The Domains and Demands of School Social Work Practice

Routledge

Written by a former social work admissions director at a top-ranking school of social work, this book helps Masters of Social Work (MSW) applicants

improve their graduate school applications and decide which school of social work is right for them. With examples of tracking sheets, interviews, and biographical statements, this resource reveals the qualities admissions committees look for in applicants. Included are a directory of schools accredited by the Council on Social Work Education

and a checklist of questions to ask when visiting schools. Candid answers from surveys of the admissions staff at social work graduate programs throughout United States also point out the most common mistakes applicants make.

This book examines many of the predominant issues in the field of social work in mental health and substance abuse today. Topics discussed include incarceration of drug abusers, methadone treatment for heroin users, and substance abuse among sex workers. It also examines how parental smoking affects children's attitudes, binge drinking, and the correlation

between depression and sociodemographic factors.

The book also explores help for homeless drug abusers and more.

Is Social Work a Profession? Routledge

Offering a unique focus on evidence-based interventions, critical thinking, and diversity, *School Social Work: A Direct Practice Guide*, by JoAnn Jarolmen, covers the foundations of working with children and adolescents in the schools. Each chapter reviews a basic concept and then provides two in-depth activities that allow readers to apply the concepts to a variety of client populations. Practical, hands-on experiences, best practice approaches, and case

examples throughout the book allow readers to see assessments and techniques in action and increase their understanding of the nuances and complexities of working in a school environment.

The End of Social Work

Taylor & Francis

How has social work changed over the years? What are some of the best social work teams doing differently to meet the complex practical and emotional needs of service users? What practical tools and

approaches can social work managers implement with their teams? Dr. Judy Foster examines good social work practice and the supporting factors that are essential to underpin social work teams - coherent policies; well-qualified and motivated staff; good management support structures; delegated autonomy and discretion for social workers; and mental space to allow reflective and creative problem solving. She illustrates the dilemmas and rewards of

social work relationships through personal stories from her own career as a social worker, manager and teacher - and interviews with social workers and managers. These examples show the relationship between 'doing' something for someone and 'being' emotionally present to empower a service user to manage better. The book is intended to help social work managers improve the support environment for their teams - and hence their effectiveness - and to inform students

and others in related professions interested in learning more about social work. It will also have a wide appeal to an international social work readership.

This fully revised third edition explores the childhood and adolescent experiences of transgender persons, providing foundational knowledge for social workers and related professions about working with trans and gender

expansive youth. Organized through the lens of four distinct forms of knowledge - knowledge of lived expertise, community-based knowledge, practice knowledge, and knowledge obtained through formal/traditional education - this text balances discussion of theory with a range of rich personal narratives and case studies. Updates and additions reflect recent changes to the WPATH guidelines and the NASW Code of Ethics, include brand new material

examining the origins of gender identity and non-binary identities, explore intersectional identities, and offer expanded content considering trauma-informed interventions and ethical issues. Each featuring at least one trans or gender expansive author, chapters present concrete and practical recommendations to encourage competent and positive practice. With a focus on both macro and micro social work practice, this book will be a valuable resource to any

social service practitioners working with children or adolescents. *Social Worker Because Freaking Awesome Isn't an Official Job Title* Springer Publishing Company
Where did professional social work originate from? How effective are social work interpretations in the lives of vulnerable people? A Textbook of Social Work provides a comprehensive discussion of social work practice and its evidence-base. It strikes a balance between the need for social

workers to understand the social, economic, cultural, psychological and interpersonal factors which give rise to clients' problems, and the need for them to know how best to respond with practical measures. Divided into three parts: the text covers the history and of social work as a movement and profession in the first, and social work methods and approaches in the second. The final part looks at the major specialisms, including, among others, chapters on: Children and

families Youth Offenders and substance misusers Social work and mental health Disabled people Older People Providing a comprehensive guide to conceptual and methodological issues in social work and containing plentiful case studies and examples, this book is an essential read for social work students, as well as a valuable resource for practitioners and academics.

