 Enabling power: Energy Act 2013, ss. 6 (1), 11 (3), 14, 15 (2) (4), 16 (b), 19 (1) (2).
 Issued: 06.08.2014. Made: 31.07.2014. Laid: -. Coming into force: 01.08.2014 in accord. with reg. 1. Effect: None. Territorial extent & classification: E/W/S. General. Supersedes draft SI (ISBN 9780111116838) issued 25/06/14
ECRM2014-Proceedings of the 13th European Conference on Research Methodology for Business and Management Studies
 This book offers a comparative perspective on 18 countries' legal regulation of crowdfunding. In the wake of the financial crises of 2008, use of this alternative financing method has increased substantially, in various forms. Whereas some states have adopted tailor-made regimes in order to regulate but also encourage this way of financing projects, allowing loans to be made by non-banking institutions, others still haven't specifically addressed the subject. An analysis of these diverse legislative stances offers readers a range of legal solutions for managing crowdfunding activities with regard to e.g. protecting investors, imposing limits on project owners, and finally the role and duties of intermediaries, i.e., companies operating crowdfunding platforms. In addition, the content presented here provides a legal basis for states and supranational organizations interested in regulating this phenomenon to achieve more legal certainty.
Politics and Society in Hungary Springer Nature
 Packed full of practical tips to use in the classroom, case studies to provide theoretical grounding and ideas to improve inclusion, Teaching Adult Learners with Dyslexia and English as an Additional Language covers all the key areas necessary to ensure inclusive and effective teaching practice in higher and further education settings. This book provides a coherent framework for those looking to develop their knowledge and skills in this challenging area and explores key areas such as: teaching and learning strategies, differentiation, assessment, feedback and supporting students using technology. It provides a unique insight into how to develop a thorough understanding of the needs of learners and the principles and practices of how to meet those needs within a classroom setting. This is an essential introductory book for anyone working or training to work in either Further or Higher Education and who wishes to develop knowledge and skills

in the challenging area of supporting and teaching adult EAL learners with learning differences.

Smart and Sustainable Planning for Cities and Regions

Oxford University Press
 These proceedings represent the work of researchers participating in the 11th International Conference on Intellectual Capital, Knowledge Management & Organisational Learning - ICICKM 2014, which this year is being held at The University of Sydney Business School, The University of Sydney, Australia. The Conference Co-Chairs are Dr John Dumay from Macquarie University, Sydney, Australia and Dr Gary Oliver from the University of Sydney, Australia. The conference will be opened with a keynote by Goran Roos, Advanced Manufacturing Council, Adelaide, Australia who will address the topic of "Intellectual capital in Australia: Economic development in a high cost economy." The second day will be opened with a from James Guthrie, University of Sydney, Australia on the topic of "Intellectual Capital and the Public Sector Research: Past, Present, and Future."

The Routledge Companion to Accounting in Emerging Economies

Taylor & Francis
 Indonesia's criminal law system faces major challenges. Despite the country's transition to democracy, both the Criminal Code and the Criminal Procedure Code are badly out of date, the former only superficially changed since colonial times and the latter remaining as it was under Soeharto's authoritarian New Order regime. Law enforcement officers and judges are widely seen as corrupt or incompetent, and new laws, including new Islamic laws passed at the regional level, often contradict the Criminal Code and national statutes, including human rights laws. This book, based on extensive original research by leading scholars in the field, provides an overall assessment of the state of criminal law, law enforcement and penal policy in Indonesia, considers in depth a wide range of specific areas of criminal law, and discusses recent efforts at reform and their prospects for success.

Handbook of Research on Global Aspects of Sustainable Finance in Times of Crises

Oxford University Press
 Islamic archaeology is young discipline, emerging only over the course of the 1980s and 1990s. The Oxford Handbook of Islamic Archaeology is the first work of its kind to cover the archaeology of the Islamic world on a global scale, from North Africa to China and Europe to sub-Saharan Africa.

