*The Theory and Practice of Entrepreneurship* The Princeton Review Presents an assessment of early influences on the career choice of managers and entrepreneurs, their attitudes at the start of their careers as students, and in their later employment experiences. This book also examines the influence of an MBA education on the later work and life experiences of managers and entrepreneurs.

**Local Economic and Employment Development (LEED)**

**Entrepreneurship and Higher Education** Edward Elgar Publishing  
 Human Resource Management in Small Business fills a gap in our understanding of economic performance. Small businesses are more numerous, have more employees, and contribute more to the economies of nations throughout the world than do large organizations. This book examines a range of issues, including the significance of human resource management (HRM) practices to small business success, the management of work hours and work stressors, work and family issues, succession planning, employee recruitment and selection, and managing staff. It also explores how individuals develop HRM skills, and learn from their own and others' experiences. The role of HRM practices in successful small businesses is illustrated through a range of case studies. Including contributors who are internationally recognized academics from a range of countries; this book will prove to be an essential resource for postgraduate students and academics in management. Professional managers and owners in SMEs will also discover great insights from this admirable book.

**Doing Business in Boston** Pearson Education

As governments across the world look to entrepreneurship as a way to increase the wealth and well-being of their countries, this volume brings together leading scholars to provide a comprehensive overview of entrepreneurial activity based on empirical data.

*Peterson's MBA Programs* IAP

**Best 143 Business Schools**The Princeton Review

*Barron's Guide to Graduate Business Schools* Berrett-Koehler Publishers

The renowned group of international contributors to this book provide analysis of where and how gender plays a role in the entrepreneurial ecosystem. 11 essays examine how ecosystems influence women entrepreneurs and how women entrepreneurs influence their local ecosystems, both cross-nationally and through in-depth country studies.

**Best 143 Business Schools** SAGE Publications

*The Coaching Manager, Third Edition* provides students and managers alike with the guidance, tools, and examples needed to develop leadership talent and inspire performance. Using an innovative coaching model, bestselling authors James M. Hunt and Joseph R. Weintraub present readers with a developmental coaching methodology to help employees achieve higher levels of skill, experience greater engagement with organizations, and promote personal development. The thoroughly updated Third Edition reflects the authors' latest research, which focus on building and maintaining trust, working with others who are different from yourself, and coaching by the use of technology.

*Barron's Educational Series*

Corporate jobs are not only unstable---

they're increasingly scarce. It's time to take charge of your own career and lead the life you actually want. Packed with research, exercises, and anecdotes, *The Gig Economy* is your guide to succeeding in the uncertain but ultimately rewarding world of freelance and contract work.

*The Coaching Organization* Springer  
*The Coaching Organization: A Strategy for Developing Leaders* is the only book to provide practical advice on how a company can strategically manage coaching initiatives that strengthen organizations and enhance employee engagement and growth. Authors James M. Hunt and Joseph R. Weintraub offer best practices to help organizations deploy developmental coaching that drives leadership and employee effectiveness.

*Newsletter* Edward Elgar Publishing  
 ""The approach taken by these authors adds something new to the existing market. There is a good balance between theory and concepts on one hand and practical applications and cases on the other hand."" Prof. dr. Gerard H.M. Evers, Professor of Human Capital Valuation, Tilburg University, The Netherlands ""The authors appreciate the critical role that a human resource strategy can and should play in an overall organisational strategy. The text encourages the reader to explore the links between management issues and HR strategy."" Marjorie Corbridge, Associate Dean (Curriculum Development) at the University of Portsmouth Business School. This book is ideal for students of advanced undergraduate modules in HRM, masters programmes in HRM, CIPD specialist electives and MBA and DMS students. Starting from the premise that managing human resources "strategically" is crucial for long term organisational

