Is there really life after being damaged? Yes there is life. Life has a way of taking us through seasons that we must go through to obtain. There are four seasons in the natural. Summer, fall, spring, and winter. In every last one of them you experience a different type of weather and in your life every season that you go through you are going to experience a different effect. Each and every last one of us has something that God has made us responsible for, so let's take charge and let God manifest the things that he has promised. Remember that even if you are damaged you are still not broken. The message that I would like to convey to my readers is that although I have been through hard times, who hasn't; we all have in which I am no different than anyone else. As I have gotten older, I have learned to turn my experiences into stepping stones because they have made me stronger and smarter. Don't let the hard times stop you because without hard times there would be no such thing as good times. My philosophy is, allow the hard times to push you into the good times.

(Reimagined and Expanded with 10,000+ more words than the original) The torture was meant to break her, but it was the truth that made her heart bleed. She left this world believing she wasn't my everything. It's the thought that replays in my head as I stare at the image of the life gone from her body, her tangled brown hair fanning around her face as it hangs, listless. I didn't get to tell her that I didn't knowingly betray her before she was killed. That I still loved her. Now she'll never know, and the whispered words on her last breath will never belong to me, but the man she grew to love in my place. He teeters on his knees next to me. Inconsolable. Both of us are in pieces on the floor. And the only thing that keeps us from completely crumbling is the promise of finding her killer and making him pay. \_\_\_\_\_ PLEASE NOTE: This book contains sensitive subject matter. August 1914, Britain is aflame with war and patriotism. Men from all over the country rush to enlist, volunteering to fight for King and country. Most are young and innocent and cannot possibly foresee the horrors that await them on the bloody battlegrounds of the Western Front. How many of them will survive? Brothers Tom and David Duke have spent most of their lives playing rugby together. With the advent of war, however, they too choose to enlist, each for his own reason: Tom has an insatiable lust for adventure, and David simply cannot let his brother go to war without him. They become soldiers, and together will face the untold horrors of the First World War. Their innocence and boundless enthusiasm propel them into the infamous Battle of the Somme in 1916. The following year, they face the unspeakable horror of Passchendaele, a name that would become synonymous with the ineffable futility of the Great War. What began as patriotic adventure becomes a fight for survival. The brothers cannot escape the brutal reality of war which has unforeseen and tragic consequences for them and the people they love most. Based on the official war diaries of the Eleventh Battalion, the London Regiment, this historical novel tells a gripping story of the true

tragedy of the Great War.

When large formations of Allied four-engine bombers finally flew over Europe, it marked the beginning of the end for the Third Reich. Their relentless hammering of Germany-totaling more than 1.4 million missions-took out oil refineries, industries, and transportation infrastructures vital to the Reich's war effort. While other accounts have focused on operational details, this is the first book to reveal the crucial role of air intelligence in these dramatic campaigns. Robert Ehlers reexamines these bombings through the lens of both air intelligence and operations, a dual approach that shows how the former was so vital to the latter's success. Air intelligence was essential to both targeting and damage assessment, and by demonstrating its contributions to the Combined Bomber Offensive of 1943-1945, Ehlers provides a wealth of new insight into the war. Ehlers describes the close ties that developed between the Royal Air Force's "precision intelligence" arm and the U.S. Army Air Force's "precision bombardment" forces, telling how the RAF's photographic reconnaissance and signals intelligence steered both British and American bombers to the right targets at the right intervals with the right munitions. He shows that the greatest strength of this partnership was its ability to orchestrate all aspects of damage assessment within an effective organizational structure, so that by 1944 senior air commanders-like the RAF's Arthur "Bomber" Harris and the AAF's Carl "Tooey" Spaatz-could gauge the accuracy of bombing with a high degree of precision, analyze its effects on the German war effort, and determine its effectiveness in helping the Allies achieve strategic objectives. Ehlers focuses on three key offensives in 1944-against French and Belgian rail supply lines delivering German troops and supplies to Normandy, against German oil refineries, and against railroads and waterways inside the Reich-that had a disastrous effect on the Nazi war effort. In the process, he underscores the degree to which bombers constituted part of a highly effective combined-arms force, giving Allied armies crucial advantages on the battlefield. Drawing on a huge collection of bomb-damage assessment photographs and a wealth of other archival sources, he shows that the success of these and other efforts can be traced directly to the success of air intelligence. Providing a deeper and more accurate understanding of the bomber campaigns' role in the Allied victory, Ehlers's study testifies to the strategic importance of these efforts in that war and provides a tool for understanding the importance of intelligence operations in future conflicts.

Damaged, But Not Broken A Memoir by LaKeisha Fears-Perez Damaged But Not Broken is a collection of memoirs as told by young people who are heartbroken and who have failed or in some way been affected by negativity. Their recollections are of abandonment, abuse, addictions, and neglect. Their stories prove that the effects of tolerance and how we hold fast to what we see and what we are exposed to varies from individual to individual. The theory of what is perceived early in childhood before the age of five is rooted and embedded in a child's psyche. We set our children up for failure when we subject them to unstable conditions. The environment and what we expose our children to affects how they view themselves and the world around them. A well-rounded balance is essential in a child's life and until they are introduced to religious training, they tend to see us as their god from the moment of birth. Whatever we expose them to is indelibly written in their brains. Children are like little sponges soaking up everything until they come to the age of reasoning at

which they begin to understand right from wrong. Unacceptable lifestyles are damaging, an accident waiting to happen for children as well as adults. The emphasis is not so much on where we are in life as it is on what we are doing where we are. What we are doing to our children can cause them to struggle with the worries of this world and not be able to adapt very well. Getting it out of ones system has proven to be liberating, and the number of broken adults who pass hurt onto their children and continue the ongoing destructive dysfunctional cycle is unfortunate. The stories you are about to read are therapeutic. They are a way to get it out for some and just simple acknowledgement for others.
