Dimensional Analysis Worksheet Practice using dimensional analysis for converting measurements of length, time, mass, and volume. Each worksheet includes a unique answer sheet with solutions.  
STEM Sheets - Custom Printable Flash Cards & Worksheets  
Nanometers are much smaller than kilometers, so the final answer should be much smaller than the

initial value. Another name for this method of converting between quantities is called dimensional analysis. Dimensional analysis is a method of problem solving that allows us to use relationships between quantities as “stepping stones.”

Dimensional Analysis Worksheet - Boston University TEACHER PAGES Dimensional Analysis 2 Step Six: Since the answer is to be in hours, we need to locate the factor that has this unit. The factor above is 60 min / 1 h. However, the unit hour needs to be in the numerator. We must write the factor as 1 hour / 60 min.
