DYER ADRIENNE

The Prison Officer John
Wiley & Sons
The three primary papers
in this special issue
explore personality

measurement in both
directions, that is, more
narrow and specific and
more broad and
heterogeneous. The first
paper reviews research on
conditional reasoning,
with a focus on the
construct of aggression.
Next, tolerance for
contradiction is explored,

which is defined as a
mode of thinking that
accepts and even thrives
on apparent contradictory
information. The last
primary paper covers core
self evaluation, which
combines measures of
four traits: locus of
control, self-esteem,
generalized self-efficacy,

and emotional stability. The special issue concludes with provocative and insightful critique and commentary of the three primary papers. It notes some important points of criticism, but is primarily positive and laudatory of these research programs. *Prison Guard, Correctional Officer* Routledge

Since 1981, AIDS has had an enormous impact upon the popular imagination. Few other diseases this century have been greeted with quite the same fear, loathing, and prejudice against those who develop it. The mass media, and in particular, the news media, have played a vital part in "making sense" of AIDS. This volume takes an interdisciplinary perspective, combining

cultural studies, history of medicine, and contemporary social theory to examine AIDS reporting. There have been three major themes dominating coverage: the "gay-plague" dominant in the early 1980s, panic-stricken visions of the end of the world as AIDS was said to pose a threat to everyone, in the late 1980s; and a growing routinising of coverage in the 1990s. This book lays bare the sub-textual ideologies giving meaning to AIDS news reports, including anxieties about

pollution and contagion, deviance, bodily control, the moral meanings of risk, the valorisation of drugs and medical science. Drawing together the work of cultural and political theorists, sociologists and historians who have written about medicine, disease and the body, as well as that of theorists in Europe and the USA who have focused their attention specifically on AIDS, this book explores the wide theoretical debate about the importance of language in the social

construction of illness and disease. This text offers insights into the sociocultural context in which attitudes towards people with HIV or AIDS and people's perceptions of risk from HIV infection are developed and the responses of governments to the AIDS epidemic are formulated.

This book is a thoroughly updated version of the popular first edition of The Prison Officer. It incorporates the significant increase in knowledge about the work of prison officer since the first edition was published and provides a live account of prison work

and ways of understanding the role of the prison officer in the late-modern context. Few detailed narratives exist of prison work and the sort of role the prison officer occupies; this book addresses the gap. Using a range of quantitative and qualitative data and drawing on available theoretical literature it explores the role of the prison officer in an 'appreciative' way, taking into account the little-discussed issues of power and discretion. It provides a single accessible guide

to the world and work of the prison officer, looking in detail at the present role of the prison officer in Britain and demonstrating the centrality of staff-prisoner relationships to every operation carried out by officers. This book will be of relevance to anyone with an interest in the work of a prison officer; students and others looking for an introductory survey of the literature and essential reading for any established and aspiring officers.
