Modern Mandarin Chinese is a two-year undergraduate course for students with no prior background in Chinese study. Designed to build a strong foundation in both the spoken and written language, it develops all the basic skills such as pronunciation, character writing, word use, and structures, while placing strong emphasis on the development of communicative skills. Each level of the course consists of a textbook and workbook in simplified characters. A free companion website provides all the audio

for the course with a broad range of interactive exercises and additional resources for students' self-study, along with a comprehensive instructor's guide with teaching tips, assessment and homework material, and a full answer key. Key changes to this new edition: This revised edition of level 2 introduces over 200 characters and over 400 new vocabulary items. Additional exercises in the workbooks and online support the expanded number of words and characters incorporated into the textbooks. New cross-references between the textbooks, workbooks, and companion website facilitate using all the resources in an integrated manner. The website has been redesigned and greatly enhanced. Retaining its focus on communicative skills and the long-term retention of characters, the text is presented in simplified characters and pinyin with a gradual and phased removal of pinyin as specific characters are introduced and learned. This approach allows students to focus on the pronunciation and meaning of new words before the corresponding characters are introduced, ensuring they are guided and supported towards reading only in

characters.

Chinese grammar is characterized by its simple structure, lack of inflections, and wide use of monosyllabic morphemes. With the increased popularity of learning Chinese as a second language, there is a demand for a guide to Chinese grammar that's targeted at second language learners. This four-volume set is one of the earliest and most influential works of Chinese grammar, with a special focus on teaching and learning Chinese as a second language. Drawing on rich teaching experience, the authors analyze a myriad of real-world examples to describe Chinese grammatical phenomena and rules while introducing the general grammar system of Chinese. This volume introduces several simple sentence and compound sentence structures of modern Chinese grammar. In addition, the authors examine discourse and other larger units

of sentences in use. Since the first edition came out in 1983, this set has been revised twice and remained one of the best sellers in the field. Practitioners and scholars of teaching Chinese as a second language, as well as students with a basic knowledge of Chinese, will find it to be a handy reference.

This book provides questions and answers for the second half of the grammar taught in Complete Modern Chinese grammar - Beginner to Intermediate. The grammar is sufficient to pass HSK 1, 2 and 3. In addition, the main aim of this book is to get students to use Mandarin for both speaking and writing. The methodology considers repetition as a core requisite to remember and thus use Mandarin both effectively and accurately. There are 70 units, and each unit contains relevant questions directly pertaining to that unit as well as previous ones. There is a constant focus on using newly obtained knowledge and previous knowledge to build up a thorough understanding of how and when to use Mandarin. Naturally, throughout the units, students should note

that all the words that are taught are to be learned, thus they can facilitate a reasonably robust vocabulary. By the end of book 2, all students will be able to speak and write at a level that will surpass everyday Mandarin. Indeed, it is expected that students should be fluent in expressing themselves clearly and directly; discuss various kinds of topics; and be able to communicate about events in the past, present and future. Ultimately, it is hoped that students are not simply interested in passing the HSK test, but trying to be able to converse with native-Mandarin speakers in real-life situations. The true test for any language learner is using the language, not passing a test.
