. The Further Readings section has been updated and

revised to remain current.

Major Problems in the Gilded Age and the Progressive Era Harvard Business Review Press

Government Alone Can't Solve Society's Biggest Problems World hunger. Climate change. Crumbling infrastructure. It's clear that in today's era of fiscal constraints and political gridlock, we can no longer turn to government alone to tackle these and other towering social problems. What's required is a new, more collaborative and productive economic system. The Solution Revolution brings hope—revealing just such a burgeoning new economy where players from across the spectrum of business, government, philanthropy, and social enterprise converge to solve big problems and create public value. By

erasing public-private sector boundaries, the solution economy is unlocking trillions of dollars in social benefit and commercial value. Where tough societal problems persist, new problem solvers are crowdfunding, ridesharing, app-developing, or impact-investing to design innovative new solutions for seemingly intractable problems. Providing low-cost health care, fighting poverty, creating renewable energy, and preventing obesity are just a few of the tough challenges that also represent tremendous opportunities for those at the vanguard of this movement. They create markets for social good and trade solutions instead of dollars to fill the gap between what government can provide and what citizens need. So what drives the solution economy? Who are these

new players and how are their roles changing? How can we grow the movement? And how can we participate? Deloitte's William D. Eggers and Paul Macmillan answer these questions and more, and they introduce us to the people and organizations driving the revolution—from edgy social enterprises growing at a clip of 15 percent a year, to megafoundations, to Fortune 500 companies delivering social good on the path to profit. Recyclebank, RelayRides, and LivingGoods are just a few of the innovative organizations you'll read about in this book. Government cannot handle alone the huge challenges facing our global society—and it shouldn't. We need a different economic paradigm that can flexibly draw on resources, combine efforts, and create value, while

improving the lives of citizens. The Solution Revolution shows the way.

The emergence of severe acute respiratory syndrome (SARS) in late

2002 and 2003 challenged the global public health community to confront a novel epidemic that spread rapidly from its origins in southern China until it had reached more than 25 other countries within a matter of months. In addition to the number of patients infected with the SARS virus, the disease had profound economic and political repercussions in many of the affected regions. Recent reports of isolated new SARS cases and a fear that the disease could reemerge and spread have put public health officials on high alert for any indications of possible new outbreaks. This report examines the response to SARS by public health systems in individual countries, the biology of the SARS coronavirus and related coronaviruses in animals, the economic and political

fallout of the SARS epidemic, quarantine law and other public health measures that apply to combating infectious diseases, and the role of international organizations and scientific cooperation in halting the spread of SARS. The report provides an illuminating survey of findings from the epidemic, along with an assessment of what might be needed in order to contain any future outbreaks of SARS or other emerging infections.
