The global financial crisis of recent years and the associated large fiscal deficits and debt levels that have impacted many countries underscores the importance of reliable and timely government statistics and, more broadly, public sector debt as a critical element in countries fiscal and external sustainability.

Public Sector Debt Statistics is the first international guide of its kind, and its primary objectives are to improve the quality and timeliness of key debt statistics and promote a convergence of recording practices to foster international comparability and as a reference for national compilers and users for compiling and disseminating these data. Like other statistical guides published by

the IMF, this one was prepared in consultation with countries and international agencies, including the nine organizations of the Inter-Agency Task Force on Finance Statistics (TFFS). The guide's preparation was based on the broad range of experience of our institutions and benefitted from consultation with national compilers of government finance and

public sector debt statistics. The guide's concepts are harmonized with those of the System of National Accounts (2008) and the Balance of Payments and Investment Position Manual, Sixth Edition. *Multilateral Official Debt Rescheduling* DIANE Publishing FCS Financial Management L3Pearson South Africa Fundam ental AccountingJut a and Company Ltd **FCS Applied**

the organisation. Audit can be done internally by employees or heads of a particular department and externally by an outside firm or an independent auditor. The idea is to check and verify the accounts by an independent authority to ensure that all books of accounts are done in a fair manner and there is no misrepresentation or fraud that is being conducted. All the public

listed firms have to get their accounts audited by an independent auditor before they declare their results for any quarter. Who can perform an audit? In India, chartered accountants from ICAI or The Institute of Chartered Accountants of India can do independent audits of any organisation. CPA or Certified Public Accountant conducts audits in USA. There are four main steps in the auditing

process. The first one is to define the auditor's role and the terms of engagement which is usually in the form of a letter which is duly signed by the client. The second step is to plan the audit which would include details of deadlines and the departments the auditor would cover. Is it a single department or whole organisation which the auditor would be covering. The audit could last a

day or even a week depending upon the nature of the audit. The next important step is compiling the information from the audit. When an auditor audits the accounts or inspects key financial statements of a company, the findings are usually put out in a report or compiled in a systematic manner. The last and most important element of an audit is reporting the

result. The results are documented in the auditor's report.
