GRAMMARWAY 3 AL +SOLUCIONARIO EDEIN Routledge

Do you hate teaching some aspects of grammar? Do you ever feel frustrated that your students just don't get it? Well, in *Grammar Nonsense*, Andrew Walkley and Hugh Dellar argue that you shouldn't really blame yourself. The fault lies largely with the way grammar rules and methods have been passed down through training and published material and become established as the way of doing things: a straightjacket that we need to escape from. Through an entertaining series of rants and meditations on all things grammatical, from the use of the word grammar to the horror of teaching verb patterns, they aim to pull apart rules which we give without thinking and to

question approaches to practice that are seen as a must. Along the way, you'll not only learn how published materials get written and about ideas such as the transformation fallacy and grammar olives, but you'll also get plenty of practical suggestions as to what to do about all this nonsense.

To Accompany English Grammar in Use Fifth Edition John Wiley & Sons

The subject of this book is how human beings construe their experience of the world. The construction of experience is usually thought of as knowledge, represented in the form of conceptual taxonomies, schemata, scripts and the like. The authors offer an interpretation that is complementary to this, treating experience not as knowing but as meaning; and hence as something that is construed in language. In other words, the concern is with the construal of human experience as a semantic system; and since language plays the central role not only in storing and exchanging experience but also in construing it, language is taken as the interpretative base. The focus of the book is both theoretical and descriptive. The authors consider it

important that theory and description should develop in parallel, with constant interchange between the two. The major descriptive component is an account of the most general features of the ideational semantics of English, which is then exemplified in two familiar text types (recipes and weather forecasts). There is also a brief reference to the semantics of Chinese. Theoretical issues are raised throughout as they become relevant to the discussion, with the theoretical base being drawn from systemic functional linguistics. Both the theoretical and descriptive proposals offered in the book are compared and contrasted with approaches deriving from AI, cognitive science and cognitive linguistics.
