Alibaba's online shopping platforms Taobao and Tmall have nearly twice as many active buyers than the U.S. site eBay. It has already disrupted new shopping malls in China, but itself is also being disrupted by the mobile culture and social network. The mobile disruption in China is more thorough than the developed world: immature industries such as retail and logistics will leapfrog straight from the

early industrial age to the internet one. (b) The beginning of the multi-screen age and mobile Internet for China consumers. The mobile consumption is growing so rapidly that the shopping malls, a new development in China by itself, have already been disrupted by online-to-offline (O2O) retail consumption. What's more, the growth and positive spillovers go beyond consumer goods sector to services, entertainment, media, finance and even traditional industry sectors. (c) Mobile internet is more about lifestyle and entertainment for China's online community (which tends to be younger than that in the US). The Chinese youth are pouring money into online games, video and music downloading, and virtual goods/ online personas in imaginary worlds. To meet the quest for high quality contents, the tech giants are not only betting on set-top box to convert TV and theatre viewers to online but also creating their own contents; meanwhile, the China market is changing the DNA of Hollywood's blockbuster movies"--

 Will "Big Data" supercharge the economy, tyrannize us, or both? Data Exhaust is the definitive primer for everyone who wants to understand all the implications of Big Data, digitally driven innovation, and the accelerating Internet Economy. Renowned digital expert and successful author Dale Neef clearly explains: What Big Data really is, and what's new and different about it How Big Data works, and what you need to know about Big Data technologies Where the data is coming from: how Big Data integrates sources ranging from social media to machine sensors, smartphones to financial transactions How companies use Big Data analytics to gain a more nuanced, accurate picture of their customers, their own performance, and the newest trends How governments and individual citizens can also benefit from Big Data How to overcome obstacles to success with Big Data - including poor data that can magnify human error A realistic assessment of Big Data threats to employment and personal privacy, now and in the future Neef places the Big Data phenomenon where it belongs: in the context of the broader global shift to the Internet economy, with all that implies. By doing so, he helps businesses plan Big Data strategy more effectively - and helps citizens and policymakers identify sensible policies for preventing its misuse. By conservative estimate, the global Big Data market will soar past \$50 billion by 2018. But those direct expenses represent just the "tip of the iceberg" when it comes to Big Data's impact. Big Data is now of acute strategic interest for every organization that aims to succeed - and it is equally important to everyone else. Whoever you are, Data Exhaust tells you exactly what you need to know about Big Data - and what to do about it, too.