Widely used in social work and health care education

courses, Social Work in Health Settings is the most comprehensive text of its kind. It introduces social work students to a range of clients and provides an overview of many social work settings and services in the health arena. If you're a practitioner, you'll find the book useful for examining and evaluating your practice. This second edition features 18 new chapters and chapter subjects and rewritten and updated versions of the 14 chapters which were part of the first

edition. As a casebook, Social Work in Health Settings provides you with an excellent opportunity for understanding particular techniques and interventions. You'll find examples from expert practitioners in a variety of health settings and a thorough integration of social work theory and practice that eliminates the need to assign other supplements for undergraduate/graduate sequences in health care. The book will also help you promote discussions of issues that arise when

working in particular settings and with certain populations. Social Work in Health Settings presents a framework called “practice in context,” developed as a tool for teaching and evaluation, that addresses the three dimensions of context thought to have the most direct consequences for the relationship between social worker and client-- policy, technology, and organization. The framework is applied to 32 settings (ten more than the first edition!)

drawn from services to children and/or families; acute and high-technology care; rehabilitation, long-term intervention and advocacy; mental health care; and care for the frail elderly and hospice care. Social Work in Health Settings enables you, as a social work professional, to understand the context in which your work with clients occurs, in order to interpret and influence the important dimensions of your client contact. This thought-provoking volume will also encourage

educators and students to understand the decisions that affect the helping relationship so that the needs of clients can be evaluated and met properly. In this era of managed care, downsizing, and cost-cutting, the approach in Social Work in Health Settings proves more salient than ever before. This book draws upon the Colorado Model of Criminal Defense-Based

Forensic Social Work – a holistic, client-centered, collaborative approach that uses a trauma-informed care framework – to outline the numerous roles and skills of a forensic social worker. The comprehensive, developmentally informed model employs a past (e.g., mitigation themes and life history compilation), present (e.g., client contact and current functioning support), and future (e.g., reentry services) framework to provide mitigation narratives for

defendants and to create a comprehensive approach to service. The text starts with an overview of practice standards, ethical considerations, and legal frameworks. Next, chapters examine the unique roles that a forensic social worker must take on and the skills they need to possess. These include using clinical interventions with clients in nonclinical settings, working with clients of different identities and backgrounds, assisting

with reentry planning for incarcerated clients, and collaborating with experts outside of the defense team. Finally, the authors provide strategies for practitioners to engage in their own self-care. Interwoven with four case studies using the Colorado Model, this book will be valuable reading for graduate schools of social work, law school programs which have clinics or direct practice components to legal studies, and at defender agencies who contract with or employ social

workers on staff.

If social work students are to flourish in their careers, and go beyond a basic sense of 'competence' in practice, it is essential to develop a sense of Professional Self. This book will help students develop critical understanding of their own social work practice, and the tools and skills required to become a professional social worker. It includes: Chapters on practising Reflexivity and the importance of

Relationships in social work Contributions from leading social work academics A focus on building a professional identity through learning and practice The emphasis is on developing your professionalism, and how that journey translates into everyday practice. To help this growth there are further chapters on getting the best from continuing professional development, challenging poor practice and professionalism and ethics. Professor Jonathan Parker is Deputy Dean for

Research and Enterprise and Director of the Centre for Social Work and Social Policy at Bournemouth University. He is currently conducting cross cultural research on learning and practice with colleagues in Southeast Asia. Professor Mark Doel is Professort Emeritus in the Centre for Health and Social Care Research at Sheffiled Hallam University, and a registered social worker. The End of Social Work: A Defense of the Social Worker in Times of Transformation explores the deeply flawed status quo of the social work profession. Its message is clear: it is not acceptable for social workers to labor under intolerable working conditions and financial strain because they work with the poor and oppressed. Steve Burghardt addresses why social workers no longer have the income and status once shared with nurses and teachers. He addresses the leadership

failures that cause social workers to be blamed for not ending poverty yet expected to handle burnout through self-care rather than collective action. He looks beyond nostrums of social justice to the indifference to systemic racism in the profession's journals and programs and explores the damage caused by substituting individuated measures of unvalidated competencies for grounded wisdom in practice. It is thus no accident that a profession committing to "care for

everyone" undermines the herculean work that so many social workers do on behalf of the poor, marginalized, and oppressed. Situating the work in the crises of 2020, Burghardt ends with a proposed call to action directed at a transformed profession. Such a campaign would be situated within the national struggles for racial justice, climate change, and economic equality so that social work and social workers regain their legitimacy as authentic advocates

