 Aes Recommended Practice For Digital AES11-2009 (r2019): AES recommended practice for digital audio engineering - Synchronization of digital audio equipment in studio operations. (Revision of AES11-2003) Printing Date: 2019-07-05: Publication History: Pub. 1991; Rev. 1997; Rev. 2003; Rev 2009; Addendum 2010-02-19; Reaffirmed 2014; Reaffirmed 2019 AES Standard » AES11-2009 (r2019): AES recommended ... AES18-1996 (s2019): AES Recommended practice for digital audio engineering - Format for the user data channel of the AES digital audio interface. (revision of AES18-1992) Printing Date: 2019-08-24: Publication History: Pub. 1992; Reaffirmed 1996; Reaffirmed 2002; Stabilized 2008-09-22, Revised & Stabilized 2019 AES Standard » AES18-1996 (s2019): AES Recommended ... AES10-2008 (r2019): AES Recommended Practice for Digital Audio Engineering - Serial Multichannel Audio Digital Interface (MADI) The following standards and information documents are published by the Audio Engineering Society. The latest printing will include all amendments and corrections and will be available within a week of its date. AES Standard » AES10-2008 (r2019): AES Recommended ... Abstract: A sampling frequency of 48 kHz is recommended for the origination, processing, and interchange of audio programs employing pulse-code modulation. Recognition is also given to the use of a 44.1-kHz sampling frequency related to certain consumer digital applications, the use of a 32-kHz sampling frequency for transmission-related applications, and the use of a 96-kHz sampling frequency for applications requiring a higher bandwidth or more relaxed anti-alias filtering. AES Standard

» AES5-2018: AES recommended practice for ... AES3, AES Recommended Practice for Digital Audio Engineering — Serial Transmission Format for Linearly Represented Digital Audio Data, and the data rates required for its utilization.