Practical Research with Children

Academic Conferences and Publishing International
 The world economy in which we are living poses challenges that lead to a realization that 'more of the same' will be difficult to sustain. This provides an illustration that, in order to create new or modified knowledge practices, strengthen customer relationships and thus positively influence customer satisfaction,

organizations must be flexible in configuring (combining) knowledge and knowledge structures in a way that is appropriate for delivering value to the customer. It must simultaneously develop effective strategies for updating the knowledge of its staff members necessary for underpinning the creation and delivery of appropriate knowledge services. Thus, unlearning (forgetting) becomes a critical means for organizational success. The ECKM community of scholars has already initiated dialogue that links its particular strengths to innovation issues. This conference aims to further that dialogue by attracting leading edge work that leverages the ECKM community's in-depth understanding of learning and unlearning to better understand knowledge management. Our aim is to stimulate breakthrough research streams linking learning, unlearning and knowledge management. How can organizations tailor, use, and extend techniques and tools from knowledge management for improving their business practices and processes? Building upon existing work on knowledge management (KM) and organizational learning, the conference will promote interdisciplinary approaches from computer science and information systems, business, management and organization science as well as cognitive science. Emphasis will be put on systematic learning from experience, KM tools and KM success factors. A special interest belongs to knowledge management initiatives which are lightweight (i.e., do not place considerable additional burden on users and KM experts), allow an incremental adoption (i.e., do not require large up-front investment before any return of investment is at least visible), and are flexible regarding frequent changes in experts and topics. Continuing the success of the ECKM conference series since 2000, the 2015 conference will provide an international communication forum bringing together academia and industry for discussing the progress made and addressing the challenges faced by continuous learning in knowledge-intensive organizations.

Handbook Industry 4.0

Cambridge University Press
 The rapid development of new information and communication technologies has changed people's everyday life and consumption patterns significantly. The worldwide spread of those technologies provides many innovations for consumers, but it can also bear risks, such as the indiscriminate collection, storage and cross-border flow of personal data, illegal spying on Internet activities, dissemination of personal information, and abuse of user passwords. The study deals with the current state of consumer data protection law in Brazil, China and Germany from a comparative perspective. It covers the main legal issues of consumer privacy and data protection in these countries and seeks to explain current issues and case law concerning consumer data protection from a practical perspective.
Nutrition, Food Markets and Agriculture Springer Nature

Today, nutrition is mainly discussed under nutritional, medical-health or ideological aspects (e.g. vegetarianism, veganism, etc.). Although the food industry represents one of the most important markets, questions of food production, agriculture, food trade and biodiversity are mostly discussed under national auspices. Not only on the producer side, but also from the consumer perspective, food markets - although still nationally structured - have become more and more global markets, which can be seen, for example, in the development of food commodity prices. In addition, large food corporations are pursuing the strategy of standardizing the entire value chains in the agricultural and food sectors - under their control, mind you. The book addresses economic issues related to food production, agriculture, food trade and biodiversity. Alternatives to traditional agriculture, factory farming, and biodiversity loss are discussed - and reflected upon from an economic perspective. Particular attention is paid to aspects of globalization. This book is a translation of the original German 1st edition Ernährung, Nahrungsmittelmärkte und Landwirtschaft by Christian J. Jäggi, published by Springer Fachmedien Wiesbaden GmbH, part of Springer Nature in 2018. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors.

Crime and Punishment in Indonesia Göttingen University Press
The financial crisis of 2007-9 revealed serious failings in the regulation of financial institutions and markets, and prompted a fundamental reconsideration of the design of financial regulation. As the financial system has become ever-more complex and interconnected, the pace of evolution continues to accelerate. It is now clear that regulation must focus on the financial system as a whole, but this poses significant challenges for regulators. Principles of Financial Regulation describes how to address those challenges. Examining the subject from a holistic and multidisciplinary perspective, Principles of Financial Regulation considers the underlying policies and the objectives of regulation by drawing on economics, finance, and law methodologies. The volume examines regulation in a purposive and dynamic way by framing the book in terms of what the financial system does, rather than what financial regulation is. By analysing specific regulatory measures, the book provides readers to the opportunity to assess regulatory choices on specific policy issues and encourages critical reflection on the design of regulation.

The Routledge Companion to Wellbeing at Work

<https://www.chinesestandard.net>

Hungary was once a frontrunner of democratization. However, since Viktor Orbán came to power in 2010, the country has been the subject of critical media coverage and concerns due to illiberal policies and anti-EU rhetoric. The book helps to analyze and evaluate the developments by providing relevant case knowledge. It provides sound insights into Hungary's system of government, society, parties and media, as well as selected policy areas. It focuses on how different policy areas have been influenced by the EU, traces important lines of development over the past decades, and compares the findings with other states of the region. The authors' professional expertise and broad

knowledge of the political systems of Hungary and Europe provide a well-founded analysis of the developments in the region.

