It gives us great pleasure, to present a book of problems in Fluid Mechanics. Fluid Mechanics is developed from Hydraulics which is a very old science that deals with the practical problems associated with the flow of water. This book is mainly prepared for the second year syllabus of Civil, Mechanical, Production, Chemical, Polymer and Petroleum Engineering of all Universities. In this book, in order to develop more confidence in solving problems, various types and sufficient number of problems are solved from different universities. Secondly, students commit mistakes in units, which are made more clear in this book. Every care has been taken to present the matter in precise and very simple language. Simple, self-explanatory figures are given so as to enable the students to reproduce in the exams very easily. In this entire book SI system of units is used. All the necessary care has been taken to avoid mistakes and misprints in this book. However, it is quite likely that some mistakes, misprints might have passed unnoticed. Small mistakes and misprints of the book, if brought to notice will be gratefully acknowledged. Any suggestions to improve the utility of the book will be gladly accepted. We express our sincere thanks to the staff of Standard Book House, ND for their help in bringing out this book.