fighting alongside the poor and oppressed-and doing so for themselves as well. A rallying cry for social work itself, *The End of Social Work* is an ideal resource for social work programs and practicing social workers driven to enact meaningful change. The countries of East and Southeast Asia, taken as a whole, display a laboratory of social and political conditions, with individual countries presenting a variety of

political, cultural and social characteristics. Some with one-party state systems, others with stable liberal democracies and yet others with more fragile democratic systems. As such the region presents a unique opportunity to examine the relationship between diverse national environments and social work education regimes. In this book, social work educators and theorists from around East and Southeast Asia provide accounts of the social work programs within the

higher education systems of their respective countries and compare them to those of their neighbours. This is the first book to offer a structured account of how social work and social work education have emerged and finds their present place in the historical, economic, political, urban/rural and higher education contexts of Southeast Asia and East Asia. Experts from the region assess the extent to which these countries' systems possess a collective

coherence, while examining the diversity among them.

The Routledge Handbook of Social Work Practice Research is the first international handbook to focus on practice research for social work. Bringing together leading scholars in the field from Europe, the USA and the Asia Pacific region, it provides an up-to-the minute overview of the latest thinking in practice research whilst also

providing practical advice on how to undertake practice research in the field. It is divided into five sections: State of the art Methodologies Pedagogies Applications Expanding the frontiers The range of topics discussed will enhance student development as well as increase the capacity of practitioners to conduct research; develop coordinating and leadership roles; and liaise with multiple stakeholders who will strengthen the context base for practice

research. As such, this handbook will be essential reading for all social work students, practitioners and academics as well as those working in other health and social care settings.

All recent books on international social work mention Africa only briefly and few engage with the broader field of

development studies. This book focuses solely on the unique African context engaging with issues relating to social work and development more broadly thus enabling a deeper examination and more complex and nuanced picture to emerge. Unlike most academic works, this book highlights multiple practitioner voices, with authors or co-authors that have recently been or are currently practising social workers. As an edited book, it draws from both academic research as well

as lived practice experience, supported by strong theoretical positioning and guidance in introductory chapters, drawing on African literature, wherever possible. Looking at case-studies from Lesotho, Botswana, Kenya, Zimbabwe, Ethiopia, Namibia, Uganda, Nigeria, Kenya, South Africa, Rwanda, Zambia and Tanzania and covering established areas of practice such as child protection; working with older people; working with people with disabilities;

mental health; and mainstream services targeting women as well as emerging areas of developmental social work practice, such as humanitarian assistance in post-conflict situations; work with immigrants and refugees; and the training of community-based workers, this book takes a future-oriented perspective that aims to move beyond well-worn critiques to envision constructive and sustainable futures for social work and social development in Africa

from a critical perspective.

Child Welfare: Preparing Social Workers for Practice in the Field is a comprehensive text for child welfare courses taught from a social work perspective. This textbook provides a single source for all material necessary for a contextual child welfare course. As well as combining history, theory, and practice, the authors integrate different practice perspectives to

teach social workers how to engage children and families at the micro, mezzo, and macro levels. Covering both broad issues, such as child welfare, child maltreatment, and responses to child maltreatment, and current issues in social care, including mandated reporting and evidence-based policy prevention and preservation, the material is designed to meet the needs of social work students entering the child welfare workforce. Child Welfare

provides students in social work courses at both the undergraduate and graduate levels with a single source for all material necessary to successfully navigate their studies and careers. *Social Work Practice with Transgender and Gender Expansive Youth* Alpha Edition

This book provides multiple frameworks and paradigms for social work education which integrates indigenous theories and cultural practices. It focuses on the need to diversify and reorient social work curriculum to include indigenous traditions of service, charity and volunteerism to help social work evolve as a

profession in India. The volume analyzes the history of social work education in India and how the discipline has adapted and changed in the last 80 years. It emphasizes the need for the Indianization of social work curriculum so that it can be applied to the socio-cultural contours of a diverse Indian society.

The book delineates strategies and methods derived from meditation, yoga, bhakti and ancient Buddhist and Hindu philosophy to prepare social work practitioners with the knowledge, and skills, that will support and enhance their ability to work in partnership with diverse communities

and indigenous people. This book is essential reading for teachers, educators, field practitioners and students of social work, sociology, religious studies, ancient philosophy, law and social entrepreneurship. It will also interest policy makers and those associated with civil society organizations.