Improving Bayesian Reasoning: What Works and Why? Academic Conferences Limited

This book highlights the latest advances, innovations, and applications in the field of resilience and adaptation of buildings and cities to climate change, as presented by international researchers at the VI International Conference on Recovery, Maintenance and Rehabilitation of Buildings (CIRMARE 2023), held in Covilhã, Portugal, on December 5-7, 2023. It covers a diverse range of topics such as accessibility of buildings and urban spaces, industrialization of rehabilitation processes, interventions in cultural heritage, building quality assessment, maintenance and requalification of built spaces, BIM and the digitization of construction, urban planning, circular economy in the construction sector, urban infrastructure rehabilitation, near zero energy buildings, urban resilience and climate change, recovery of degraded urban areas, service life, and pathologies in buildings. The contributions, which were selected by means of a rigorous international peer-review process, present a wealth of exciting ideas that will open novel research directions and foster multidisciplinary collaboration among different specialists.

Teaching Adult Learners with Dyslexia and English as an Additional Language Government Printing Office

The handbook presents an overview of Industry 4.0 and offers solutions for important practical questions. The law and its current challenges regarding data assignment (who owns the data? / EU guidelines), data security, data protection (General Data Protection Regulation), cyberattacks, competition law (right to access vs. monopolists, permissible and prohibited exchanges of information, possible collaborations) is the point of departure. In turn, the book explores peculiarities in specific areas of Industry 4.0 (Internet of Production, mechanical engineering, artificial intelligence, electromobility, autonomous driving, traffic, medical science, construction, energy industry, etc.). The book's closing section addresses general developments in management, the digital transformation of companies and the world of work, and ethical questions.

FERC Perspectives Routledge

With the proliferation of transnational Muslim networks over the last two decades, the religious authority of traditionally educated Muslim scholars, the uluma, has come under increasing scrutiny and disruption. These networks have provided a public space for multiple perspectives on Islam to be voiced, allowing "progressive" Islamic worldviews to flourish alongside more (neo)traditional outlooks. This book brings together the scholarship of leading progressive Muslim scholars, incorporating issues pertaining to politics, jurisprudence, ethics, theology, epistemology, gender and hermeneutics in the Islamic tradition. It provides a comprehensive discussion of the normative imperatives behind a progressive Muslim thought, as well as outlining its various values and aims. Presenting this emerging and distinctive school of Islamic thought in an engaging and scholarly manner, this is essential reading for any academic interested in contemporary religious thought and the development of modern Islam.

Government Cloud Procurement Routledge

The book is an attempt to bring together what are often seen as incommensurable scientific and philosophical positions. Its core

argument is that a main reason for the divisions about what constitutes scientific knowledge relates to disagreements on philosophical issues. The book explores what these disagreements are about, and discusses whether they can be overcome. Taking a historical perspective, the book traces the divides in science back to three main philosophical traditions: realism, idealism, and scepticism. It maps how these have inspired three main current positions in science: logical empiricism, phenomenology, and sociology of scientific knowledge. The book is intended for a general audience concerned with today's debates on scientific knowledge and society. It will be useful for students and researchers studying philosophy of science, sociology of scientific knowledge, realism, phenomenology, positivism, logical empiricism, analytical philosophy, and sustainable scientific knowledge.

Science Meets Philosophy Univ. Press of Mississippi

In his research, Martin Kowalczyk empirically investigates the challenges of designing and establishing successful decision support with Business Intelligence and Analytics (BI&A). The results from his work elucidate organizational and individual perspectives of BI&A support in decision processes. The organizational perspective considers the processual aspects of decision making and addresses process phases, roles and their interactions. The individual perspective reflects upon decision making of human individuals including their cognition and behaviors involved in decision making. The support of managerial decision making with BI&A gains increasing priority for many businesses in their desire to achieve better decision outcomes and improved organizational performance.

Asylum-Seeker and Refugee Protection in Sub-Saharan Africa Taylor & Francis

An essential, in-depth analysis of the key legal issues that governments face when adopting cloud computing services.

The Practice of Folklore Springer

It is not often acknowledged that the great majority of African refugee movement happens within Africa rather than from Africa to the West. This book examines the specific characteristics and challenges of the refugee situation in Sub-Saharan Africa, offering a new and critical vision on the situation of asylum-seekers and refugees in the African continent. Cristiano d'Orsi considers the international, regional and domestic legal and institutional frameworks linked to refugee protection in Sub-Saharan Africa, and explores the contributions African refugee protection has brought to the cause on a global scale. Key issues covered in the book include the theory and the practice of non-refoulement, an analysis of the phenomenon of mass-influx, the concept of burden-sharing, and the role of freedom fighters. The book goes on to examine the expulsions of refugees and the historical role played by UNHCR in Sub-Saharan Africa. As a work which follows the persecution and legal challenges of those in search of a safe haven, this book will be of great interest and use to researchers and students of immigration and asylum law, international law, human rights, and African studies.