success this book is essential reading for future line managers as well as Human Resource specialists. The authors define 'human resources' as the "capabilities" and "potentials" that people bring to work organisations. They examine the "process" of negotiation, argument, conflict and resolution in all human resource exchanges within a range of management issues. Within this process, the authors suggest, managers need to make a series of strategic choices among which a direct or an indirect, evolving human resource strategy is critical. Key reasons to read this book An imaginative and engaging running case study examines how theory and practice can be integrated Encourages critical reflection of current practices so that students are challenged by what they read A non-ethnocentric approach to the subject area makes it ideal for a broad audience. Forward written by Kevan Scholes, co-author of the bestselling *Exploring Corporate Strategy* About the authors" John Leopold is Professor of Human Resource Management, Lynette Harris is Professor of HRM & Professional Practice and Tony Watson is Professor of Organisational and Managerial Behaviour, all at Nottingham Business School, Nottingham Trent University. All contributors are teachers, researchers and practitioners in the field of HRM.""  
**SAA Newsletter** SAGE Publications  
 The central theme of this book series is to explore the contemporary perspectives on managing technological innovations and related strategic policy issues. Specifically, this book series open to all potential topics that need attention within the broad theme of the management of technology and innovations, and promote an interdisciplinary scholarship and dialogue on the management of

innovation and technological change in a global context from strategic, managerial, behavioral, and policy perspectives. The third volume of this book series concentrates on “Technological Innovation Networks: Collaboration and Partnership” – a theme resonating with scholars and practitioners that innovation requires a network of partners to collaborate. Authors from around the world contribute to this volume by approaching this theme from many different perspectives: an institutional understanding of international R&D networks, a stakeholder centrality potential in innovation networks, the intersection between intellectual structure and M & A, the rejections of the technological opportunities due to lock-in, the policy-practice paradox of technological innovations, Japan’s national innovation strategy, immigrant entrepreneurs in patents and performance, the impact of university research parks on technology transfer, a historical narrative of cotton technology in China, and the innovative online or blended education in terms of motivation and reality. These researches have made significant attempts to address the important questions on how technological innovation touched on many aspects of our networked social life, thus I hope readers who are interested in learning the most contemporary perspectives on the technological innovation will be impressed, enriched, and intrigued by their analyses in each chapter. As the editor, I hope readers of the volume could enjoy these chapters by its global nature, the practicality orientation, the critical perspective, and the new theories and practices embedded in the selected research.

**The MBA Career Guide** Peterson  
Nelnet Company

Complete and up-to-date information on 275 nationally accredited business schools.

*Gründungsintention von Akademikern*  
OECD Publishing

This book examines the role that higher education institutions are currently playing through teaching entrepreneurship and transferring knowledge and innovation to enterprises and discusses how they should develop this role in the future.

**American Men of Science** Best 143  
Business Schools

This edited volume discusses the role of innovation and regional integration in economic development in Africa. Over the past five decades, post-colonial African countries have struggled to break loose from the trap of poverty and underdevelopment through the adoption of various development strategies at regional, national, and continental levels. However, the results of both national and regional efforts at advancing development on the continent have been mixed. Although the importance of agglomeration and fusion of institutions have long been recognized as possible path to achieving economic development in Africa, the approach to regionalism has been unduly focused on market integration, while neglecting other dimensions such as social policy, mobility of labor, educational policy, biotechnology, regional legislation, manufacturing, innovation, and science and technology. This volume investigates the link between innovation, regional integration, and development in Africa, arguing that the immediate and long term development of Africa lies not just in the structural transformation of its economies but in the advancement of

scientific and innovation capacities. The book is divided into four parts. Part I addresses the theoretical and conceptual underpinnings of innovation and regional integration in Africa. Part II presents case studies which examine how regional economic institutions are fostering innovation in Africa. Part III of the book deals with sectoral issues on innovation and integrated development in Africa. Part IV sets the future research on innovation, regional integration, and development in Africa. Combining theoretical analysis and a comparative, interdisciplinary approach, this volume is appropriate for researchers and students interested in economic development, political economy, African studies, international relations, agricultural science, and geography, as well as policymakers in regional economic communities and the African Union.

