Embark on your cosmic path to self-discovery with this comprehensive guide to the twelve signs of the zodiac. Your sun sign is determined by the day and month of your birth and dictates your zodiac personality. Taking each of the twelve signs in turn, world famous astrologer Linda Goodman explains the importance of the sun - the most powerful of all stellar bodies - in astrology. She describes the characteristics of each sign and how these can be used to really get to know the men, women, children, bosses and employees in your life. This newfound knowledge allows us to feel closer to one another and to understand that, as Goodman says, 'Not all Capricorns are meek, not all Leos are outwardly domineering and not all Virgos are virgins.' Learn all this and much, much more from the world-famous astrologer who has helped millions divine their way to success, happiness and love by studying the sun signs. Before publication of *Sun Signs* in 1968, astrology as we know it had a very limited following. With this book, Linda Goodman changed that forever, bringing metaphysical consciousness to millions of readers around the world for the first time. Newspapers began running astrology columns, and Goodman herself contributed to these in the larger mass circulation women's magazines. An increasing number of people knew their sign and how to interpret the signs of others, introducing the study of astrological tendencies as we now know it.

After all, delving deeper into our natal charts and the nuances of the astrological world can offer us a rich, exciting tapestry of our innate preferences, relationships, choices, and destiny For those in the know, the zodiac calendar is divided into twelve houses, each ruled by a different sign (Aquarius, Scorpio, Gemini, etc.) and said to govern a particular set of traits. This classic astrology text, revered by beginners and professional astrologers alike, is now available in a Weiser Classics edition. "The most important single contribution of twentieth-century astrology is that astrology is not a map of one's fixed destiny but is a potential map of the unfolding of the authentic, higher self." —Robert Hand, from the foreword Saturn's darker persona is recognized universally in myth and fairytale. In this classic astrology text, renowned astrologer and Jungian analyst Liz Greene offers a fresh perspective on how to handle the influence of this much-maligned astrological symbol. In Saturn, Greene shows us how the frustrating experiences connected to this planet can be turned into opportunities for greater insight and meaning in our lives. Saturn, she says, symbolizes a psychic process—one that allows us to utilize the experience of pain for self-discovery and a more fulfilling and complete life. Greene retraces Saturn's character through sign, house, aspect, and synastry in a brilliant analysis that reveals his other face: that of the initiator who, for the price of our honesty with ourselves, offers us greater consciousness, self-understanding, and, eventually, freedom.

In this series of books, based on the hit podcast *A History of Rock Music in 500 Songs*, Andrew Hickey analyses the history of rock and roll music, from its origins in swing, Western swing, boogie woogie, and gospel, through to the 1990s, grunge, and Britpop. Looking at five hundred representative songs, he tells the story of the musicians who made those records, the society that produced them, and the music they were making. Volume one looks at fifty songs from the origins of rock and roll, starting in 1938 with Charlie Christian's first recording session, and ending in 1956. Along the way, it looks at Louis Jordan, LaVern Baker, the Ink Spots, Fats Domino, Sister Rosetta Tharpe, Jackie Brenston, Bill Haley, Chuck Berry, Elvis Presley, Little Richard, and many more of the progenitors of rock and roll.
