 elements of a computer network include hardware, software, and
 protocols. The interrelationship of these basic elements
 constitutes the infrastructure of the network. Elements Of
 Computer Networking By Narasimha Karumanchi ...Network
 communication protocol requires following elements : Message
 encoding : A source message from sender is encoded into signals
 or waves then transmitted through a medium wired / wireless
 then received and decoded and message is passed to
 destination. Encoding is the process of transforming set of
 Unicode characters into a sequence of bytes. Elements of Network
 protocol - GeeksforGeeks Elements of Computer Networking 10.
 Organization of Chapters TCP is a reliable transport layer
 protocol. It allows the processes to deliver a stream of data
 (bytes) in order, without error, and without any part lost or
 duplicated. Elements of Computer Networking: An Integrated
 Approach ...Computer networks have used various types of
 physical media to exchange information, notably : • electrical
 cable. Information can be transmitted over different types of
 electrical cables. The most common ones are the twisted pairs
 (that are used in the telephone network, but also in enterprise
 networks) and the Computer Networking : Principles, Protocols
 and Practice WAN (Wide Area Network) is another important
 computer network that which is spread across a large
 geographical area; A metropolitan area network or MAN is
 consisting of a computer network across an entire city, college
 campus, or a small region; WLAN is a wireless local area network
 that helps you to link single or multiple devices using. Types of
 Computer Networks: LAN, MAN, WAN, VPN Internet Protocols The
 Internet Protocol (IP) family contains a set of related and widely
 used network protocols. Besides the Internet Protocol itself,
 higher-level protocols such as TCP, UDP, HTTP, and FTP all
 integrate with IP to provide additional capabilities. Similarly,
 lower-level Internet Protocols such as ARP and ICMP also coexist
 with IP. The Basic Types of Network Protocols Explained Computer
 networks components comprise both physical parts as well as the
 software required for installing computer networks, both at
 organizations and at home. The hardware components are the
 server, client, peer, transmission medium, and connecting
 devices. The software components are operating system and
 protocols. Computer Network Components -

 Protocols ...Computer network is a group of two or more
 computers that connect with each other to share a resource.
 Sharing of devices and resources is the purpose of computer
 network. You can share printers, fax machines, scanners, network
 connection, local drives, copiers and other resources. List of
 computer network components both ubiquitous and
 indispensable. Computer Networking continues with an early
 emphasis on application-layer paradigms and application

programming interfaces (the top layer), encouraging a hands-on
 experience with protocols and networking concepts, before
 working down the protocol stack to more abstract layers. In total,
 there are 17 chapters in Elements of Computer Networking |
 Guide books A server is a computer that controls access to the
 hardware, software and other resources on the network and
 provides a centralized storage area for program. A client is a
 computer that request services from a server computer. Peer-to-
 peer is a simple, inexpensive network that Peer-to-Peer typically
 connects fewer than 10 computers. BASIC CONCEPTS OF
 COMPUTER NETWORKS - SlideShare At its very simplest, a
 network of computers is just two or more computers that have a
 way of sharing work, devices or information back and forth
 between them. That holds true whether you've connected two
 laptops in your basement, or 2,000 computers at a factory, or
 millions of them on the internet.

Elements of Computer Networking | Communications Protocols ...
 "Elements of Computer Networking" strikes an excellent balance
 between the principles underlying network architecture design
 and the applications built on top. It should prove invaluable to
 students and teachers of advanced undergraduate and graduate
 networking courses .

What are the basic elements of a network?

At its very simplest, a network of computers is just two or more
 computers that have a way of sharing work, devices or
 information back and forth between them. That holds true
 whether you've connected two laptops in your basement, or
 2,000 computers at a factory, or millions of them on the internet.
 Chapter 1: Elements of Computer Networking | Engineering360
 A computer network is a collection of computers and other
 devices that use a common network protocol to share resources
 with each other over a network medium.