**The Gig Economy** Penguin Group  
 "Our Best 357 Colleges is the best-selling college guide on the market because it is the voice of the students. Now we let graduate students speak for themselves, too, in these brand-new guides for selecting the ideal business, law, medical, or arts and humanities graduate school. It includes detailed profiles; rankings based on student surveys, like those made popular by our Best 357 Colleges guide; as well as student quotes about classes, professors, the social scene, and more. Plus we cover the ins and outs of admissions and financial aid. Each guide also includes an index of all schools with the most pertinent facts, such as contact information. And we've topped it all off with our school-says section where participating schools can talk back by providing their own profiles. It's a whole new way to find the perfect match in a graduate school."

*Directory of Statisticians and Others in Allied Professions* Edward Elgar Publishing

The female entrepreneurship researchers community has to thank these women for their brilliant work in reviewing, revising and selecting the best papers from the second Diana International Conference that were finally edited for this volume. . . the book is a good compendium of female entrepreneurship circumstances in different countries that focuses specifically on the explanation as to why gender plays a role in the number of ventures started by women and why they are in general smaller and less growth-oriented. Manuela Pardo-del-Val, *International Entrepreneurship and Management Journal* . . . this edited text draws upon a range of international contributors to present a comparative overview of challenges facing female entrepreneurs seeking to grow their firms. . . this is an interesting book that makes a welcome contribution to contemporary debate. Susan Marlow, *International Small Business Journal* The data and information presented in this work will be of particular interest to students and scholars of entrepreneurship or labor and women s studies. Recommended. General readers; upper-division undergraduate through professional collections. E.P. Hoffman, *Choice* Enterprising new firms drive economic growth, and women around the world are important contributors to that growth. As entrepreneurs, they seize opportunities, develop and deliver new goods and services and, in the process, create wealth for themselves, their families, communities, and countries. This volume explores the role women entrepreneurs play in this economic progress,

highlighting the challenges they encounter in launching and growing their businesses, and providing detailed studies of how their experiences vary from country to country. Statistics show that businesses owned by women tend to remain smaller than those owned by men, whether measured by the number of employees or by the size of revenues. Because women-led firms fail to grow as robustly, the opportunities to innovate and expand are limited, as are the rewards. Based on recent studies that examine the links between entrepreneurial supply and demand issues, this volume provides insights into how women around the world are addressing the challenges of entrepreneurial growth. The first set of chapters consists of country overviews and provides discussions of the state of women growing businesses. The second set of chapters describes research projects under way in different countries and explores more focused topics under the umbrella of women business owners and business growth. The volume concludes with an agenda and projects for future research. Academics and policymakers will gain a greater understanding of women's entrepreneurial behaviors and outcomes through this path-breaking volume. Those who support women through education and training, policymaking, or providing entrepreneurial resources will also find the volume of great practical interest.

**Journal of Small Business and Entrepreneurship** International Labour Organization

Our economic crisis has shown that we need a fundamentally new kind of business leader—able to make ethical decisions in the face of strategic

unknowns, serve the environment and society while also serving the needs of investors and shareholders, and understand how their personality and the social context in which they operate impacts their leadership. This book lays out a compelling model for creating and developing these new entrepreneurial leaders.

[Lifelong Learning in the Mechanical and Electrical Engineering Industries](#) Edward Elgar Publishing

This resource provides rankings based on student surveys and includes student quotes about classes, professors, the social scene and more, as well as a complete index of schools throughout the country with basic information on their programs.

**Growth-oriented Women Entrepreneurs and Their Businesses**

Oxford University Press, USA

Sascha Walter untersucht wie universitäre Fachbereiche ein Gründungsinteresse ihrer Studierenden wecken können. Er zeigt mit Hilfe der Hierarchisch Linearen Modellierung, dass sich fachbereichsbezogene und individuelle Einflüsse abhängig vom Geschlecht auf die Gründungsneigung von Studierenden auswirken. Praxisorientierte Empfehlungen für die universitäre Gründungsförderung runden die Arbeit ab.

*Innovation, Regional Integration, and Development in Africa* Princeton Review

This timely book provides a fresh perspective on contemporary research in the field of entrepreneurship and small business, considering both theory and application.
