Weißer Oleander eBook Berlin Verlag

Der weiße Oleander blüht in Kalifornien im Hochsommer. Dann, wenn die Hitze unerträglich erscheint. Für die zwölfjährige Astrid beginnt zu dieser Zeit eine ruhelose und dramatische Odyssee von Pflegefamilie zu Pflegefamilie. Ihre Mutter, eine exzentrische Schriftstellerin, die zu einer lebenslangen Haftstrafe verurteilt ist, vermag weiterhin einen dominanten Einfluss auf sie auszuüben. Erst allmählich gelingt es dem sensiblen und klugen Mädchen, einen eigenen Platz im Leben zu finden. Es zeigt sich, dass Astrid so stark wie der weiße Oleander ist, der selbst dann blüht, wenn man ihn immer wieder verpflanzt.

International politics is witnessing a rapid transformation due to the emerging impact of the internet and digital media. Activists in various countries have been given a new medium to voice their views and opinions, resulting in governments adapting to the digital environment in which we currently live. As the role of social media and online communities continue to grow, empirical research is needed on their specific impact on governmental policies and reform. Recent Developments in Internet Activism and Political Participation is an essential reference source that explores the modern role that digital media plays within community engagement and political development. This book discusses real-world case studies in various regions of the world on how the internet is affecting government agendas and promoting the voice of the community. Featuring research on topics such as digital ecosystems, information technology, and foreign policy, this book is ideally designed for researchers, strategists, government officials, policymakers, sociologists, administrators, scholars, educators, and students seeking coverage on the societal impact of social media in modern global politics.

In Radiant Infrastructures Rahul Mukherjee explores how the media coverage of nuclear power plants and cellular phone antennas in India—what he calls radiant infrastructures—creates environmental publics: groups of activists, scientists, and policy makers who use media to influence public opinion. In documentaries, lifestyle television shows, newspapers, and Bollywood films, and through other forms of media (including radiation-sensing technologies), these publics articulate contesting views about the relationships between modernity, wireless signals, and nuclear power. From testimonies of cancer patients who live close to cell towers to power plant operators working to contain information about radiation leaks and health risks, discussions in the media show how radiant infrastructures are at once harbingers of optimism about India's development and emitters of potentially carcinogenic radiation. In tracing these dynamics, Mukherjee expands understandings of the

They did and said "This is the best you can do in English." The work culminated not when the book was released by a former Central Minister in 2016, not even when it went for three editions but when an ardent fan of Kalki sent a mail to me in 2019. "It was as if Kalki himself rendered his great work in English."
